EPSCoR Research Fellows
Informational Webinar

March 3, 2022

Chinonye Nnakwe Whitley, Ph.D.
NSF Program Officer
cwhitley@nsf.gov
703-292-8458
Webinar Outline

- The NSF EPSCoR Program
- The EPSCoR Research Fellows Mechanism
- Proposal Content Overview and Requirements
- Merit Review Criteria
- Closing Remarks
The goal for today is to inform the community about the recently released EPSCoR Research Fellows solicitation.

Please use the links below to access the solicitation and resources to assist with proposal preparation:

- Solicitation: [Link](#)
- This pre-recorded webinar presentation and slides: [Link](#)
EPSCoR Research Fellows Outreach

- PIs are encouraged to attend the outreach events for questions regarding this opportunity.
  - Matching Events for RII Track-4:FAST Applicants:
    - Wednesday, March 9, 2022
    - Please use this link for information on future matching events: Link
  - Office hours at 3:00 PM ET on the dates below:
    - Thursday, March 10, 2022
    - Thursday, March 17, 2022
    - Thursday, March 24, 2022
    - Thursday, April 14, 2022
    - Thursday, April 21, 2022
- Please Submit questions in advance to cwhitley@nsf.gov
- While real time captioning will be available, requests for additional accommodations may be sent to cwhitley@nsf.gov 14 days in advance.
NSF EPSCoR: Building Jurisdiction-wide Research Capacity

Discovery & Innovation

Education & Workforce

Economic Development
**NSF EPSCoR FY22 Eligibility**

- **FY22 States, Commonwealths, and Territories** are eligible for funding if their most recent 5-year level of total NSF funding is equal to or less than 0.75% of the total NSF budget.

- Eligibility table updated annually and publicly available:

RII Track-4 EPSCoR Research Fellows Opportunity

• Solicitation Number: NSF 22-573; up to $300,000 over 2 years

• Provides opportunities for non-tenured (or equivalent) investigators to further develop their individual research potential through extended collaborative visits to the nation’s premier private, governmental, or academic research centers.

• Fellows will be able to:
  – learn new techniques,
  – benefit from access to state-of-the-art equipment and facilities
  – strengthen collaborative partnerships,
  – extend their research toward transformative directions

• Experiences gained through fellowships are intended to provide:
  – Time to develop new or extend current research directions.
  – A pathway to strengthen research connections with partners nationwide.
  – benefits that will impact the recipient’s career in years to come.

• These benefits to the Fellows are also expected to in turn enhance the research capacities of their institutions and jurisdictions.
• RII Track-4: NSF, host sites may be any research institution within the United States or its territories/possessions.
  – Generally expected to be beyond easy commuting distance from the home institution.
  – Any topic that NSF funds is eligible
RII Track-4: Fellows Advancing Science and Technology (FAST)

- RII Track-4: [FAST](#) is a collaboration between the NASA and NSF EPSCoR programs.
- With RII Track-4:FAST, host sites are selected NASA Research Centers
- Specific topics are eligible based on the NASA Research Center (links to these topics are available in the solicitation)
- Specific Institution types are eligible

- U.S. citizenship is required for research opportunities at specified NASA Centers.
- Lawful permanent residents are eligible for research opportunities at specified NASA Centers.
Planning to fund up to 10 proposals

Access to NASA facilities starting as early as Q1 2023

Teams can visit NASA facilities for 24 weeks during the two-year timeline

The NASA research collaborator also serves as mentor to the PI and Technical Monitor for the project; will provide site visits and annual reports.

U.S. citizenship is required for research opportunities at specified NASA Centers. Lawful permanent residents are eligible for research opportunities at specified NASA Centers.
The PI selects the trainee.

