Graduate Research Fellowship Program (GRFP)

PROGRAM SOLICITATION
NSF 16-588

REPLACES DOCUMENT(S):
NSF 15-597

Application Deadline(s) (received by 5 p.m. local time of applicant’s mailing address):

October 24, 2016
   Life Sciences, Geosciences
October 25, 2016
   Computer and Information Science and Engineering, Engineering, Materials Research
October 27, 2016
   Psychology, Social Sciences, STEM Education and Learning
October 28, 2016
   Chemistry, Mathematical Sciences, Physics and Astronomy
October 23, 2017
   Life Sciences, Geosciences
October 24, 2017
   Computer and Information Science and Engineering, Engineering, Materials Research
October 26, 2017
   Psychology, Social Sciences, STEM Education and Learning
October 27, 2017
   Chemistry, Mathematical Sciences, Physics and Astronomy
October 22, 2018
   Life Sciences, Geosciences
October 23, 2018
   Computer and Information Science and Engineering, Engineering, Materials Research
October 25, 2018
   Psychology, Social Sciences, STEM Education and Learning
IMPORTANT INFORMATION AND REVISION NOTES

1. This is a multi-year solicitation covering the 2017, 2018, and 2019 competitions.
2. Application deadlines have changed. Applications are due at 5:00 p.m. local time, as determined by the applicant's mailing address.

4. Applications with only two letters (i.e., one fewer than the desired three letters) will be reviewed unless the applicant withdraws the submitted application by November 15 of the application year. Applications with fewer than two letters will be returned without review.

5. Effective as of the 2017 competition (Fall 2016 deadlines), graduate students are limited to only one application to the GRFP, submitted either in the first year or in the second year of graduate school. An exception is provided for first-year graduate students who applied to the 2016 GRFP competition in Fall 2015; these individuals may apply a second time in Fall 2016, if they are otherwise eligible. See Section IV – Eligibility Information for additional details.

6. Clarification is provided on which Biomedical fields are eligible and which are ineligible.

7. Fields of Study names have been updated.

SUMMARY OF PROGRAM REQUIREMENTS

General Information

Program Title:

NSF Graduate Research Fellowship Program (GRFP)

Synopsis of Program:

The purpose of the NSF Graduate Research Fellowship Program (GRFP) is to help ensure the vitality and diversity of the scientific and engineering workforce of the United States. The program recognizes and supports outstanding graduate students who are pursuing research-based master's and doctoral degrees in science, technology, engineering, and mathematics (STEM) or in STEM education. The GRFP provides three years of support for the graduate education of individuals who have demonstrated their potential for significant research achievements in STEM or STEM education. NSF especially encourages women, members of underrepresented minority groups, persons with disabilities, veterans, and undergraduate seniors to apply.

Cognizant Program Officer(s):

Please note that the following information is current at the time of publishing. See program website for any updates to the points of contact.

- Susan Brennan, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Jong-on Hahm, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Christopher Hill, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Tyrone Mitchell, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Applications, contact: GRF Operations Center, telephone: (866) 673-4737, email: info@nsfgrfp.org
Applicable Catalog of Federal Domestic Assistance (CFDA) Number(s):
- 47.041 --- Engineering
- 47.049 --- Mathematical and Physical Sciences
- 47.050 --- Geosciences
- 47.070 --- Computer and Information Science and Engineering
- 47.074 --- Biological Sciences
- 47.075 --- Social Behavioral and Economic Sciences
- 47.076 --- Education and Human Resources
- 47.079 --- Office of International Science and Engineering
- 47.083 --- Office of Integrative Activities (OIA)

Award Information

Anticipated Type of Award: Fellowship

Estimated Number of Awards: 2,000

The NSF expects to award 2,000 Graduate Research Fellowships per fiscal year under this program solicitation pending availability of funds.

Anticipated Funding Amount: $138,000

Per award (Fellowship), pending the availability of funds.

Each Fellowship consists of three years of support during a five-year fellowship period. Currently, NSF provides a stipend of $34,000 to the Fellow and a cost-of-education allowance of $12,000 to the graduate degree-granting institution for each Fellow who uses the fellowship support in a fellowship year.

Eligibility Information

Organization Limit:
Fellowship applications must be submitted by the prospective Fellow. Applicants must register with FastLane (https://www.fastlane.nsf.gov/fastlane.jsp) prior to submitting an application. Confirmation of acceptance in a graduate degree program in science or engineering is required at the time of Fellowship acceptance, no later than May 1 of the year the award is accepted. Prospective Fellows must enroll in a university, college, or non-profit academic institution of higher education accredited in, and having a campus located in, the United States, its territories, or possessions, or the Commonwealth of Puerto Rico that offers advanced degrees in STEM or STEM education no later than fall of the year the award is accepted. All Fellows from the date of Acceptance through Completion or Termination of the Fellowship must be affiliated with a graduate degree-granting institution accredited in, and having a campus located in, the United States, its territories, or possessions, or the Commonwealth of Puerto Rico.

