

# EPSCoR OUTREACH

LIZ LAWRENCE

# Prior Recent Outreach

- June, 2018: EICC at the NIH NISBRE Symposium, DC
- Aug, 2018: NRP Workshop: Building a National Big Data Superhighway, Montana
- Aug, 2018: NSF Day in New Mexico
- Nov, 2018: SBE SciSip Program, Delaware
- April, 2019: EPSCoR Regional Outreach, Alabama

# Requesting EPSCoR Outreach

[https://www.nsf.gov/od/oia/programs/epscor/FY2019\\_Outreach\\_Procedures.pdf](https://www.nsf.gov/od/oia/programs/epscor/FY2019_Outreach_Procedures.pdf)

**ESTABLISHED PROGRAM TO STIMULATE COMPETITIVE RESEARCH:  
OUTREACH INVESTMENT STRATEGY  
(JURISDICTIONAL PROCEDURES FOR REQUESTING NSF OUTREACH VISITS)**

**A. Goals and Objectives**

As part of its investment strategy to strengthen the academic research competitiveness of EPSCoR jurisdictions and advance discovery in science, technology, engineering and mathematics (STEM), NSF EPSCoR provides travel support to eligible NSF staff to participate in STEM events organized by EPSCoR jurisdictions. Outreach activities enable NSF staff from all Directorates and Offices to inform EPSCoR community regarding funding opportunities, priorities, programs, and policies. Such travel also serves to more fully acquaint NSF staff with the science and engineering research accomplishments, investigator expertise/potential, and new directions in research and education within EPSCoR jurisdictions.

*Webinars with cognizant Program Officers are also available upon request*

# Requests Must Include:

- the purpose of the requested outreach visit;
- the number of anticipated attendees/participants;
- suggested NSF program and specific Directorate/Division/Office;
- NSF Staff role and expected presentations at the jurisdictional/institutional event; and
- draft agenda of the event, if available.

*Requests should be sent at least 60 days prior to the proposed event*

# Thank-you
