According to the latest data released by the National Science Board in its 2018 Science and Engineering Indicators report, the United States leads in a number of science and engineering (S&E) measures. For example, the U.S. invests the most in research and development, attracts the most venture capital, awards the most advanced degrees, and provides the most business, financial, and information services.

A state’s S&E performance helps fuel its and the nation’s economy. Four benchmarks of Oregon’s S&E performance are highlighted here: the cost of public higher education, the size of the STEM workforce, investment in research and development, and venture capital funding.

### Rising Cost of a Bachelor’s Degree

A bachelor’s degree is one of several entry points to higher paying jobs associated with science, engineering, and many technical occupations.

Nationally, 31% of the total U.S. workforce has a bachelor’s degree or higher. In contrast, 75% of workers in S&E occupations have a bachelor’s degree or higher.

**Average annual in-state cost of a public 4-year institution**

### STEM Workforce: People Working in STEM Occupations

Nationally, about 1 in 16 workers (6.2% or 8.7 million) have occupations as scientists or engineers (4.8%), or technical workers (1.4%). The STEM workforce is larger still when defined as either those who hold a bachelor’s degree or higher in S&E (23.2 million) or those who use technical expertise in S&E in their jobs (19.4 million).

**Jobs in S&E as a percent of all jobs in 2016**

- **Oregon**
  - Scientists/Engineers: 5.0%
  - Workers in Technical Occupations: 1.9%

- **U.S.**
  - Scientists/Engineers: 4.8%
  - Workers in Technical Occupations: 1.4%

Research and development (R&D) spending is a driver of innovation. Investing in science and technology today has ripple-effect benefits throughout the economy over the long term.

Annual state performance in R&D varies considerably, from $253 million (WY) to $125 billion (CA). Oregon is one of 15 states that performs between $5-$15 billion per year in R&D. In this figure, Oregon’s percent change in R&D spending is compared to the second highest state and the two lowest states within this group.

**Total 2015 Research and Development Performed**

**OR** $7.2B  
**U.S.** $495.1B

Venture capital investment supports U.S. businesses that take on the risk of developing and commercializing cutting-edge, emerging technologies. States with high values are successful at attracting venture capital to fuel new kinds of business, and ultimately, expand economic growth.

**Total 2016 Venture Capital Investment**

**OR** $272M  
**U.S.** $70.3B