Applicant Eligibility:

See details provided below in Additional Eligibility Information.

Applicants must self-certify that they are eligible to receive the Fellowship.

Categories of applicants that are ineligible:
- Those who do not hold United States citizenship, national, or permanent resident status by the application deadline.
- Those who were previously awarded a Fellowship from the NSF Graduate Research Fellowship Program and accepted it.
- Those who did not accept the NSF Graduate Research Fellowship and failed to notify NSF by the published deadline for accepting the Fellowship.
- Those who have completed the requirements for any graduate or professional degree by August 1 of the year the application is submitted, except 1) applicants who have completed a joint baccalaureate-master's (BS/MS) program and have not completed any further graduate study outside the joint program unless the graduate coursework was required to establish or maintain credentials in a profession such as teaching; or 2) applicants that have had an interruption in graduate study of at least two consecutive years prior to November 1 of the year the application is submitted and have completed no additional graduate study as of August 1 of the year the application is submitted.
- Current NSF employees.

Number of Times Individuals May Apply

As an undergraduate:
- Individuals may apply as an undergraduate senior as well as post-baccalaureate, before beginning graduate training.

As a graduate student:
- Effective as of the 2017 competition (Fall 2016 deadlines), graduate students are limited to only one application to the GRFP, submitted either in the first year or in the second year of graduate school. An
exception is provided for first-year graduate students who applied in Fall 2015 to the 2016 GRFP competition; these individuals may apply a second time in Fall 2016, if they are otherwise eligible. All other graduate students are subject to the new eligibility requirements. The community was notified of this change in Dear Colleague Letter NSF 16-050.

- Applications that are not reviewed by GRFP (i.e., are withdrawn before review or are returned without review) do not count toward the one-application limit for graduate students, submitted either in their first year or in their second year of graduate school.
- Graduate students may withdraw a submitted GRFP application without it being counted toward the one-application limit if they do so by November 15 of the application year. Any application withdrawn after November 15 of the application year counts toward the one-application limit.

As an individual returning to graduate education:

- Applicants who have completed more than twelve months of graduate study or have earned a previous graduate or professional degree are eligible only if they have had an interruption in graduate study of at least two consecutive years prior to November 1 of the year the application is submitted. To be eligible, applicants must have completed no additional graduate study by August 1 of that year. Applicants must address the reasons for the interruption in graduate study in the Personal, Relevant Background and Future Goals Statement.

Limit on Number of Applications per Applicant: 1

An eligible applicant may submit only one application per annual competition.

Application Preparation and Submission Instructions

A. Application Preparation Instructions

- Letters of Intent: Not applicable
- Preliminary Proposal Submission: Not applicable
- Application Instructions: This solicitation contains information that deviates from the standard NSF Proposal and Award Policies and Procedures Guide (PAPPG) proposal preparation guidelines. Please see the full text of this solicitation for further information.

B. Budgetary Information

- Cost Sharing Requirements:
  Inclusion of voluntary committed cost sharing is prohibited.
- Indirect Cost (F&A) Limitations:
  No indirect costs are allowed.
- Other Budgetary Limitations:
  Other budgetary limitations apply. Please see the full text of this solicitation for further information.

C. Due Dates

- Application Deadline(s) (received by 5 p.m. local time of applicant’s mailing address):
  October 24, 2016
    Life Sciences, Geosciences
  October 25, 2016
    Computer and information Science and Engineering, Engineering, Materials Research
  October 27, 2016
    Psychology, Social Sciences, STEM Education and Learning
  October 28, 2016
    Chemistry, Mathematical Sciences, Physics and Astronomy
  October 23, 2017
    Life Sciences, Geosciences
  October 24, 2017
    Computer and information Science and Engineering, Engineering, Materials Research
  October 26, 2017
Application Review Information Criteria

Merit Review Criteria:
National Science Board approved Merit Review Criteria (Intellectual Merit and Broader Impacts) apply.

Award Administration Information

Award Conditions:
Fellowships are made subject to the provisions (and any subsequent amendments) contained in NSF 16-104: NSF Graduate Research Fellowship Program Administrative Guide for Fellows and Coordinating Officials.

Reporting Requirements:
See reporting requirements in full text of solicitation and NSF 16-104: NSF Graduate Research Fellowship Program Administrative Guide for Fellows and Coordinating Officials. Fellows are required to submit annual activity reports and to declare fellowship status by May 1 each year. Additional reporting requirements are presented in Section VII.C of this solicitation.

