Science, Technology, Engineering, and Mathematics Talent Expansion Program (STEP)

Program Solicitation
NSF 06-502

Replaces Document (s):
NSF 05-519

National Science Foundation
Directorate for Education and Human Resources
Division of Undergraduate Education

Letter of Intent Due Date(s) (optional):

January 05, 2006
(Type 1 proposals only)

August 15, 2006
(Type 1 and Type 2 proposals)

Full Proposal Deadline(s) (due by 5 p.m. proposer's local time):

February 09, 2006
(Type 1 proposals only)

September 26, 2006
(Type 1 and Type 2 proposals)

REVISION NOTES

In furtherance of the President's Management Agenda, in Fiscal Year 2006, NSF has identified programs that will offer proposers the option to utilize Grants.gov to prepare and submit proposals, or will require that proposers utilize Grants.gov to prepare and submit proposals. Grants.gov provides a single Government-wide portal for finding and applying for Federal grants online.

In response to this program solicitation, proposers may opt to submit proposals via Grants.gov or via the NSF FastLane system. In determining which method to utilize in the electronic preparation and submission of the proposal, please note the following:

Collaborative Proposals. All collaborative proposals submitted as separate submissions from multiple organizations must be submitted via the NSF FastLane system. Chapter II, Section D.3 of the Grant Proposal Guide provides additional information on collaborative proposals.

For FY 2006 the deadline for STEP remains in early February, but only Type 1 proposals will be accepted. No Type 2 awards will be made in FY 2006.
For FY 2007 the deadline has been moved earlier in the fiscal year, to September 26, 2006. Both Type 1 and Type 2 proposals will be accepted in September 2006 for FY 2007.

After FY 2007 the STEP deadline is expected to remain in early Fall, but proposals will be requested under a new program solicitation.

### SUMMARY OF PROGRAM REQUIREMENTS

#### General Information

**Program Title:**

Science, Technology, Engineering, and Mathematics Talent Expansion Program (STEP)

**Synopsis of Program:**

The Science, Technology, Engineering, and Mathematics Talent Expansion Program (STEP) seeks to increase the number of students (U.S. citizens or permanent residents) receiving associate or baccalaureate degrees in established or emerging fields within science, technology, engineering, and mathematics (STEM). Type 1 proposals are solicited that provide for full implementation efforts at academic institutions. Type 2 proposals are solicited that support educational research projects on associate or baccalaureate degree attainment in STEM.

**Cognizant Program Officer(s):**

- Susan H. Hixson, Lead Program Director, 835 N, telephone: (703) 292-4623, fax: (703) 292-9015, email: shixson@nsf.gov
- John R. Haddock, Co-Lead Program Director, 835 N, telephone: (703) 292-4620, email: jhaddock@nsf.gov
- Susan L. Burkett, Program Director, 835 N, telephone: (703) 292-4629, fax: (703) 292-9015, email: sburkett@nsf.gov
- Daniel Litynski, Program Director, 835 N, telephone: (703) 292-8670, fax: (703) 292-9015, email: dlitynsk@nsf.gov
- Elizabeth J. Teles, Program Director, 835 N, telephone: (703) 292-8670, fax: (703) 292-9015, email: ejteles@nsf.gov
- Harry G. Ungar, Program Director, 835 N, telephone: (703) 292-4647, fax: (703) 292-9015, email: hungar@nsf.gov
- Bevlee A. Watford, Program Director, 835 N, telephone: (703) 292-5323, fax: (703) 292-9015, email: bwatford@nsf.gov
- Terry S. Woodin, Program Director, 835 N, telephone: (703) 292-4657, fax: (703) 292-9090, email: twoodin@nsf.gov

**Applicable Catalog of Federal Domestic Assistance (CFDA) Number(s):**

- 47.076 --- Education and Human Resources

#### Award Information

**Anticipated Type of Award:** Standard Grant or Continuing Grant

**Estimated Number of Awards:** 15 to 20 Type 1 awards (and no Type 2 awards) in FY 2006. 15-20 Type 1 awards and 1-3...
Type 2 awards in FY 2007.

**Anticipated Funding Amount:** $25,000,000 in both FY 2006 and FY 2007 subject to availability of funds.

### Eligibility Information

#### Organization Limit:

Proposals may only be submitted by the following:

- Type 1 proposals are invited from academic institutions in the United States and its territories, from consortia thereof, or from nonprofit organizations that have established consortia among such academic institutions. The academic institutions must offer either associate degrees or baccalaureate degrees in science, technology, engineering and/or mathematics (STEM). Associate degree-granting institutions with a demonstrated record of articulation to STEM baccalaureate programs need not necessarily grant associate degrees in STEM fields in order to be eligible for this program.

Projects may involve a single institution, collaboration with business and industrial partners, or collaboration among several institutions. For example, projects may include collaborative efforts that improve the transition of students among the collaborating institutions, such as transfer between two- and four-year institutions.

Type 2 proposals are invited from any individual or organization eligible to submit proposals to the NSF.

#### PI Limit:

None Specified

#### Limit on Number of Proposals per Organization:

An institution is allowed to submit only one Type 1 proposal, or to be part of only one consortium submitting a Type 1 proposal. There are no restrictions on the number of Type 2 proposals that an individual or organization may submit.

