No-cost extensions
withdrawals
Notifications & Requests
subawards
Proposal File Updates
rebudgeting
Cost Sharing

Frequently Asked Questions & Frequently Given Answers

➔ **What are NSF's Grants.gov ramp-up plans for fiscal year 2006?**

NSF will be posting 75% of the agency's funding opportunities to Grants.gov APPLY in FY 06. Submission through Grants.gov may be required for some of these funding opportunities. FastLane is still an option because Grants.gov does not currently have the means to accept collaborative proposals or proposals with subaward budgets. NSF is working with Grants.gov in order to accept proposals with subaward budgets by second quarter 2006. Grants.gov has not announced when the collaborative proposal functionality will be available.

Applicants should carefully read NSF's Grants.gov Application Guide for agency-specific instructions. Of note are the instructions for the file attachments that must be in PDF in order for the proposal to be inserted into FastLane for review.

NSF Grants.gov Application Guide:

Frequently Asked Questions & Frequently Given Answers

- ➔ **How has the impact of Hurricane Katrina affected NSF-funded institutions and what is NSF doing to ensure research continues at the affected institutions?**

NSF is committed to minimizing disruption to our grantees, to the academic science and engineering enterprise, and to the valuable federal investment in colleges, universities, faculty and students in the region.

NSF has extended awards to institutions in the disaster area that expired before October 1, 2005. NSF will also make every effort to assist in the transfer of awards for faculty and students who temporarily change institutions, including movement of fellowship stipends, as appropriate, to new awardees.

Frequently Asked Questions & Frequently Given Answers

- ➔ We received an award from NSF which did not require cost sharing. We now would like to receive a supplement to this award, however, the NSF program officer is asking us to cost share 50 percent. Is this allowed?

No, this is not allowed. The new cost sharing policy, as approved by the NSB, eliminated program specific cost sharing. Previously issued program solicitations that specified a cost sharing requirement remain valid.

Frequently Asked Questions & Frequently Given Answers

- ➔ **The GPG was revised to remove tuition remission as one of the examples of other direct costs. Does this mean that tuition remission is no longer an allowable expense on NSF grants?**

Tuition remission is generally treated as part of an organization's fringe benefit rate or as a direct cost. NSF's policy is that colleges and universities should budget tuition remission consistent with its established indirect cost rate methodology and negotiated rate agreement. If tuition remission is budgeted as a direct cost, it should be listed in the "Other" category of the Budget under "Other Direct Costs."

- ➔ **If we submit a proposal which includes a co-PI from a foreign institution, are we allowed to submit a collaborative proposal, or will we need to issue a separate subaward?**

Given that NSF rarely makes awards directly to foreign institutions, NSF advises use of the collaborative procedure whereby you submit as the prime organization and have a subaward with the foreign institution.

Frequently Asked Questions & Frequently Given Answers

- ➔ **Can a proposer submit the same proposal to different organizations within NSF for simultaneous review?**

Only one submission should be provided to NSF even if review by multiple programs is envisioned. You may indicate on the Cover Sheet which NSF organizational unit(s) you believe would be most appropriate for proposal review. However, NSF will determine which program will evaluate each proposal. The submission of duplicate or substantially similar proposals concurrently for review by more than one program without prior NSF approval may result in the return of the redundant proposal(s).

- ➔ **My proposal to NSF was declined. May I re-submit it?**

A declined proposal may be resubmitted, but only after it has undergone substantial revision. Resubmittals that have not clearly taken into account the major comments or concerns resulting from the prior NSF review may be returned without review. NSF will treat the revised proposal as a new proposal, subject to the standard review procedures.

Frequently Asked Questions & Frequently Given Answers

➔ **Does NSF pay academic year support?**

Compensation for doing research is often included as part of a faculty member's regular salary and in those cases, academic year salary would not be appropriate. If, however, a faculty member has a teaching appointment, it may be appropriate to request academic year support. The caveat is that some NSF Divisions/Directorates have more restrictive policies with regard to academic year support than others. Therefore, the best thing to do is to check with the cognizant Program Officer to discuss the issue.

➔ **Can the expenses for acquiring a visa for foreign collaborators – speaker, visiting scientist – be paid from an NSF grant?**

Visa fees are not normally an allowable direct cost expenditure to a grant.

Frequently Asked Questions & Frequently Given Answers

- ➔ **One of our PIs purchased airfare tickets for a group of researchers that are located outside the US to attend a conference at our university. The tickets are not on a US flag carrier. Can we still be reimbursed for this expense?**

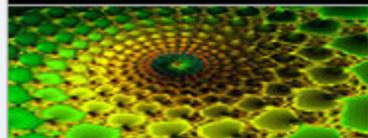

Any air transportation to, from, between, or within a country other than the U.S. of persons or property, the expense of which will be assisted by NSF funding, must be performed by or under a code-sharing arrangement with a U.S.-flag air carrier if service provided by such a carrier is available. Exceptions are noted in Grant General Conditions (GC-1).

- ➔ **May I use Universal Resource Locators (URLs) within the Project Description of our proposal?**

PIs are advised that the project description must be self-contained and are cautioned that URLs (Internet addresses) that provide information related to the proposal should not be used because 1) the information could circumvent page limitations, 2) the reviewers are under no obligation to view the sites, and 3) the sites could be altered or abolished between the time of submission and the time of review.