I. INTRODUCTION

The Graduate Research Fellowship Program (GRFP) is a National Science Foundation-wide program that provides Fellowships to individuals selected early in their graduate careers based on their demonstrated potential for significant research achievements in science, technology, engineering or mathematics (STEM) or in STEM education. Three years of support is provided by the program for graduate study that leads to a research-based master’s or doctoral degree in STEM or STEM education (see Fields of Study in Appendix for examples).

The program goals are: 1) to select, recognize, and financially support, early in their careers, individuals with the demonstrated potential to be high achieving scientists and engineers, and 2) to broaden participation in science and engineering of underrepresented groups, including women, minorities, persons with disabilities, and veterans. NSF especially encourages women, members of underrepresented minority groups, persons with disabilities, veterans, and undergraduate seniors to apply. GRFP is a critical program in NSF’s overall strategy to develop the globally-engaged workforce necessary to ensure the Nation’s leadership in advancing science and engineering research and innovation. The ranks of NSF Fellows include numerous individuals who have made transformative breakthrough discoveries in science and engineering, become leaders in their chosen careers, and been honored as Nobel laureates.

II. PROGRAM DESCRIPTION

The Graduate Research Fellowship Program (GRFP) awards Fellowships for graduate study leading to research-based master’s and doctoral degrees in STEM or in STEM education. GRFP supports individuals proposing a comprehensive holistic plan for graduate education that takes into account individual interests and competencies. A holistic plan describes the experiences, attributes, and academic achievements that, when considered in combination, show how the applicant has demonstrated potential for significant research achievements in STEM or in STEM education. Thus, an applicant must provide a detailed profile of her or his relevant educational and research experiences and plans for graduate education in such a way as to demonstrate this potential for significant achievements.

Prospective applicants are advised that submission of an application implies their intent to pursue graduate study in a research-based program in STEM or STEM education. All applicants are expected to either be enrolled in a research based master’s or doctoral program or have adequate preparation to begin graduate-level study and research by summer or fall of the year the award is accepted. From the date of Acceptance through Completion or Termination of the Fellowship, applicants accepting the award (Fellows) must be affiliated with a graduate degree-granting institution accredited in, and having a campus located in, the United States, its territories, or possessions, or the Commonwealth of Puerto Rico.

III. AWARD INFORMATION

The NSF expects to award 2,000 Graduate Research Fellowships per fiscal year under this program solicitation pending availability of funds.

Fellowship funding will be for a maximum of three years of financial support (in 12-month allocations, starting in summer or fall) usable over a five-year fellowship period. The anticipated announcement date for the Fellowship awards is early April each year.

The institution receives up to a $46,000 award per Fellow who uses the fellowship support in a fellowship year. The Graduate Research Fellowship stipend is currently $34,000 for a 12-month tenure period, prorated in whole month increments of $2,833. The cost-of-education allowance to the institution is currently $12,000 per year of fellowship support.

During receipt of the fellowship support, the institution is required to exempt Fellows from paying tuition and fees normally charged to students of similar academic standing, unless such charges are optional or are refundable (i.e., the institution is responsible for tuition and required fees in excess of the cost-of-education allowance). Refer to NSF 16-104: NSF Graduate Research Fellowship Program Administrative Guide for Fellows and Coordinating Officials for restrictions on the use of the cost-of-education allowance.

GRFP Opportunities, Including Professional Development

Over the course of the five-year GRFP fellowship period, Fellows are encouraged to apply for professional development opportunities offered through the program: Graduate Research Opportunities Worldwide, or GROW (https://www.nsf.gov/grow), and the Graduate Research Internship Program, or GRIP (https://www.nsf.gov/grp). GROW provides supplemental funding for Fellows to take advantage of expertise, facilities, data, and field sites located abroad; to develop an international network of collaborators early in their career; to address problems of a global nature that require international cooperation; and to be prepared to collaborate successfully in international teams upon joining the United States science and engineering workforce. GRIP provides supplemental funding for Fellows to participate in mission-related, collaborative research under the guidance of host research mentors at federal facilities and national laboratories. In addition to developing research expertise, Fellows can enhance their professional skills, develop new networks, and prepare for a wide array of career options in areas of national needs. GROW and GRIP are critical opportunities that contribute to NSF’s overall strategy to develop the globally-engaged workforce necessary to ensure the Nation’s leadership in advancing science and engineering research and innovation.
Facilitation Awards for Scientists and Engineers with Disabilities (FASED) provide funding for special assistance or equipment to enable persons with disabilities to work on NSF-supported projects as described in the NSF Proposal and Award Policies and Procedures Guide (PAPPG; NSF 18-1), Chapter II.D.4. Fellows with disabilities may apply for assistance after consulting the instructions in the document NSF 16-104: Administrative Guide for Fellows and GRFP Coordinating Officials.