#### Limit on Number of Proposals per PI:

None Specified

### Proposal Preparation and Submission Instructions

#### A. Proposal Preparation Instructions

- **Letters of Intent:** Submission of Letters of Intent is optional. Please see the full text of this solicitation for further information.

- Full proposals submitted via FastLane:
  - Grant Proposal Guide (GPG) Guidelines apply

- Full proposals submitted via Grants.gov:
B. Budgetary Information

**Cost Sharing Requirements**: Cost Sharing is not required by NSF.

**Indirect Cost (F&A) Limitations**: Not Applicable

**Other Budgetary Limitations**: Other budgetary limitations apply. Please see the full text of this announcement for further information.

C. Due Dates

**Letter of Intent Due Date(s) (optional)**:

January 05, 2006

(Type 1 proposals only)

August 15, 2006

(Type 1 and Type 2 proposals)

**Full Proposal Deadline(s) (due by 5 p.m. proposer's local time)**:

February 09, 2006

(Type 1 proposals only)

September 26, 2006

(Type 1 and Type 2 proposals)

**Proposal Review Information Criteria**

**Merit Review Criteria**: National Science Board approved criteria. Additional merit review considerations apply. Please see the full text of this announcement for further information.

**Award Administration Information**

**Award Conditions**: Standard NSF award conditions apply

**Reporting Requirements**: Additional reporting requirements apply. Please see the full text of this announcement for further information.

TABLE OF CONTENTS

**Summary of Program Requirements**

**Introduction**

**Program Description**
I. INTRODUCTION

Undergraduate education is central to the National Science Foundation's mission in human resource development. Whether preparing students to participate as citizens in a technological society, to enter the workforce with two- or four-year degrees, to continue their formal education in graduate school, or to further their education in response to new career goals or workplace expectations, undergraduate education provides the critical link between the Nation's secondary schools and a society increasingly dependent upon science and technology. Increasing the number of undergraduate students obtaining degrees in science, technology, engineering, and mathematics (STEM) fields will provide a workforce that is prepared to ensure a healthy economy, respond to demands for national security, and maintain and elevate the quality of life and standard of living in the United States through technological and scientific advancements. A Report from the National Science Board (NSB 03-69), "The Science and Engineering Workforce Realizing America's Potential," recommends that in order to ensure the country's capacity in science and engineering in an increasingly competitive and changing global labor market, "The Federal Government and its agencies must step forward to ensure the adequacy of the US science and engineering workforce. All stakeholders must mobilize and initiate efforts that increase the number of US citizens pursuing science and engineering studies and careers." The Report further recommends that it is essential "to improve success in science and engineering study by American undergraduates from all demographic groups."

II. PROGRAM DESCRIPTION

Type 1

Program activities under the Type 1 STEP competition should be efforts aimed at implementing strategies that will lead to an increase in the number of students (United States citizens or permanent residents) obtaining STEM degrees at institutions with baccalaureate degree programs; or completing associate degrees in STEM fields or completing credits toward transfer to a baccalaureate degree program in STEM fields at community colleges. The goal of the project must be to increase the total graduation numbers of such students at the institution(s), and all STEP proposals must include specific numerical
targets for these increases. If a project focuses efforts on only a subset of STEM fields, increases in those fields must not be at the expense of degrees in other STEM fields. Projects may focus on the retention and/or recruitment of undergraduate students into STEM fields. Projects should consider the importance of attention to broadening the participation of all sectors of the student population in STEM. Outreach efforts are appropriate only if the efforts can be expected to result in additional STEM majors and graduates at the submitting institution(s) within the grant period.

Project efforts might utilize, for example, one or more of the following:

Programs that focus directly on the quality of student learning, including those that encourage (a) high-caliber teaching, including enabling faculty to spend additional time teaching participating students in smaller class settings, particularly in the laboratory environment; (b) opportunities to implement new pedagogical approaches including the implementation of web-based course strategies, distributed and collaborative digital teaching tools, or interactive course modules; and (c) training of teaching assistants;

Programs that expand the capacity of institutions of higher education to incorporate current advances in science and technology into the undergraduate learning environment;

Programs including interdisciplinary approaches to undergraduate STEM education;

Bridge programs that enable students at community colleges to matriculate directly into baccalaureate STEM programs, including those bridge programs targeted at traditionally underrepresented groups in such disciplines;

Programs among collaborating academic institutions designed to increase the number of pathways available for achieving a degree in STEM, or to improve the articulation among programs at the institutions;

Programs, such as mentoring programs, that aim to increase the number of traditionally underrepresented students (low-income, ethnic and racial minorities, persons with disabilities, and women) specifically in STEM undergraduate majors;

Programs that (a) facilitate student exposure to potential careers, including cooperative programs with industry or government that place students in internships as early as the summer following their first year of study; (b) provide part-time employment in industry during the school year; or (c) provide opportunities for undergraduates to participate in industry or government sponsored research;

Programs to encourage undergraduate research on- or off-campus;

Programs that assist institutions of higher education in states that participate in the Experimental Program to Stimulate Competitive Research (EPSCoR) to broaden the STEM student base or increase retention in these fields;

Programs that provide financial incentives to students entering and persisting in the study of STEM; or

Other approaches to achieving program goals.