- Undergraduate and Graduate students
- Postdoctoral Researchers (RII Track-4: NSF only)
- Students from institutions within the PI’s EPSCoR jurisdiction
- Students from partnering institutions within any EPSCoR jurisdiction
RII Track-4: NSF Eligibility

- Institution of Higher Education
  - Long-term Non-tenure Track
  - Pre-Tenured, Tenure-Track

- Not-for-Profit Non-Degree-Granting Organization
  - Early-career, Career-Track Appointment

RII Track-4:FAST

RII Track-4: NSF
RII Track-4: FAST Eligibility

Institution of Higher Education

- MSIs
- Two-year colleges
- IHEs Primarily Serving Students with Disabilities
- Women's colleges
- PUIs
Proposal Submission Limits

• For RII Track-4: NSF there is an institutional limit of three proposals
• For RII Track-4: FAST there is an institutional limit of six proposals
  – Many submitting institutions are running internal competitions for these slots – check with them for details!
  – For submitting institutions eligible for both tracks the maximum number of submissions is nine proposals
What Goes in the Proposal?

• Successful RII Track-4 proposals will present exciting, vibrant fellowship ideas that will positively impact and potentially transform the PI’s individual career trajectory and more broadly impact his/her research field, institution, and jurisdiction.

• All proposals should include:
  – Motivation and research context for the work to be conducted;
  – Defined, reasoned, and organized research objectives which could be driven by specific research questions or hypotheses
  – PI’s specific plans for the fellowship period; and
  – Discussion for how the benefits gained from the fellowship would be sustained beyond the award;
  – Clear specifications of fellowship goals, performance metrics, and a timetable;

• Explain how/why the RII Track-4 award will advance the work – what specific opportunities will be made possible via the PI’s extended visit(s) to the host site?
  – The parameters for the partnership should be clearly established.

• Describe how the activities will lead to long-lasting impacts for both the PI’s career and the home institution/jurisdiction.
EPSCoR Research Fellows: Budget Request Overview

• For both tracks, NSF budget requests may be up to $300,000 over a duration of **24 months**
  – Up to 6 months of salary support for the PI and **one** trainee-level participant
  – Includes up to $75,000 in travel and living expenses for the PI and one trainee-level participant
  – Includes up to $10,000 (total) for fees, supplies, equipment, publication costs, *etc*
  – Includes up to $5,000 (total) for other research-related travel

• **For RII Track-4:FAST**, an additional $60K Research Infrastructure Development (RID) grant from NASA for research infrastructure at home institution is available
NASA Research Infrastructure Development Award

• From NASA: $60K RID award ($30K/year)
  – Only those with FAST award will get the extra 60K over two years performance period in addition to the NASA RID award

• NASA manages the process, please do not include in budget requests to NSF
  – Institutions will need to apply though the NASA EPSCoR Lead institution
  – Be sure to contact your NASA EPSCoR State Director: [Link](#)

• The RID augmentation applications follows the same rules, regulations and process as any other RID augmentation
• NASA will cover Technical Monitor travel for site visit
  – At least once during the research period maybe two depend on the both researchers (NASA and faculty)

• NASA will cover Professional Conference travel for the NASA mentor/Technical monitor
  – Encouragement to apply and summit peer review papers and co-present
Required Letters

Please provide all letters as supplementary documents

At least one letter is required in each of these three categories:

1. From the appropriate supervisory administrator at the PI's home institution.
   • Should confirm the institution's support of the PI's plans and particularly should verify that the PI will receive release time from other academic duties to complete the project as proposed.
   • Should also confirm the PI's employment status at the home institution as it pertains to eligibility for the RII Track-4 competition.

2. From the identified primary research collaborator(s) at the host site.
   • Should confirm the collaborator’s understanding of the goals of the fellowship and provide evidence to demonstrate that the PI will receive the support necessary to complete the proposed activities.
3. From the appropriate administrative managers at the host institution.
   • Should confirm that all necessary logistical arrangements (site access, office space, cyber connectivity) to ensure that the project can proceed as proposed.
   • In the rare cases where the PI believes the primary research collaborator at the host site is also the appropriate administrative manager, the PI should contact a program officer from NSF EPSCoR for guidance.