The GRFP supports the NSF Career-Life Balance Initiative (NSF 13-099) by offering limited paid and unpaid leave options for Fellows facing dependent-care issues (childbirth/adoption and elder care). NSF enables career-life balance through a variety of mechanisms. To apply for this supplemental funding as a GRFP Fellow, see https://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf13099.

Fellows may request access to cyberinfrastructure resources, including supercomputing time, through the Extreme Science and Engineering Discovery Environment (XSEDE). Please refer to http://www.xsede.org/ for more information on cyberinfrastructure resources.

Honorable Mention

The NSF accords Honorable Mention to meritorious applicants who do not receive Fellowship awards. This is considered a significant national academic achievement.

Graduate students with Honorable Mention may request access to XSEDE cyberinfrastructure resources in support of research undertaken toward completion of the graduate program of study that occurs within the 5-year period following receipt of Honorable Mention. Please refer to http://www.xsede.org/ for more information.

IV. ELIGIBILITY INFORMATION

Organization Limit:

Fellowship applications must be submitted by the prospective Fellow. Applicants must register with FastLane (https://www.fastlane.nsf.gov/fastlane.jsp) prior to submitting an application. Confirmation of acceptance in a graduate degree program in science or engineering is required at the time of Fellowship acceptance, no later than May 1 of the year the award is accepted. Prospective Fellows must enroll in a university, college, or non-profit academic institution of higher education accredited in, and having a campus located in, the United States, its territories, or possessions, or the Commonwealth of Puerto Rico that offers advanced degrees in STEM or STEM education no later than fall of the year the award is accepted. All Fellows from the date of Acceptance through Completion or Termination of the Fellowship must be affiliated with a graduate degree-granting institution accredited in, and having a campus located in, the United States, its territories, or possessions, or the Commonwealth of Puerto Rico.

Applicant Eligibility:

See details provided below in Additional Eligibility Information.

Applicants must self-certify that they are eligible to receive the Fellowship.

Categories of applicants that are ineligible:

- Those who do not hold United States citizenship, national, or permanent resident status by the application deadline.
- Those who were previously awarded a Fellowship from the NSF Graduate Research Fellowship Program and accepted it.
- Those who did not accept the NSF Graduate Research Fellowship and failed to notify NSF by the published deadline for accepting the Fellowship.
- Those who have completed the requirements for any graduate or professional degree by August 1 of the year the application is submitted, except 1) applicants who have completed a joint baccalaureate-master's (BS/MS) program and have not completed any further graduate study outside the joint program unless the graduate coursework was required to establish or maintain credentials in a profession such as teaching; or 2) applicants that have had an interruption in graduate study of at least two consecutive years prior to November 1 of the year the application is submitted and have completed no additional graduate study as of August 1 of the year the application is submitted.
- Current NSF employees.

Number of Times Individuals May Apply

As an undergraduate:

- Individuals may apply as an undergraduate senior as well as post-baccalaureate, before beginning graduate training.

As a graduate student:

- Effective as of the 2017 competition (Fall 2016 deadlines), graduate students are limited to only one application to the GRFP, submitted either in the first year or in the second year of graduate school. An exception is provided for first-year graduate students who applied in Fall 2015 to the 2016 GRFP competition; these individuals may apply a second time in Fall 2016, if they are otherwise eligible. All other graduate students are subject to the new eligibility requirements. The community was notified of this change in Dear Colleague Letter NSF 16-050.
- Applications that are not reviewed by GRFP (i.e., are withdrawn before review or are returned without review) do not count toward the one-application limit for graduate students, submitted either in their first year.
or in their second year of graduate school.

- Graduate students may withdraw a submitted GRFP application without it being counted toward the one-
  application limit if they do so by November 15 of the application year. Any application withdrawn after
  November 15 of the application year counts toward the one-application limit.

As an individual returning to graduate education:

- Applicants who have completed more than twelve months of graduate study or have earned a previous
  graduate or professional degree are eligible only if they have had an interruption in graduate study of at least
  two consecutive years prior to November 1 of the year the application is submitted. To be eligible, applicants
  must have completed no additional graduate study by August 1 of that year. Applicants must address the
  reasons for the interruption in graduate study in the Personal, Relevant Background and Future Goals
  Statement.

Limit on Number of Applications per Applicant: 1

An eligible applicant may submit only one application per annual competition.

Additional Eligibility Info:

Additional Eligibility Info:

Described in detail below are the three defining eligibility requirements for the Graduate Research Fellowship
Program: (1) U. S. citizenship, (2) degree requirements, and (3) field of study. Applicants are advised to read the
entire program solicitation carefully to ensure that the requirements are understood. Applicants must self-certify that
they plan to pursue or are pursuing a graduate degree in a supported field of study and that they meet all eligibility
criteria for GRFP.