The outcomes expected of funded Type 1 STEP projects include all of the following:

Significant progress toward achieving the specific increases proposed in the number of students who are United States citizens or permanent residents obtaining STEM degrees at institutions with baccalaureate degree programs; or completing associate degrees or completing credits toward transfer to a baccalaureate degree program in STEM fields at community colleges;

A description of the activities that have been institutionalized as a result of the project;

A description of the expectations, following the end of the grant period, for continued efforts at the institution to increase the number of STEM degrees in established or emerging fields at institutions with baccalaureate degree programs; or completing associate degrees in established or emerging fields or completing credits toward transfer to a baccalaureate degree program in STEM fields at community colleges;

An evaluation, using the benchmarks defined in the proposal, that informs the institution and others of the progress and findings of the grant project; and

Effective dissemination of project processes and results to the broader community.
All Type 1 grants will be reviewed during their third year to determine whether satisfactory progress has been made, with continued funding contingent on the result of the third-year review.

In addition to the individual project evaluation, Principal Investigators will be required to participate in evaluation activities related to the Directorate for Education and Human Resource’s program monitoring and program evaluation.

Type 2

Program activities under the Type 2 STEP competition represent educational research on factors affecting associate or baccalaureate degree attainment in STEM. The results are expected to contribute to the knowledge base of scholarly research in education. Proposals of up to $500,000 annually (one-, two- or three-year awards) for projects should be based in a research design that incorporates appropriate and proven methodologies and strategies. The proposal should identify the research questions, and the results should provide convincing evidence of the relationship of the factor(s) (including departmental/institutional) studied to the issues of associate and/or baccalaureate degree attainment, and/or undergraduate access to STEM careers, and/or persistence to STEM graduate study. These educational research studies should reflect explicit cognizance of the broad variety of institutions of higher education, and should address the unique challenges and opportunities posed by that variety. The proposed research should be developed with the intent to provide the education community, including faculty, administrators, policymakers, and parents, with practical information to consider with respect to the impact of the factor(s) being studied within the educational system. The results should enable the education community to guide better the future development of learning experiences, and to foster the retention and academic success of diverse students in STEM. Faculty in STEM disciplines are strongly encouraged to collaborate with appropriate experts in educational research when developing a Type 2 proposal.

Note that broader research opportunities in student learning and student academic success are eligible for support under the Research on Learning and Education (ROLE) Program. http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5709&org=REC

The outcomes expected of funded Type 2 STEP projects include all of the following:

Evidence concerning an important factor(s) and its role(s) in associate and/or baccalaureate degree attainment, and/or undergraduate access to STEM careers, and/or persistence to STEM graduate study;

Practical information useful to educators about the impact of the factor(s) that has been studied within the educational system; and

Dissemination of the research results to the education community.

III. AWARD INFORMATION

The number and size of awards will depend on the quality of the proposals received and the availability of funds.

Type 1

Grant duration for Type 1 awards is expected to be 5 years, with the final 2 years of funding contingent on determination that satisfactory progress has been made by the awardee during the first 3 years. Institutions are eligible to apply for funds based on their total enrollments of undergraduate students (full-time equivalents). Institutions enrolling 5,000 or fewer undergraduate students may request up to a total of $500,000 for a period of five years, those enrolling between 5000 and 15,000 undergraduate students may request up to a total of $1.0 million for up to five years, and those enrolling more than 15,000 undergraduate students may request up to a total of $2.0 million for up to five years. Consortia of institutions are eligible to request funds within these limits based on their total, combined undergraduate enrollment. Such consortial requests must provide clear evidence that the proposed partnership is both meaningful and important to the success of the project. Awards will be made as standard or continuing grants. The expectation is that about 15 to 20 Type 1 awards will be made in FY 2006 and in FY 2007.

Type 2

Grant duration for Type 2 awards is 1 to 3 years, and the request may be up to $500,000 per year. Type 2 proposals are exempt from the restriction on Type 1 proposals limiting an institution to participation in only one submission. The expectation
is that no Type 2 awards will be made in FY 2006, and 1 to 3 Type 2 awards will be made in FY 2007.

IV. ELIGIBILITY INFORMATION

Organization Limit:

Proposals may only be submitted by the following:

- Type 1 proposals are invited from academic institutions in the United States and its territories, from consortia thereof, or from nonprofit organizations that have established consortia among such academic institutions. The academic institutions must offer either associate degrees or baccalaureate degrees in science, technology, engineering and/or mathematics (STEM). Associate degree-granting institutions with a demonstrated record of articulation to STEM baccalaureate programs need not necessarily grant associate degrees in STEM fields in order to be eligible for this program.

Projects may involve a single institution, collaboration with business and industrial partners, or collaboration among several institutions. For example, projects may include collaborative efforts that improve the transition of students among the collaborating institutions, such as transfer between two- and four-year institutions.

Type 2 proposals are invited from any individual or organization eligible to submit proposals to the NSF.

PI Limit:

None Specified

Limit on Number of Proposals per Organization:

An institution is allowed to submit only one Type 1 proposal, or to be part of only one consortium submitting a Type 1 proposal. There are no restrictions on the number of Type 2 proposals that an individual or organization may submit.

