### ANNOUNCEMENT NUMBER S20050118A-IPA DIRECTOR, OFFICE OF CYBERINFRASTRUCTURE (OCI)

**\*ANNOUNCEMENT HAS BEEN AMENDED TO EXTEND THE CLOSING DATE TO 09/15/2005.**

The National Science Foundation is seeking qualified candidates for the position of Director, Office Cyberinfrastructure (OCI), Office of the Director (OD). In addition to seeking candidates who are interested in an appointment as a Senior Executive Service career basis (S20050118A-C) or limited term basis (S20050118A-LTD), NSF is also inviting individuals who might be interested in an Intergovernmental Personnel Act (IPA) assignment to submit an application. A statement of duties of the position and qualification requirements is included below.

Initial assignments under the IPA mechanism may be made for a period of up to two years. Individuals eligible for an IPA assignment with a Federal agency include employees of State and local government agencies or institutions of higher education, Indian tribal governments, and other eligible organizations in instances where such assignments would be of mutual benefit to the organizations involved. The individual remains an employee of the home institution and cost-sharing arrangements are generally negotiated between NSF and the home institution. **Individuals interested in an IPA assignment should submit curriculum vitae or Federal application form and a letter referencing qualifications to the following address:**

The National Science Foundation provides reasonable accommodations to applicants with disabilities on a case-by-case basis. If you need a reasonable accommodation for any part of the application and hiring process, please notify the point of contact located on this vacancy announcement.

**STATEMENT OF DUTIES:** For the foreseeable future, cyberinfrastructure will play an increasingly important role in catalyzing advances in science and engineering. In addition to making new approaches to discovery, learning and innovation possible, cyberinfrastructure will increasingly provide enhanced access to scientific methods and instrumentalities, thereby promising to democratize the conduct of science and engineering research and education.

Research and education activities enabled by NSF-supported cyberinfrastructure encompass the full range of science and engineering disciplines supported by the agency. NSF's cyberinfrastructure projects are often multidisciplinary, unique and complex, and operate at the state-of-the-art. Projects are designed to meet the specific requirements of the science and engineering research and education community, and they leverage the private sector's significant investments in commodity cyberinfrastructure. Both scientifically and administratively NSF's cyberinfrastructure projects represent significant management challenges, operating at the cutting edge of science, engineering and technology.

The incumbent serves as NSF's principal spokesperson in the area of cyberinfrastructure, serving as the principal cyberinfrastructure advisor to the Director of NSF and as a member of the agency's Cyberinfrastructure Council (CIC). He/she directs the activities of the Office of Cyberinfrastructure, which provides essential cyberinfrastructure services in support of the national science and engineering research and education community.

The incumbent: provides strategic leadership in the development and implementation of support for state-of-the-art cyberinfrastructure services to meet the needs of the academic science and engineering research and education community; takes the lead in strategic planning and policy setting for cyberinfrastructure; determines cyberinfrastructure funding requirements and prepares and justifies budget estimates; defines and balances program needs, actively working with relevant NSF personnel and other stakeholders to ensure that necessary research, education and other infrastructure investments are being made; oversees the evaluation of cyberinfrastructure proposals and recommendations for awards and declinations; oversees the management and oversight of a complex portfolio of cyberinfrastructure projects; develops and applies criteria for evaluating the performance of cyberinfrastructure projects supported; represents NSF to relevant stakeholder groups, fostering partnerships with other Divisions, Directorates, Federal agencies, private sector organizations, the academic community, and the international community.
