### **Finding a Home for an Unsolicited Proposal**

- If the focus of the proposal is theory development, the proposal should be submitted to the Theory, Models and Computational Methods Program.
- If the focus of the proposal is measurement/instrumentation/data analysis, the proposal should be submitted to the Chemical Measurement and Imaging Program.
- If the focus of the proposal is environment, the proposal should be submitted to the Environmental Chemical Sciences Program.
- If the focus of the proposal is biology/biochemistry, the proposal should be submitted to the Chemistry of Life Processes Program.
- If the focus of the proposal is catalysis, the proposal should be submitted to the Chemical Catalysis Program.
- If the focus of the proposal is nano/supra/macro, the proposal should be submitted to the Macromolecular, Supramolecular and Nanochemistry Program.
- If the focus of the proposal is synthesis, the proposal should be submitted to the Chemical Synthesis Program.
- If the focus of the proposal is dynamics, mechanism, or structure, the proposal should be submitted to the Chemical Structure, Dynamics and Mechanisms Program.
- If questions, contact a Program Director!
