OFFICE OF INTERNATIONAL SCIENCE AND ENGINEER

F

l Science Foundation (NSF) is
rnment agency responsible for
basic research and education
nd engineering. NSF provides
5 billion per year in grants to
ions, primarily to universities,
and education across all
ence and engineering. NSF's
result in new knowledge and
at the scientific and engineering
vell as a world-class, diverse
ally trained workforce.

SE

e of International Science and
(OISE) serves as NSF's focal point
onal science and engineering
ISE supports--either through its
ms or working with the other NSF
and offices--innovative awards
nents that promote research
hrough new international
n and that develop the next
of globally engaged scientists and
OISE funds international research
on activities in all NSF-supported
nvolving any region of the world.

OISE PROGRAMMATIC ACTIVITIES

Developing Global Scientists and Engineers

- **International Research Experiences for Students**: Enable faculty at U.S. institutions to organize international research experiences for U.S. undergraduate and graduate students.
- **Doctoral Dissertation Enhancement Projects**: Support dissertation research by U.S. graduate students at a foreign site.

International Research Fellowship Program

Support for U.S. citizens or permanent residents with a recent Ph.D. to conduct research at institutions outside the United States.

Pan-American Advanced Studies Institutes

Short courses in engineering or biological, mathematical or physical sciences for advanced graduate and postdoctoral students in the Americas.

East Asia and Pacific Summer Institutes

Summer research experiences for U.S. graduate students (citizens and permanent