1. Citizenship

Applicants must be United States citizens, nationals, or permanent residents of the United States by the application
deadline.

The term “national” designates a native resident of a commonwealth or territory of the United States, such as
American Samoa. It does not refer to a citizen of another country who has applied for United States citizenship and
who has not received U.S. citizenship by the application deadline.

2. Degree Requirements

Applicants are eligible to apply: 1) as undergraduates or post baccalaureates not enrolled in graduate school
and who will have adequate preparation to attend graduate school in the fall that begins after they apply to
GRFP; or 2) as graduate students who have not completed more than 12 months of a graduate program in a
supported field of study (see Appendix).

Below are additional guidelines to determine eligibility:

a) Not Currently Enrolled in Graduate School:

- No prior graduate school enrollment
- Undergraduate students typically apply prior to starting a graduate program, which is usually in the fall of
  their senior year or the fall of the academic year that they anticipate receiving a bachelor’s degree.
- At the time of application, undergraduate student applicants are expected to be on track to receive a
  bachelor’s degree prior to fall of the following year to demonstrate adequate preparation to begin graduate
  study and research by the following fall.
- Bachelor’s degree holders without any graduate study can apply at any time.

With prior graduate school enrollment

- As a general rule, applicants must not have completed more than 12 months of full-time graduate study or
  its equivalent as defined by the universities attended as of August 1 of the year the GRFP application is
  submitted.
- All graduate, post-baccalaureate and professional study is counted towards the allowed 12 months of
  graduate study, including all full-time and part-time master’s and doctoral degree programs, and non-degree
  graduate-level and professional coursework. The one exception is for graduate coursework required to
  establish or maintain credentials in a profession such as teaching; such coursework is not included in the
  12-month limit.
- Applicants who have completed more than twelve months of graduate study or have earned a previous
  graduate or professional degree are eligible only if they have had an interruption in graduate study of at least
  two consecutive years prior to November 1 of the year the application is submitted. To be eligible, applicants
  must have completed no additional graduate study by August 1 of that year. Applicants must address the
  reasons for the interruption in graduate study in the Personal, Relevant Background and Future Goals
  Statement.
- Applicants in joint BS/MS programs are eligible to apply prior to completion of any further graduate study.
  The bachelor’s degree must be conferred before fall of the award year. Joint baccalaureate-master’s
  programs are those where an institution offers students admission to both an undergraduate and graduate
  degree program concurrently. Pursuing separate undergraduate and master’s degrees at the same
  institution does not constitute a joint baccalaureate-master’s program. Completion of any graduate study
  outside of the joint program disqualifies an applicant unless the graduate coursework is required to maintain
  (non-degree) skills or credentials in a profession such as teaching; such coursework is not included in the
  12-month limit.
Applicants in joint BS/MS programs, are eligible to apply in the final year of their program or after completion of the program.

b) Currently Enrolled in Graduate School:

Part time:

- Graduate students who are enrolled in part-time graduate study (or a combination of part-time and full-time graduate study) can apply before completing more than 24 semester hours or 36 quarter hours or their equivalent.

Full time:

- Applicants must not have completed more than 12 months of full-time graduate, post-baccalaureate graduate, and professional study by August 1, of the year the application is submitted. Pre-graduate participation in summer activities (e.g., bridge programs, field studies, lab rotations) offered by a graduate program prior to the start of the fall graduate program are not included in this total.
- There is no credit hour limit for students who have completed only full-time graduate study; eligibility for full-time students is based on the length of time enrolled in the graduate program.
- All graduate, post-baccalaureate and professional study is counted towards the allowed 12 months of graduate study, including all full-time and part-time master’s and doctoral degree programs, and non-degree graduate-level and professional coursework. The one exception is for graduate coursework required to establish or maintain credentials in a profession such as teaching; such coursework is not included in the 12-month limit.

3. Field of Study

Fellowships are awarded for graduate study leading to research-based master’s and doctoral degrees in science, technology, engineering or mathematics (STEM) or in STEM education. An individual’s proposed research and graduate study must be in a STEM field or in STEM education. Fellows must enroll in a graduate degree program consistent with the relevant field of study proposed in their application and to undertake a course of study leading to a research-based master’s or doctoral degree. The guidelines below should be used to assess eligibility according to the field of study. Applicants are encouraged to carefully read the exceptions, as applications ruled ineligible will be returned without review.

The following programs, areas of graduate study, and research are ineligible for Fellowship support.

