

Dr. Alan Arnold

AAAS Fellow

Division of Human Resource Development
Directorate for Education and Human Resources

Class of 2016-2017

An educator and researcher, Alan Arnold joined the Division of Human Resource Development within NSF's Directorate for Education and Human Resources in September 2016 as a Science and Technology Policy Fellow from the American Association for the Advancement of Science. He is focusing primarily on NSF's Alliances for Graduate Education and the Professoriate program. Alan has developed his mentoring and teaching skills in venues from New York City to rural China, and conducted his post-doctoral research at Fox Chase Cancer Center in Philadelphia. As a member of a research team at Fox Chase, he developed novel antibody chemotherapies. His doctoral work on drug discovery was completed at Wayne State University. As an undergraduate at Ferris State University, he studied the effects of near ultra-violet rays and oxidation. His interests include education, and the implementation of novel broadening participation activities. In his spare time, Alan enjoys outdoor activities such as snowboarding and any activity with his son and daughter.
