Two-Day Panel Agenda

Day 1

- Self Introductions
- Panel Briefing/Logistics
- Discussion and Preliminary Recommendations (HC/C/LC/NC)
- Start Panel Summaries

Day 2

- Final Recommendations (HC/C/LC/NC) and Rankings (HC/C)
- Finish Panel Summaries
- Approve Panel Summaries
- Final Revision to Individual Reviews

Panel Objectives

- Provide ***quality feedback*** to the PIs, keeping in mind that proposals may be among the first ones the PI has written
- Provide ***advice*** to NSF Program Directors for funding recommendations

Conflicts of Interest may arise from a disqualifying relationship

- Close friend or relative
- Business or professional partnership
- Institution
 - As current employee, previous employee (last 12 months), or being considered for employment, formal or informal
 - As a member of an advisory committee or similar body
 - Academic department where your family member is currently enrolled
 - Received an honorarium or award in the last 12 months
- Thesis student or thesis advisor (lifetime COI)
- Collaboration
 - Co-author of proposal, paper (past 48 months)
 - Co-editor of book, journal, proceedings (past 24 months)

... or from a financial interest

- Stock ownership (you, your spouse, your children) of more than \$15K of a company that is part of the proposal (diversified mutual funds excepted)

... OR

- from any relationship that might be perceived by a reasonable person familiar with the relationship as affecting your judgement

January 2021

Confidentiality and Ethics

- Your participation is confidential!
 - **OK** to say you participated in an NSF panel
 - **Not OK** to say which one, which day!
- Panel recommendations are confidential!
 - Do not discuss recommendations and panel proceedings
- Proposals contain sensitive information
 - Proposals are not in public domain
 - Do not copy, distribute or quote from them
 - Delete all review related files after the panel

Hatch Act

- During the time you are serving on panel, you are considered an employee of the Federal Government
- Time and Place Restrictions
 - You may not engage in political activities while on NSF time or located in the NSF building.
 - This includes posting on social media, discussing on the phone, sending emails, or discussing among each other.
 - You may not wear anything with political implications.
 - This applies to on-site and virtual panels.

NSF Harassment Policy

- As the primary funding agency of fundamental science and engineering research in the U.S., NSF is committed to promoting safe, productive research and education environments for current and future scientists and engineers, including at NSF headquarters and other locations where the Foundation conducts its business.
- Panel reviewers are an integral part of the Foundation's commitment to identifying and funding science, technology, engineering, and math proposals of the highest quality.
- NSF is committed to fostering an atmosphere of frank, open, and respectful communication in the proposal review process so that all reviewers can participate fully and expects all review panel participants to comport themselves in a responsible and accountable manner while employed by NSF as panel reviewers.
- Individuals serving as panel reviewers are Special Government Employees and as such fall under NSF's complaint procedures for employees.
- Any reviewer who believes they are being subjected to harassing or threatening behavior during the course of their NSF panel review activities should contact NSF's Office of Diversity and Inclusion at (703) 292-8020 or eeo@nsf.gov.
- This policy applies to all panels, both on-site and virtual.

January 2021

Ways to Mitigate Implicit Evaluation Bias

- Increase awareness of how implicit bias might affect evaluation.
- Decrease time pressure and distractions in the evaluation process.
- **Rate on explicit criteria** rather than global judgments.
- **Point to specific evidence** supporting judgments.
- Each panelist should feel empowered to bring up the issue in a non-judgmental fashion if he or she questions an implicit bias.

Five Review Elements

The following elements should be considered in the review for both criteria:

1. What is the potential for the proposed activity to:
 - a. Advance knowledge and understanding within its own field or across different fields (Intellectual Merit); or
 - b. Benefit society or advance desired societal outcomes (Broader Impacts)?
2. To what extent do the proposed activities suggest and explore creative, original, or potentially transformative concepts?
3. Is the plan for carrying out the proposed activities well-reasoned, well-organized, and based on a sound rationale? Does the plan incorporate a mechanism to assess success?
4. How well qualified is the individual, team, or organization to conduct the proposed activities?
5. Are there adequate resources available to the PI (either at the home organization or through collaborations) to carry out the proposed activities?

FRR: Foundational Research in Robotics

- Jointly managed by the Directorates for Engineering (ENG) and Computer and Information Science and Engineering (CISE)
- All proposals are handled as part of a single unified program, irrespective of the division that initially receives the proposal.

January 2021

FRR: What is a Robot?

For the purposes of this program, a robot is defined as **intelligence** embodied in an **engineered construct**.

- Here **intelligence** includes a broad class of methods to process information that enable a robot to solve problems or make contextually appropriate decisions.
- Here an **engineered construct** exhibits appropriate levels of physical complexity to enable the robot to sense and move within, or substantially alter, its working environment.

Projects may focus on a distinct aspect of intelligence, computation, or embodiment; research is encouraged that considers inextricably interwoven questions of intelligence, computation, and embodiment.

January 2021

FRR: What is Foundational Research?

The focus of the FRR program is on **foundational advances** in robotics.

- All proposals must convincingly explain how a successful outcome will **enable transformative new** robot functionality or **substantially enhance** existing robot functionality.
- Meaningful experimental validation on a physical platform is strongly encouraged.

*The proposal should clearly articulate how the intellectual contribution of the proposed work addresses **fundamental gaps in robotics**.*

FRR: What is Responsive?

Is there a **robot**?

- The focus of the project should be a robot or a class of robots as defined in the program description.

Will a robot gain a **new** or **significantly improved** capability?

- Over the course of project a robot or class of robots should gain new and useful abilities or significantly improve on existing abilities.

Is robotics **essential** to the *intellectual merit* of the proposal?

- Robotics should be the intellectual merit (not broader impact) of the proposed work. Robotics should be essential to the project, and not a convenient platform to demonstrate the research results. Choosing an application other than robotics for the project should significantly reduce its impact.

January 2021

Panelist Roles

Lead Reviewer (L,R)

- writes review of proposal and submits with score
- presents proposal overview, kicks off discussion

Reviewer (R)

- writes review of proposal and submits with score
- discusses analysis during panel ... only adding to what has been said

Scribe and Reviewer (S,R)

- writes review of proposal and submits with score
- keeps notes of discussion; drafts, revises, and submits Panel Summary for comments and then submits for approval

Panelist

- NOT expected to write review of proposal
- welcome to join the discussion, and may also provide a score and written review

Panel Recommendation Categories

- **HC – *Highly Competitive***
 - Panel saw outstanding merit in the proposal, with at most minor weaknesses.
- **C – *Competitive***
 - Panel saw significant merit in the proposal, but also noted potentially resolvable weaknesses.
- **LC – *Low Competitive***
 - Panel saw merit in the proposal, but it was outweighed by major weaknesses.
- **NC – *Not Competitive***
 - Panel did not see discernable merit in the proposed work in the context of the program objectives.

Adopted by FRR WG on 1/12/21

Feedback to PI

- **PI will receive**
 - All reviews
 - Panel summaries
 - Program Director's comments and recommendation (award/decline)
- **Reviews and Panel Summaries are **important feedback****
- **A Good Panel Summary**
 - Constructively advises PI
 - does not make assumptions about the proposer (avoid comments like *“The proposers should read ...”* but instead, use *“The proposal does not reference ...”*)
 - Enables better research
 - Guides PI
 - Benefits Scientific Community

January 2021

Robotics@NSF

- Your participation is very important to the research and education community!
- We appreciate your hard work prior to today and your effort during the panel meeting.
- Thanks to NSF administrative staff assisting in the logistics prior and during and after your participation.

Thank you!