Limit on Number of Proposals per PI:

None Specified

Additional Eligibility Info:

Type 1 proposals are invited from academic institutions in the United States and its territories, from consortia thereof, or from nonprofit organizations that have established consortia among such academic institutions. The academic institutions must offer either associate degrees or baccalaureate degrees in science, technology, engineering and/or mathematics (STEM). Associate degree-granting institutions with a demonstrated record of articulation to STEM baccalaureate programs need not necessarily grant associate degrees in STEM fields in order to be eligible for this program.

Projects may involve a single institution, collaboration with business and industrial partners, or collaboration among several institutions. For example, projects may include collaborative efforts that improve the transition of students among the collaborating institutions, such as transfer between two- and four-year institutions.

An institution is allowed to submit only one Type 1 proposal, or to be part of only one consortium submitting a Type 1 proposal.

Type 2 proposals are invited from any individual or organization eligible to submit proposals to the NSF. There are no restrictions on the number of Type 2 proposals that an individual or organization may submit.
A. Proposal Preparation Instructions

Letters of Intent (optional): A letter of intent is optional but encouraged before submitting either a Type 1 or Type 2 proposal. Letters of intent should be prepared and submitted via FastLane. Please note that NSF will not comment on the Synopsis text, so do not include questions within that section. You must answer the question asking whether the project is a Type 1 or a Type 2, and you must list all participating organizations (partners) that are likely to participate in your project in the space asking for this information.

Letter of Intent Management Conditions:

When submitting a Letter of Intent through FastLane in response to this Program Solicitation please note the conditions outlined below:

SPO Submission is Required when submitting Letters of Intent

A Minimum of 0 and Maximum of 50 Other Participating Organizations are allowed

(REQUIRED) Is your submission for a Type 1 or a Type 2 project? is Required when submitting Letters of Intent

Submission of multiple Letters of Intent are Not allowed

Full Proposal Instructions: Proposers may opt to submit proposals in response to this Program Solicitation via Grants.gov or via the NSF FastLane system.

Full proposals submitted via FastLane: Proposals submitted in response to this program solicitation should be prepared and submitted in accordance with the general guidelines contained in the NSF Grant Proposal Guide (GPG). The complete text of the GPG is available electronically on the NSF website at: http://www.nsf.gov/publications/pub_summ.jsp?ods_key=gpg. Paper copies of the GPG may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-7827 or by e-mail from pubs@nsf.gov. Proposers are reminded to identify this program solicitation number in the program solicitation block on the NSF Cover Sheet For Proposal to the National Science Foundation. Compliance with this requirement is critical to determining the relevant proposal processing guidelines. Failure to submit this information may delay processing.

Full proposals submitted via Grants.gov: Proposals submitted in response to this program solicitation via Grants.gov should be prepared and submitted in accordance with the NSF Grants.gov Application Guide: A Guide for the Preparation and Submission of NSF Applications via Grants.gov. The complete text of the NSF Grants.gov Application Guide is available on the Grants.gov website and on the NSF website at: (http://www.nsf.gov/bfa/dias/policy/docs/grantsgovguide.pdf). To obtain copies of the Application Guide and Application Forms Package, click on the Apply tab on the Grants.gov site, then click on the Apply Step 1: Download a Grant Application Package and Application Instructions link and enter the funding opportunity number, (the program solicitation number without the NSF prefix) and press the Download Package button. Paper copies of the Grants.gov Application Guide also may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-7827 or by e-mail from pubs@nsf.gov.

In determining which method to utilize in the electronic preparation and submission of the proposal, please note the following:

Collaborative Proposals. All collaborative proposals submitted as separate submissions from multiple organizations must be submitted via the NSF FastLane system. Chapter II, Section D.3 of the Grant Proposal Guide provides additional information on collaborative proposals.

The following instructions supplement the GPG guidelines:

Cover Sheet

For Type 1 proposals, the signature of the Authorized Organizational Representative (AOR) on the Cover Sheet signifies that the proposer and all partner organizations understand and agree to the following statement: The AOR of each organization involved in this proposal is aware of this submission.
Project Description

In addition to describing the proposed activities, Type 1 proposals are expected to include within the 15 pages of the Project Description:

The current undergraduate STEM enrollment and graduation figures at each institution(s), and the total undergraduate student enrollment at each institution(s);

A clearly stated summary of the increases expected during the five-year grant period in the number of students who are United States citizens or permanent residents obtaining STEM degrees at institutions with baccalaureate degree programs; or completing associate degrees or completing credits toward transfer to a baccalaureate degree program in STEM fields at community colleges;

The reasons that working toward an increase in the number of students graduating in STEM areas is compatible with the institution’s mission;

A description of prior efforts to increase interest in STEM and results of those efforts;

A statement of the overall vision that underlies the institution’s management and implementation plan to increase the numbers of students graduating in STEM areas;

The specific strategies to be used during the grant period to increase the number of students graduating in STEM fields, with rationales and justifications for these efforts;

An explanation of why the proposed activities are not expected to cause decreases in the enrollments in other STEM fields, should the project activities focus on only a subset of STEM fields;

A clear statement of which of the proposed activities, if successful, would be expected to be institutionalized by the end of the grant period, and of which of the proposed activities, if successful, would require further sources of support in order to be continued; and

The benchmarks that will be used to measure progress as the project moves forward.