Individuals are not eligible to apply if they will be enrolled in a practice-oriented professional degree program such as medical, dental, law, and public health at any time during the fellowship. Examples of typically ineligible degree programs include MBA, MPH, MSW, JD, MD, and DDS. Joint or combined professional degree-science programs (e.g., MD/PhD or JD/PhD) and dual professional degree-science programs are also not eligible. Applicants who will be enrolled in a graduate degree program while on a leave of absence from a professional degree program or professional degree/graduate degree joint program are not eligible for a Graduate Research Fellowship.

Individuals are not eligible to apply if they will be enrolled in a program focused on clinical practice, for example, counseling, social work, as well as patient-oriented research, epidemiological and medical behavioral studies, outcomes research and health services research. Ineligible clinical studies include investigations to provide evidence leading to a scientific basis for consideration of a change in health policy or standard of care, and includes pharmacologic, non-pharmacologic, and behavioral interventions for disease prevention, prophylaxis, diagnosis, or therapy. Graduate study focused on community and other population-based medical intervention trials are also ineligible.

Individuals are not eligible to apply if they will conduct biomedical research for which the goals are directly health-related, such as etiology, diagnosis or treatment of physical or mental disease, abnormality, or malfunction in humans and other animals. Research activities using animal models of disease, for developing or testing of drugs or other procedures for treatment of disease, and statistical modeling for which the purpose is diagnosis or epidemiology also are not eligible for support. There are areas of bioengineering research directed at medical use that are eligible. These include research projects in bioengineering to aid persons with disabilities, or to diagnose or treat human disease, provided they apply engineering principles to problems in medicine while primarily advancing engineering knowledge. Applicants planning to study and conduct research in these areas of bioengineering should select biomedical engineering as the field of study.

The Graduate Research Fellowship Operations Center is responsible for responding to questions about the program. For questions concerning eligibility and fields of study, contact the Graduate Research Fellowship Operations Center, (866) 673-4737, International (202) 331-3542, or info@nsfgrfp.org.

V. APPLICATION PREPARATION AND SUBMISSION INSTRUCTIONS

A. Application Preparation Instructions

Fellowship applications must be submitted electronically using the NSF FastLane Graduate Research Fellowship Program Application Module at https://www.fastlane.nsf.gov/grfp/Login.do according to the deadline corresponding with the Primary Field of Study selected in the application. Applications must be received by 5:00 p.m. local time, as determined by the applicant’s mailing address.
Reference letters must be submitted electronically by the reference writers through the FastLane GRFP Application Module and must be received by the reference letter deadline (see Application Preparation and Submission Instructions/C. Due Dates of this Solicitation), by 5:00 p.m. Eastern Time (ET). If fewer than two reference letters (none or one) are received by the reference letter deadline, the application will be returned without review.

Applicants must submit the following information through the FastLane GRFP Application Module: Personal Information; Education, Work and Other Experience; electronic transcripts; Proposed Field(s) of Study; Proposed Graduate Study and Graduate School Information; the names and email addresses of at least three reference letter writers; Personal, Relevant Background and Future Goals Statement; and Graduate Research Plan Statement.

Applicants should not send extraneous information or materials such as manuscripts, resumes, medical reports, or news clippings. These items will not be reviewed with an application. No additional information may be provided by links to web pages within the application, except as part of citations in the References Cited section. Images may be included in the page limits. Review of the application and reference letters is based solely on materials received by the application and reference letter deadlines.

Applicants must follow the instructions in the FastLane GRFP Application Module, including the instructions found at the "Applicant Help" link in the Module, for completing each section of the application. The statements must be written using the following guidelines:

- standard 8.5” x 11” page size
- 12-point, Times New Roman font or Computer Modern (LaTeX) font
- 10-point font may be used for references, footnotes, figure captions and text within figures
- 1” margins on all sides
- Single-spaced (approximately 5 lines per inch) or greater line spacing. Applicants should not use line spacing options such as "exactly 12 point," that are less than single spaced.

Compliance with these guidelines will be judged based on the document as it appears in FastLane after it is uploaded. Applicants are strongly encouraged to upload their documents early and proofread them to ensure compliance and avoid potential formatting issues caused by the PDF conversion process.

The maximum length of the Personal, Relevant Background and Future Goals Statement is three pages. The maximum length of the Graduate Research Plan Statement is two pages. These page limits include all references, citations, charts, figures, images, and lists of publications and presentations. Upon uploading their application, applicants must certify that the two statements (Personal, Relevant Background and Future Goals Statement, and Graduate Research Plan Statement) in the application are their own original work. As explained in the NSF Proposal and Award Policies and Procedures Guide [PAPPG; NSF 18-1], Chapter I.D.3): "NSF expects strict adherence to the rules of proper scholarship and attribution. The responsibility for proper scholarship and attribution rests with the authors of a proposal; all parts of the proposal should be prepared with equal care for this concern. Authors other than the PI (or any co-PI) should be named and acknowledged. Serious failure to adhere to such standards can result in findings of research misconduct. NSF policies and rules on research misconduct are discussed in the PAPPG Chapter XII.C, as well as 45 CFR Part 689."

