

GROWING CONVERGENCE RESEARCH LECTURE SERIES

Using the Science of Team Science to Advance Convergence Research

PRESENTED BY

Kendra Spence Cheruvellil (she | hers)
Professor, Department of Fisheries and Wildlife
Dean, Lyman Briggs College
Michigan State University

Thursday, May 11, 2023 ~ 4:00 PM to 5:00 PM (ET)

Synopsis:

Convergence research requires investigators to work in interdisciplinary teams to advance integrative knowledge and solve complex problems. Therefore, convergence researchers must pay attention to the policies, practices, and cultures operating within their teams that often-times are counter to diversity, equity, and inclusion goals and act as barriers to scientific success. This seminar will provide context, examples, and strategies to improve teamwork and advance convergence research.