The National Science Foundation allows maximum flexibility in the design of efforts to increase the number of students receiving associate or baccalaureate degrees in established or emerging fields within STEM fields. However, the Type 1 proposal must fully document the rationales for choosing the efforts to be undertaken, including relevant results from efforts that have been undertaken at other institutions in the past. The emphasis in the proposal should be on the adaptation and implementation of best practices. The relevant research or knowledge base that supports the effectiveness of the efforts should be included, when appropriate. If innovative strategies are proposed, the proposal should include compelling arguments for why these strategies are expected to result in an increase in the number of students earning associate or bachelor degrees in STEM. Funded Type 1 projects will be expected to establish an internal Advisory Committee, chaired by the Chief Academic Officer (or other appropriate administrative officer should the Chief Academic Officer be a PI or co-PI on the project) at the institution, with members drawn from disciplines across the STEM fields. This committee is expected to meet with project personnel at least once every six months throughout the grant period in order to provide advice to the project, and to facilitate dissemination about the project throughout the institution(s). The members of this internal Advisory Committee should be specified in the proposal. In addition, funded Type 1 and Type 2 proposals will be expected to establish an external Advisory Committee of three to four members from outside the project institution(s). This committee is expected to meet with project personnel within three months of the start of the project and then at yearly intervals in order to provide advice to the project. The members of the external Advisory Committee need not be specified in the proposal but can be named at the time that a project is recommended for funding.

Additional Instructions

A Project Data Form must be submitted (via FastLane) as part of all Type 1 and Type 2 proposals. The information on this form is used to direct proposals to appropriate reviewers and to determine the characteristics of projects supported by the Division of Undergraduate Education. In FastLane, this form will show up in the list of forms for your proposal only after you have (1) selected the “STEP” program announcement/solicitation number on the Cover Sheet and (2) saved the Cover Sheet.

An institution is allowed to submit only one Type 1 proposal, or to be part of only one consortium submitting a Type 1 proposal. There are no restrictions on the number of Type 2 proposals that an individual or organization may submit.
B. Budgetary Information

**Cost Sharing:** Cost sharing is not required by NSF in proposals submitted under this Program Solicitation.

**Other Budgetary Limitations:**

Grant duration is expected to be 5 years for Type 1 proposals, and 1-3 years for Type 2 proposals.

For Type 1 proposals, institutions are eligible to apply for funds based on their total enrollment of undergraduate students (full-time equivalents). Institutions enrolling 5,000 or fewer undergraduate students may request up to a total of $500,000 for a period of five years; those enrolling between 5,000 and 15,000 undergraduate students may request up to a total of $1.0 million for five years; and those enrolling more than 15,000 undergraduate students may request up to a total of $2.0 million for five years. Consortia of institutions are eligible to request funds within these limits based on their total, combined undergraduate enrollment.

For Type 2 proposals, individuals or organizations are eligible to request up to $500,000 per year.

For both Type 1 and Type 2 proposals, the budget should include provisions for the Principal Investigators and several additional project personnel to attend an annual meeting of STEP Principal Investigators in the Washington, DC, area.

C. Due Dates

- **Letter of Intent Due Date(s) (optional):**
  - January 05, 2006  
    (Type 1 proposals only)
  - August 15, 2006  
    (Type 1 and Type 2 proposals)

- **Full Proposal Deadline(s) (due by 5 p.m. proposer's local time):**
  - February 09, 2006  
    (Type 1 proposals only)
  - September 26, 2006  
    (Type 1 and Type 2 proposals)

D. FastLane/Grants.gov Requirements

- **For Proposals Submitted Via FastLane:**
  
  Detailed technical instructions for proposal preparation and submission via FastLane are available at: [https://www.fastlane.nsf.gov/a1/newstan.htm](https://www.fastlane.nsf.gov/a1/newstan.htm). For FastLane user support, call the FastLane Help Desk at 1-800-673-6188 or e-mail fastlane@nsf.gov. The FastLane Help Desk answers general technical questions related to the use of the FastLane system. Specific questions related to this program solicitation should be referred to the NSF program staff contact(s) listed in Section VIII of this solicitation.

  **Submission of Electronically Signed Cover Sheets.** The Authorized Organizational Representative (AOR) must electronically sign the proposal Cover Sheet to submit the required proposal certifications (see Chapter II, Section C of the Grant Proposal Guide for a listing of the certifications). The AOR must provide the required electronic certifications within five working days following the electronic submission of the proposal. Proposers are no longer required to provide a paper copy of the signed Proposal Cover Sheet to
For Proposals Submitted Via Grants.gov:

Before using Grants.gov for the first time, each organization must register to create an institutional profile. Once registered, the applicant's organization can then apply for any federal grant on the Grants.gov website. The Grants.gov's Grant Community User Guide is a comprehensive reference document that provides technical information about Grants.gov. Proposers can download the User Guide as a Microsoft Word document or as a PDF document. The Grants.gov User Guide is available at: http://www.grants.gov/CustomerSupport. In addition, the NSF Grants.gov Application Guide provides additional technical guidance regarding preparation of proposals via Grants.gov. For Grants.gov user support, contact the Grants.gov Contact Center at 1-800-518-4726 or by email: support@grants.gov. The Grants.gov Contact Center answers general technical questions related to the use of Grants.gov. Specific questions related to this program solicitation should be referred to the NSF program staff contact(s) listed in Section VIII of this solicitation.