Both statements must address NSF’s review criteria of Intellectual Merit and Broader Impacts (described in detail in Section VI).

In the application, applicants must list their baccalaureate institution, as well as all graduate institutions attended with a start date prior to the fall term in which the application is submitted. Transcripts are required for all institutions listed. If the applicant started at the current institution in the fall of the application year and the institution does not provide unofficial or official transcripts prior to completion of the first term, the applicant may submit a class schedule/enrollment verification form in place of a transcript.

Transcripts must be submitted electronically through the FastLane GRFP Application Module by the Field of Study application deadline. Applicants are encouraged to redact personally identifiable information (date of birth, individual Social Security Numbers, personal financial information, home addresses, home telephone numbers and personal email addresses) from the transcripts before uploading. Transcripts must be uploaded in a format that is supported by FastLane as described in the FastLane GRFP Application Module. The FastLane GRFP Application Module does not accept encrypted or password-protected transcripts.

Applicants who earned Master’s degrees in joint Baccalaureate-Master’s degree programs should submit transcripts that clearly document the joint program. If the transcript does not document the joint program, applicants must upload a letter from the registrar of the institution certifying enrollment in a joint program, appended to the transcript for that institution. Failure to provide clear documentation of a joint program may result in an application being returned without review.

Failure to comply fully with the above requirements will result in the application being returned without review.

In addition, applications that are incomplete due to missing required transcripts and/or reference letters (fewer than two letters received), or that do not have "received" status in FastLane on the application deadline for the selected Field of Study) will be returned without review. Applicants are advised to submit applications early to avoid unanticipated delays on the deadline dates. Applicants should make sure to read and comply with all the formatting and application instructions.

Reference Letters

To be considered for review, applications should include three reference letters from non-family members; however, applications with only two letters will be reviewed unless the applicant withdraws the submitted application by November 15 of the application year (see instructions below). Applications with fewer than two letters will be returned without review.

All reference letters must be received on FastLane by 5:00 p.m. ET (Eastern Time) on the reference submission deadline date (see the deadline posted in FastLane’s Application Module and in Application Preparation and Submission Instructions/C. Due Dates of this Solicitation). No exceptions to the reference letter submission deadline will be granted. Each letter is limited to 2 pages. The FastLane GRFP Application Module allows applicants to request up to five reference letters and to provide a ranking of those reference letters. If more than three reference letters are received, the top three will be considered for the application. Reference writers will be notified by
an email from FastLane of the request to submit a letter of reference on behalf of an applicant. To avoid disqualifying an application, reference writers should take into consideration the Eastern Time hours of operation of the FastLane Help Desk as stated in the notification email. Letter writers will receive a confirmation email after submitting a letter to GRFP.

Applicants must enter an appropriate email address for each reference writer into the FastLane GRFP Application Module. An exact email address is crucial to matching the reference writer and the applicant in the FastLane GRFP Application Module. Applicants should ask reference writers well in advance of the reference writer deadline, and it is recommended they provide copies of their application materials to the writers.

Applicant-nominated reference writers must submit their letters through the FastLane GRFP Application Module. Reference letter requirements include:

- Institutional (or professional) letterhead, if available
- Two (2) page limit
- 12-point Times New Roman in the body of the letter
- Name and title of reference writer
- Department and institution or organization

The reference letter should address the NSF Merit Review Criteria of Intellectual Merit and Broader Impacts (described in detail below). It should include details explaining the nature of the relationship to the applicant, comments on the applicant's potential for contributing to a globally-engaged United States science and engineering workforce, statements about the applicant's academic potential and prior research experiences, statements about the applicant's proposed research, and any other information to aid review panels in evaluating the application according to the NSF Merit Review Criteria.

Application Completion Status

The FastLane GRFP Application Module displays the accurate and up-to-date completion status of the Fellowship application. The status function indicates whether the application and reference letters have been received by NSF. Applicants are strongly encouraged to make use of this feature to ensure all application materials, including three reference letters, have been received before the deadlines. Applicants must use the FastLane user ID and password to access this information. For FastLane user support, call the FastLane Help Desk at 1-800-673-6188 or e-mail fastlane@nsf.gov.

Interdisciplinary Applications

NSF welcomes applications for interdisciplinary programs of study and research. Interdisciplinary research is defined as "a mode of research by teams or individuals that integrates information, data, techniques, tools, perspectives, concepts, and/or theories from two or more disciplines or bodies of specialized knowledge to advance fundamental understanding or to solve problems whose solutions are beyond the scope of a single discipline or area of research practice" (Committee on Facilitating Interdisciplinary Research, Committee on Science, Engineering, and Public Policy, 2004. Facilitating interdisciplinary research. National Academies. Washington: National Academy Press, p. 2). Applicants must indicate the relative effort for each Field of Study represented in their application. Applications must be received by the deadline for the primary Field of Study designated on the application.

