**DIVISION OF SCIENCE RESOURCES STATISTICS**

The Division of Science Resources Statistics (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

*provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...*

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

SRS data are available through the World Wide Web (<http://www.nsf.gov/sbe/srs/stats.htm>). For more information about obtaining reports, contact [paperpubs@nsf.gov](mailto:paperpubs@nsf.gov) or call (301) 947-2722. For NSF's Telephonic Device for the Deaf, dial (703) 292-5090.

# ACKNOWLEDGMENTS

This publication was written by Amy Friedlander and Rändi S. Bessette while at the Center for Information Strategy and Policy at Science Applications International Corporation (SAIC). Dr. Friedlander is now Special Projects Associate at the Council on Library and Information Resources and Dr. Bessette is employed by the U.S. Department of Defense. The work was performed under a grant from the National Science Foundation's Division of Science Resources Statistics (SRS). Overall direction and guidance were provided by Eileen L. Collins, Project Director, SRS; Mary J. Frase, Deputy Division Director, SRS; and Lynda T. Carlson, Division Director, SRS. Ronald S. Fecso, Chief Statistician, SRS, and Jeri M. Mulrow, Senior Methodologist/Survey Statistician, SRS, supplied thoughtful and thorough statistical review.

Thanks for technical insight and review of the draft report are due William Y. Arms, Cornell University; Mark Frankel, American Association for the Advancement of

Science; Rachele Hollander, National Science Foundation; Rob Kling, Indiana University; and Hal Varian, University of California–Berkeley. Thanks also are due Jeffrey R. Cooper, Director of the Center for Information Strategy and Policy, SAIC, for his assistance with the pricing and business models material in section III; and Richard Love, a lawyer with SAIC who specializes in intellectual property rights, for his assistance with the material in section III on that topic.

Valuable contributions and insights came from Nita Congress, who performed the technical editing of the manuscript and Rolfe Larson who supervised the editorial process. Tanya R. Gore of the Information and Technology Services Program of SRS undertook copyediting, processing, and final composition of the report. John R. Gawalt, Director of the SRS Information and Technology Services Program, and Peg Whalen and the rest of the Web team handled electronic publication.