Submitting the Proposal: Once all documents have been completed, the Authorized Organizational Representative (AOR) must submit the application to Grants.gov and verify the desired funding opportunity and agency to which the application is submitted. The AOR must then sign and submit the application to Grants.gov. The completed application will be transferred to the NSF FastLane system for further processing.

VI. NSF PROPOSAL PROCESSING AND REVIEW PROCEDURES

Proposals received by NSF are assigned to the appropriate NSF program and, if they meet NSF proposal preparation requirements, for review. All proposals are carefully reviewed by a scientist, engineer, or educator serving as an NSF Program Officer, and usually by three to ten other persons outside NSF who are experts in the particular fields represented by the proposal. These reviewers are selected by Program Officers charged with the oversight of the review process. Proposers are invited to suggest names of persons they believe are especially well qualified to review the proposal and/or persons they would prefer not review the proposal. These suggestions may serve as one source in the reviewer selection process at the Program Officer's discretion. Submission of such names, however, is optional. Care is taken to ensure that reviewers have no conflicts with the proposer.

A. NSF Merit Review Criteria

All NSF proposals are evaluated through use of the two National Science Board (NSB)-approved merit review criteria: intellectual merit and the broader impacts of the proposed effort. In some instances, however, NSF will employ additional criteria as required to highlight the specific objectives of certain programs and activities.

The two NSB-approved merit review criteria are listed below. The criteria include considerations that help define them. These considerations are suggestions and not all will apply to any given proposal. While proposers must address both merit review criteria, reviewers will be asked to address only those considerations that are relevant to the proposal being considered and for which the reviewer is qualified to make judgements.

What is the intellectual merit of the proposed activity?
How important is the proposed activity to advancing knowledge and understanding within its own field or across different fields? How well qualified is the proposer (individual or team) to conduct the project? (If appropriate, the reviewer will comment on the quality of the prior work.) To what extent does the proposed activity suggest and explore creative and original concepts? How well conceived and organized is the proposed activity? Is there sufficient access to resources?

What are the broader impacts of the proposed activity?
How well does the activity advance discovery and understanding while promoting teaching, training, and learning? How well does the proposed activity broaden the participation of underrepresented groups (e.g., gender, ethnicity, disability, geographic, etc.)? To what extent will it enhance the infrastructure for research and education, such as facilities, instrumentation, networks, and partnerships? Will the results be disseminated broadly to enhance scientific and technological understanding? What may be the benefits of the proposed activity to society?
NSF staff will give careful consideration to the following in making funding decisions:

**Integration of Research and Education**

One of the principal strategies in support of NSF’s goals is to foster integration of research and education through the programs, projects, and activities it supports at academic and research institutions. These institutions provide abundant opportunities where individuals may concurrently assume responsibilities as researchers, educators, and students and where all can engage in joint efforts that infuse education with the excitement of discovery and enrich research through the diversity of learning perspectives.

**Integrating Diversity into NSF Programs, Projects, and Activities**

Broadening opportunities and enabling the participation of all citizens -- women and men, underrepresented minorities, and persons with disabilities -- is essential to the health and vitality of science and engineering. NSF is committed to this principle of diversity and deems it central to the programs, projects, and activities it considers and supports.

**Additional Review Criteria:**

In considering the above criteria for Type 1 proposals, reviewers will be asked to comment on the following:

- Does the projected increase in STEM graduates appear aligned with the mission of the institution(s) and the design of the project?
- Is a compelling overall vision provided for the plan of the institution(s) to achieve a substantial increase in STEM graduates, and is the proposed effort important to the attainment of that vision?
- Is strong justification provided to indicate that the proposed efforts are likely to be successful?
- Do the management and implementation details provide appropriate support for the proposed project?
- Are the proposed efforts likely to lead to an increase in the total number of STEM graduates, as opposed to causing an increase in one or a few STEM fields while allowing for a decrease in other STEM fields?
- Are incremental benchmarks for progress toward achieving the proposed increases reasonable and clearly delineated?
- Are clear statements provided elaborating which of the proposed activities are likely to be institutionalized by the end of the grant period, and which of the proposed activities would require further sources of support in order to be continued?

In considering the above criteria for Type 2 proposals, reviewers will be asked to comment on the following:

- Does the proposal identify a significant factor(s) in facilitating associate and/or baccalaureate degree attainment, and/or undergraduate access to STEM careers, and/or persistence to STEM graduate study, and are the proposed efforts likely to lead to significant findings?
- Is the study likely to provide practical information useful to educators about the potential impact of the factor(s) being studied?
- How likely is the dissemination plan to inform all parts of the education community of important results from the project?

**B. Review and Selection Process**

Proposals submitted in response to this program solicitation will be reviewed by Proposals submitted in response to this announcement/solicitation will be reviewed by Mail and/or Pa.

Reviewers will be asked to formulate a recommendation to either support or decline each proposal. The Program Officer assigned to manage the proposal's review will consider the advice of reviewers and will formulate a recommendation.

