

Dr. David Stern has been President of the Boyce Thompson Institute for Plant Research, an independent affiliate of Cornell University, since 2004. He is also an Adjunct Professor in the Department of Plant Biology at Cornell University and a Fellow of the American Association for the Advancement of Science. Dr. Stern received a M.Phil. degree from Cambridge University in 1982 and a PhD from Stanford University in 1986. He served as co-editor (1994-2003) of *The Plant Cell*, a publication of the American Society of Plant Biology (ASPB) as was named a Fellow of the American Society of Plant Biology in 2010. His research is on communication between different sub-cellular compartments within plant cells, specifically how chloroplast genes and metabolic activities are regulated by the products of nuclear genes, usually acting at the transcriptional or post-transcriptional level.