Additional Letters of Support from other parties may be submitted only if they are needed to verify specific tangible commitments related to activities described in the proposal. PIs will be required to remove letters that do not meet this standard.
4. Primarily Undergraduate Institutions (PUIs)

- For this category, a fourth letter, from an Authorized Organizational Representative, certifying that the originating and managing institution is an accredited college or university
  - that awards Associates degrees, Bachelor's degrees, and/or Master's degrees in NSF-supported fields,
  - and has awarded 20 or fewer PhD/DSci degrees in all NSF-supported fields during the combined previous two academic years

• Optional: PIs may also include a letter from their respective NASA EPSCoR State Director
  - Link to NASA EPSCoR State Director: https://www.nasa.gov/stem/epscor/home/EPSCoR_Directors.html
  - Assistance with processing paperwork
Merit Review Criteria

All NSF proposals are evaluated through use of two National Science Board approved merit review criteria.

- Intellectual Merit—the potential to advance knowledge
- Broader Impacts—the potential to benefit society and contribute to the achievement of specific, desired societal outcomes.

—From NSF PAPPG 22-1 Ch.III.A.2
Merit Review Criteria cont.

For each of these criteria, the following elements are considered as part of the merit review process:

1. What is the potential for the proposed activity to:
   a. Advance knowledge and understanding within its own field or across different fields (Intellectual Merit); and
   b. Benefit society or advance desired societal outcomes (Broader Impacts)?

2. To what extent do the proposed activities suggest and explore creative, original, or potentially transformative concepts?

3. Is the plan for carrying out the proposed activities well-reasoned, well-organized, and based on a sound rationale? Does the plan incorporate a mechanism to assess success?

4. How well qualified is the individual, team, or organization to conduct the proposed activities?

5. Are there adequate resources available to the PI (either at the home organization or through collaborations) to carry out the proposed activities?

—From NSF PAPPG 22-1 Ch.III.A.2
• Solicitation-Specific Criteria:

– What evidence is presented to demonstrate that the proposed research outcomes can be achieved within the constraints of the fellowship period, with the work being performed primarily at the host site?

– How will the fellowship have a transformative impact on the trajectory of the PI's research career both during the period of the award and beyond?

– How will the fellowship yield tangible benefits to the home institution and/or jurisdiction beyond the individual benefits to the PI?

– What evidence is there that the home institution and the host site are each committing the necessary resources, both scientific and administrative, to lend confidence that the fellowship project will be successful in achieving its intended outcomes?
What’s new in the solicitation?

• Updated Current and Pending Support Forms

• Proposals may only be submitted Through Research.Gov
  – Additional information including Frequently Asked Questions, video tutorials, and how-to guides is available on this Research.gov “About Proposal Preparation and Submission” page: https://www.research.gov/research-web/content/aboutpsm
Frequently Asked Questions

- Eligibility in Relation to the Solicitation Deadline
- Providing Research Context
- Travel to Other Sites
- Program Designation in the Project Summary
- Federal Laboratory Facility Access
- Reasonable Fellowship Distance
- Reasonable Fellowship Duration
Contact information

• National Science Foundation:
  ▪ Chinonye Nnakwe Whitley, NSF, telephone: (703) 292-8458, email: cwhitley@nsf.gov
  ▪ Jose Colom-Ustariz, NSF, telephone: (703) 292-7088, email: jcolom@nsf.gov
  ▪ Subrata Acharya, NSF, telephone: (703) 292-2451, email: acharyas@nsf.gov

• National Aeronautics and Space Administration:
  ▪ Jeppie Compton, NASA, telephone: (321) 867-6988, email: jeppie.r.compton@nasa.gov
  ▪ Ali Shaykhian, NASA, telephone: (321) 289-0512, email: ali.shaykhian@nasa.gov
  ▪ Constance Meadors, NASA, telephone: (501) 500-3823, email: constance.y.meadors@nasa.gov

• Please consult the NSF EPSCoR Website for information on Office Hours and Matching Events to be hosted in March and April 2022.
Steps to a successful application:

1. Consult with your sponsored research office regarding internal competitions

2. Identify a collaborator at a host site or NASA Center*
   * For RII Track-4:FAST: Review the research areas in the solicitation

3. Write the proposal narrative and obtain letter(s) of support

4. Contact NSF and NASA POC regarding questions

5. Submit your proposal through Research.gov**
Thank you!