After scientific, technical and programmatic review and consideration of appropriate factors, the NSF Program Officer recommends to the cognizant Division Director whether the proposal should be declined or recommended for award. NSF is striving to be able to tell applicants whether their proposals have been declined or recommended for funding within six months. The time interval begins on the date of receipt. The interval ends when the Division Director accepts the Program Officer's recommendation.

A summary rating and accompanying narrative will be completed and submitted by each reviewer. In all cases, reviews are treated as confidential documents. Verbatim copies of reviews, excluding the names of the reviewers, are sent to the
Principal Investigator/Project Director by the Program Officer. In addition, the proposer will receive an explanation of the decision to award or decline funding.

In all cases, after programmatic approval has been obtained, the proposals recommended for funding will be forwarded to the Division of Grants and Agreements for review of business, financial, and policy implications and the processing and issuance of a grant or other agreement. Proposers are cautioned that only a Grants and Agreements Officer may make commitments, obligations or awards on behalf of NSF or authorize the expenditure of funds. No commitment on the part of NSF should be inferred from technical or budgetary discussions with a NSF Program Officer. A Principal Investigator or organization that makes financial or personnel commitments in the absence of a grant or cooperative agreement signed by the NSF Grants and Agreements Officer does so at their own risk.

**VII. AWARD ADMINISTRATION INFORMATION**

**A. Notification of the Award**

Notification of the award is made to *the submitting organization* by a Grants Officer in the Division of Grants and Agreements. Organizations whose proposals are declined will be advised as promptly as possible by the cognizant NSF Program Division administering the program. Verbatim copies of reviews, not including the identity of the reviewer, will be provided automatically to the Principal Investigator. (See section VI.A. for additional information on the review process.)

**B. Award Conditions**

An NSF award consists of: (1) the award letter, which includes any special provisions applicable to the award and any numbered amendments thereto; (2) the budget, which indicates the amounts, by categories of expense, on which NSF has based its support (or otherwise communicates any specific approvals or disapprovals of proposed expenditures); (3) the proposal referenced in the award letter; (4) the applicable award conditions, such as Grant General Conditions (NSF-GC-1); * or Federal Demonstration Partnership (FDP) Terms and Conditions * and (5) any announcement or other NSF issuance that may be incorporated by reference in the award letter. Cooperative agreement awards also are administered in accordance with NSF Cooperative Agreement Terms and Conditions (CA-1). Electronic mail notification is the preferred way to transmit NSF awards to organizations that have electronic mail capabilities and have requested such notification from the Division of Grants and Agreements.

*These documents may be accessed electronically on NSF’s Website at [http://www.nsf.gov/home/grants/grants_gac.htm](http://www.nsf.gov/home/grants/grants_gac.htm). Paper copies may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-7827 or by e-mail from pubs@nsf.gov.

**C. Reporting Requirements**

For all multi-year grants (including both standard and continuing grants), the Principal Investigator must submit an annual project report to the cognizant Program Officer at least 90 days before the end of the current budget period. (Some programs or awards require more frequent project reports). Within 90 days after expiration of a grant, the PI also is required to submit a final project report.

Failure to provide the required annual or final project reports will delay NSF review and processing of any future funding increments as well as any pending proposals for that PI. PIs should examine the formats of the required reports in advance to assure availability of required data.

PIs are required to use NSF’s electronic project-reporting system, available through FastLane, for preparation and submission of annual and final project reports. Such reports provide information on activities and findings, project participants (individual and organizational) publications; and, other specific products and contributions. PIs will not be required to re-enter information previously provided, either with a proposal or in earlier updates using the electronic system. Submission of the report via FastLane constitutes certification by the PI that the contents of the report are accurate and complete.
Principal Investigators will be required to participate in evaluation activities related to the Directorate for Education and Human Resources’s program evaluation. In addition, each academic institution involved in a funded project will be expected to provide annually, to the principal investigator of the project, data pertaining to student enrollments, student achievement, student persistence to degrees, and student placements following graduation.

VIII. AGENCY CONTACTS

General inquiries regarding this program should be made to:

- Susan H. Hixson, Lead Program Director, 835 N, telephone: (703) 292-4623, fax: (703) 292-9015, email: shixson@nsf.gov
- John R. Haddock, Co-Lead Program Director, 835 N, telephone: (703) 292-4620, email: jhaddock@nsf.gov
- Susan L. Burkett, Program Director, 835 N, telephone: (703) 292-4629, fax: (703) 292-9015, email: sburkett@nsf.gov
- Daniel Litynski, Program Director, 835 N, telephone: (703) 292-8670, fax: (703) 292-9015, email: dlitynski@nsf.gov
- Elizabeth J. Teles, Program Director, 835 N, telephone: (703) 292-8670, fax: (703) 292-9015, email: ejteles@nsf.gov
- Harry G. Ungar, Program Director, 835 N, telephone: (703) 292-4647, fax: (703) 292-9015, email: hungar@nsf.gov
- Bevlee A. Watford, Program Director, 835 N, telephone: (703) 292-5323, fax: (703) 292-9015, email: bwatford@nsf.gov
- Terry S. Woodin, Program Director, 835 N, telephone: (703) 292-4657, fax: (703) 292-909015, email: twoodin@nsf.gov

For questions related to the use of FastLane, contact:

- FastLane Help Desk, telephone: 1-800-673-6188; e-mail: fastlane@nsf.gov.
- Division of Undergraduate Education, telephone: (703)292-4646, email: duefl@nsf.gov

For questions relating to Grants.gov contact:

- Grants.gov Contact Center: If the Authorized Organizational Representatives (AOR) has not received a confirmation message from Grants.gov within 48 hours of submission of application, please contact via telephone: 1-800-518-4726; e-mail: support@grants.gov.
- General inquiries regarding Science, Technology, Engineering, and Mathematics Talent Expansion Program should be made to: Division of Undergraduate Education, telephone: 703-292-8670, e-mail: undergrad@nsf.gov.

