

Transportation Plan Update Summary

Original Plan

4.14.21 Update

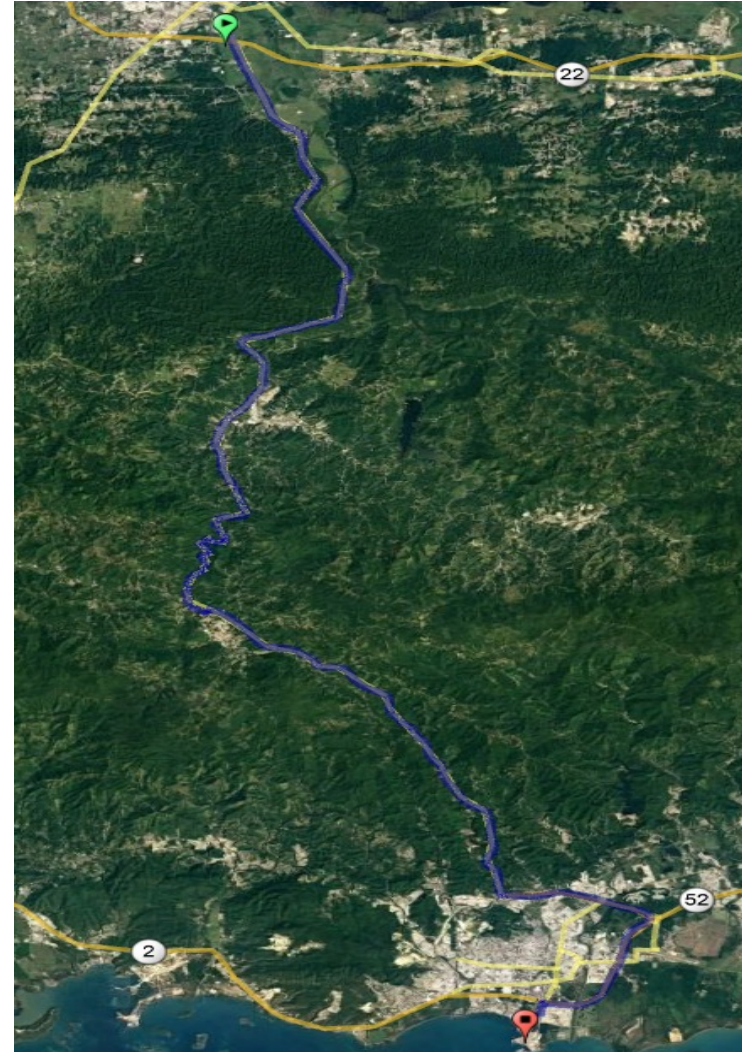

The original transportation plan intent was to outline route from Arecibo Observatory to PR-22. Once arriving in El Coto, the original plan had trucks turning left towards PR-129 & PR-22. With the selection of final destinations within Ponce, the updated transportation plan has these trucks turning right toward PR-10. The plan now outlines the use of PR-10/PR-123 to Ponce and the trucks final destinations.
