CLOSEOUT MEMORANDUM

Case Number: A-09070060

Page 1 of 1

We received a series of allegations¹ regarding the subject,² a PI on several NSF proposals.³ The allegations focused on apparent misstatements and inaccuracies in the subject's NSF proposals.

In order to fully evaluate the apparent problems, we wrote to the subject to obtain specific information regarding his biosketches and publication record. After receiving and reviewing the information the subject provided, as well as other information we collected,⁴ we determined that the subject had not materially misrepresented any information in the proposals. However, in closing out this matter, we sent the subject a letter setting forth the concerns raised, and strongly suggesting that he take care to ensure that any future proposals are complete and accurate.
