NSF Workforce Challenges- BFA Strategic Priorities

This is a follow up discussion of the presentation at the Fall 2012 meeting. Office of Budget, Finance and Award Management is analyzing three strategic priorities that arose from a BFA-wide review of core processes, resource alignment and key functions. Staff identified the three priorities as critical steps toward organizational transformation and BFA seeks Committee input: (1) using risk assessment to prioritize operations; (2) reducing duplication among divisions; and (3) creating a SWAT team of staff with particular skills to address critical projects/needs as a professional development opportunity.