IX. OTHER INFORMATION

The NSF Website provides the most comprehensive source of information on NSF Directorates (including contact information), programs and funding opportunities. Use of this Website by potential proposers is strongly encouraged. In addition, MyNSF (formerly the Custom News Service) is an information-delivery system designed to keep potential proposers and other interested parties apprised of new NSF funding opportunities and publications, important changes in proposal and award policies and procedures, and upcoming NSF Regional Grants Conferences. Subscribers are informed through e-mail or the user's Web browser each time new publications are issued that match their identified interests. MyNSF also is available on NSF's Website at http://www.nsf.gov/mynsf/.
Grants.gov provides an additional electronic capability to search for Federal government-wide grant opportunities. NSF funding opportunities may be accessed via this new mechanism. Further information on Grants.gov may be obtained at http://www.grants.gov.

ABOUT THE NATIONAL SCIENCE FOUNDATION

The National Science Foundation (NSF) is an independent Federal agency created by the National Science Foundation Act of 1950, as amended (42 USC 1861-75). The Act states the purpose of the NSF is "to promote the progress of science; [and] to advance the national health, prosperity, and welfare by supporting research and education in all fields of science and engineering."

NSF funds research and education in most fields of science and engineering. It does this through grants and cooperative agreements to more than 2,000 colleges, universities, K-12 school systems, businesses, informal science organizations and other research organizations throughout the US. The Foundation accounts for about one-fourth of Federal support to academic institutions for basic research.

NSF receives approximately 40,000 proposals each year for research, education and training projects, of which approximately 11,000 are funded. In addition, the Foundation receives several thousand applications for graduate and postdoctoral fellowships. The agency operates no laboratories itself but does support National Research Centers, user facilities, certain oceanographic vessels and Antarctic research stations. The Foundation also supports cooperative research between universities and industry, US participation in international scientific and engineering efforts, and educational activities at every academic level.

Facilitation Awards for Scientists and Engineers with Disabilities provide funding for special assistance or equipment to enable persons with disabilities to work on NSF-supported projects. See Grant Proposal Guide Chapter II, Section D.2 for instructions regarding preparation of these types of proposals.

The National Science Foundation has Telephonic Device for the Deaf (TDD) and Federal Information Relay Service (FIRS) capabilities that enable individuals with hearing impairments to communicate with the Foundation about NSF programs, employment or general information. TDD may be accessed at (703) 292-5090 and (800) 281-8749, FIRS at (800) 877-8339.

The National Science Foundation Information Center may be reached at (703) 292-5111.

The National Science Foundation promotes and advances scientific progress in the United States by competitively awarding grants and cooperative agreements for research and education in the sciences, mathematics, and engineering.

To get the latest information about program deadlines, to download copies of NSF publications, and to access abstracts of awards, visit the NSF Website at http://www.nsf.gov

- Location: 4201 Wilson Blvd. Arlington, VA 22230

The information requested on proposal forms and project reports is solicited under the authority of the National Science Foundation Act of 1950, as amended. The information on proposal forms will be used in connection with the selection of qualified proposals; and project reports submitted by awardees will be used for program evaluation and reporting within the Executive Branch and to Congress. The information requested may be disclosed to qualified reviewers and staff assistants as part of the proposal review process; to proposer institutions/grantees to provide or obtain data regarding the proposal review process, award decisions, or the administration of awards; to government contractors, experts, volunteers and researchers and educators as necessary to complete assigned work; to other government agencies or other entities needing information regarding applicants or nominees as part of a joint application review process, or in order to coordinate programs or policy; and to another Federal agency, court, or party in a court or Federal administrative proceeding if the government is a party. Information about Principal Investigators may be added to the Reviewer file and used to select potential candidates to serve as peer reviewers or advisory committee members. See Systems of Records, NSF-50, "Principal Investigator/Proposal File and Associated Records," 69 Federal Register 26410 (May 12, 2004), and NSF-51, "Reviewer/Proposal File and Associated Records," 69 Federal Register 26410 (May 12, 2004). Submission of the information is voluntary. Failure to provide full and complete information, however, may reduce the possibility of receiving an award.

An agency may not conduct or sponsor, and a person is not required to respond to, an information collection unless it displays a valid Office of Management and Budget (OMB) control number. The OMB control number for this collection of information is 3145-0058. Public reporting burden for this collection of information is estimated to average 120 hours per response, including the time for reviewing instructions. Send comments regarding the burden estimate and any other aspect of this collection of information, including suggestions for reducing this burden, to:

Suzanne H. Plimpton
Reports Clearance Officer
Division of Administrative Services
National Science Foundation
