Program Director

DIVISION OF SCIENCE RESOURCES STATISTICS

The Division of Science Resources Statistics (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to

ACKNOWLEDGMENTS

This report was written by Brandon Shackelford, science resources analyst, Research and Development Statistics (RDS) Program, Division of Science Resources Statistics (SRS), National Science Foundation (NSF).

Many other SRS staff members provided useful comments on this report and reviewed the material for accuracy. John Jankowski, program director, RDS, provided significant guidance and input. Alan Rapoport, Lawrence Rausch, and John Tsapogas each provided useful comments on early drafts of the report. Ron Fecso, chief

statistician, SRS, reviewed the report for statistical accuracy. Mary Frase, Deputy Division Director, SRS, reviewed the final draft of the report for accuracy and consistency. Kevin Mitchell, Aspen Systems Corporation, assisted in the editing and composition of the report. Tanya R. Gore and Rolfe W. Larson, Information and Technology Services Program (ITSP), managed editing and production of this report. John R. Gawalt, Program Director of ITSP, and his Web team handled electronic publication.

LIST OF SIDEBARS	vii
LIST OF TABLES	viii
LIST OF FIGURES	ix
GENERAL NOTES	1
HIGHLIGHTS	3
INTRODUCTION	5
NATIONAL R&D TRENDS	7
Trends in R&D Performance	11
Trends in Federal R&D Funding	11
Trends in Non-Federal R&D Funding	21
Trends in R&D by Character of Work	22
SECTORAL COMPOSITION OF R&D PERFORMANCE	25
Industrial R&D by Industry, Firm Size, and R&D Intensity	25
Federal R&D Performance	33
University and College R&D Performance	36
R&D PERFORMANCE BY STATE	41
Distribution of R&D Expenditures Among States	41
Ratio of R&D to Gross State Product	42
Sector Distribution of R&D Performance by State	42
Industrial R&D in Top States	42
INTERNATIONAL R&D TRENDS AND COMPARISONS	45
International R&D/GDP Comparisons	46
Nondefense R&D Expenditures and R&D/GDP Ratios	52
International R&D by Performer and Source of Funds	52

APPENDIX A: TECHNICAL NOTES 59

 Definitions of R&D and Its Components 61

 Notes on Data Sources 63

 Data Analysis 64

 Supporting Data Sources on R&D Expenditures 65

APPENDIX B: DETAILED STATISTICAL TABLES 67

Federal R&D Tax Credit	36
Purchasing Power Parities: Preferred Exchange Rates for Converting International R&D Data	47

LIST OF TABLES

<i>Table</i>	<i>Page</i>
1. U.S. research and development expenditures, by character of work, performing sector, and source of funds: 2003 (projected)	10
2. Budget authority for research and development, by Federal agency and character of work, proposed levels: FY 2004	16
3. Estimated Federal research and development obligations, by performing sector and agency funding source: FY 2003	22
4. Academic research and development funds passed through to subrecipients: FY 1998–2001	26
5. Industrial research and development performance, by industry and source of funding: 2001	28
6. Estimated share of company-funded research and development and in domestic net sales accounted for by computer-related services industries: 1987–2001	31
7. Total research and development and lower bound estimated biotechnology research and development, by industry and company size: 2001	32
8. Funds for industry research and development performance and number of companies performing research and development in manufacturing and nonmanufacturing industries, by size of company: 2001	33
9. Company and other (non-Federal) research and development as share of net sales in companies performing research and development, by industry and company size: 2000, 2001	34
10. Federal research and development obligations, total, intramural, and federally funded research and development centers, by U.S. agency: FY 2003	35
11. Research and experimentation tax credit claims: 1990–99	36
12. Top 10 states in research and development performance, research and development by sector, and research and development as percentage of gross state product: 2001	41
13. Top 10 states in industry-performed research and development and share of research and development, by selected industries: 2001	43
14. Research and development share of gross domestic product, by country/economy	51
15. Academic research and development expenditures, by country and source of funds: 1981, 1990, and 2000	55
16. Shares of industrial research and development, by industry sector for selected countries: 1999 or 2000	56

LIST OF FIGURES

<i>Figure</i>	<i>Page</i>
1. U.S. research and development performance, by performing sector: 1953–2003	8
2. Shares of U.S. research and development expenditures, by source of funds, performing sector, and character of work: 2003	9
3. U.S. research and development funding, by source of funds: 1953–2003	12
4. U.S. research and development expenditures, by source of funds: 1953–2003	13
5. Federal and non-Federal share of U.S. research and development: 1953–2003	14
6. Federal research and development budget authority, by budget function: FY 1980–2003	14
7. Federal research and development budget for combating terrorism, by agency: FY 2002 and 2003	15
8. Federal research and development support, by performing sector: 1953–2003	18
9. Difference in U.S. performer-reported and agency-reported Federal research and development: 1980–2002	19
10. Federal obligations for research, by agency and major science and engineering field: FY 2003	20
11. U.S. research and development expenditure, by source of funds, performing sector, and character of work: 2003	24
12. Projected Federal obligations for research and development and research and development plant, by agency and character of work: FY 2003	24
13. Trade industry research and development detail: 2001	29
14. Effect of redistributing trade research and development, by impacted industry: 2001	30
15. Sources of research and development funding for public and private academic institutions: 2001	37
16. Share of academic research and development of universities and colleges, by rank of academic research and development expenditures: 1985–2001	38
17. Academic research and development, by field of science and engineering: FY 2001	39
18. U.S., G-7, and Organisation for Economic Co-operation and Development countries research and development expenditures: 1985–2001	45
19. Research and development expenditures and annual changes in research and development estimates, Japan and Germany: 1988–2000	48
20. Research and development share of U.S. gross domestic product: 1953–2003	49
21. Research and development share of gross domestic product, G-8 member countries: 1981–2001	50
22. Research and development expenditures for selected countries, by performing sector and source of funds: 2000 or 2001	54
23. Sources of research and development expenditures in Organization for Economic Co-operation and Development countries: 1981–2000	58
