THE NSF 2026 IDEA MACHINE

Help NSF think outside the box

The National Science Foundation 2026 Idea Machine is a competition to help set the U.S. agenda for fundamental research in science and engineering (S&E). Participants can earn prizes and receive public recognition by suggesting the pressing research questions that need to be answered in the coming decade, a future set of Big Ideas for future investment by NSF. It's an opportunity for researchers, the public and other interested stakeholders to contribute to NSF's mission to support basic research. NSF will accept the NSF 2026 Idea Machine entries from approximately late August through late October, 2018. Visit the NSF 2026 Idea Machine website at bit.ly/NSF_IDEA_MACHINE for more information.