Withdrawal of a GRFP application

To withdraw a submitted application, the applicant must send a withdrawal request from the e-mail account used to create the GRFP FastLane profile to GRFPwithdrawal@nsf.gov. The withdrawal request must include the GRFP application number as well as the signature of the applicant, and spell out the e-mail address used to manage the specific GRFP FastLane profile. The request does not need to indicate the reason for withdrawing.

B. Budgetary Information

Cost Sharing:

Inclusion of voluntary committed cost sharing is prohibited.

Indirect Cost (F&A) Limitations:

No indirect costs are allowed.

Other Budgetary Limitations:

NSF awards $46,000 each year to the GRFP institution to cover the Fellow stipend and cost-of-education allowance for each NSF Graduate Research Fellow "on tenure" at the institution.

The NSF Graduate Research Fellowship Program Fellowship stipend is $34,000 for a 12-month tenure period, prorated in monthly increments of $2,833. The institutional cost-of-education allowance is $12,000 per tenure year per Fellow.

C. Due Dates

- Application Deadline(s) (received by 5 p.m. local time of applicant’s mailing address):
  - October 24, 2016
    Life Sciences, Geosciences
  - October 25, 2016
VI. APPLICATION REVIEW INFORMATION

A. Merit Review Principles and Criteria

Applications will be reviewed online by virtual panels of disciplinary and interdisciplinary scientists and engineers and other professional graduate education experts. These reviewers are selected by Program Officers charged with oversight of the review process. Care is taken to ensure that reviewers have no conflicts of interest with the applicants. Panels will review applications from broad areas of related disciplines. Applicants are reviewed in panels based on their selection of a primary Field of Study (see Fields of Study in...
Appendix. Selection of a primary Field of Study determines the application deadline and the panel that will review the application. Thus, applicants are advised to select the Field of Study in the FastLane GRFP Application module that is most closely aligned with the proposed graduate program of study and research plan. Applicants who select “other” must choose a primary Field of Study on the list for placement in a review panel.

Each application will be reviewed independently in accordance with the NSF Merit Review Criteria using all available information in the completed application. In considering applications, reviewers are instructed to address the two Merit Review Criteria as approved by the National Science Board - Intellectual Merit and Broader Impacts (NSF Proposal and Award Policies and Procedures Guide). Therefore, applicants must include separate statements on Intellectual Merit and Broader Impacts in their written statements in order to provide reviewers with the information necessary to evaluate the application with respect to both Criteria as detailed below. It is recommended that applicants include headings for Intellectual Merit and Broader Impacts in their statements.

The following description of the Merit Review Criteria is provided in Chapter III of the NSF Proposal and Award Policies and Procedures Guide (PAPPG):

All NSF proposals are evaluated through use of the two National Science Board approved merit review criteria. In some instances, however, NSF will employ additional criteria as required to highlight the specific objectives of certain programs and activities.

The two merit review criteria are listed below. Both criteria are to be given full consideration during the review and decision-making processes; each criterion is necessary but neither, by itself, is sufficient. Therefore, proposers must fully address both criteria. (PAPPG Chapter II.C.2.d.i. contains additional information for use by proposers in development of the Project Description section of the proposal.) Reviewers are strongly encouraged to review the criteria, including PAPPG Chapter II.C.2.d.i., prior to the review of a proposal.

When evaluating NSF proposals, reviewers will be asked to consider what the proposers want to do, why they want to do it, how they plan to do it, how they will know if they succeed, and what benefits could accrue if the project is successful. These issues apply both to the technical aspects of the proposal and the way in which the project may make broader contributions. To that end, reviewers will be asked to evaluate all proposals against two criteria:

1. Intellectual Merit: The Intellectual Merit criterion encompasses the potential to advance knowledge; and
2. Broader Impacts: The Broader Impacts criterion encompasses the potential to benefit society and contribute to the achievement of specific, desired societal outcomes.

The following elements should be considered in the review for both criteria:

1. What is the potential for the proposed activity to:
   a. Advance knowledge and understanding within its own field or across different fields (Intellectual Merit); and
   b. Benefit society or advance desired societal outcomes (Broader Impacts)?
2. To what extent do the proposed activities suggest and explore creative, original, or potentially transformative concepts?
3. Is the plan for carrying out the proposed activities well-reasoned, well-organized, and based on a sound rationale? Does the plan incorporate a mechanism to assess success?
4. How well qualified is the individual, team, or organization to conduct the proposed activities?
5. Are there adequate resources available to the PI (either at the home organization or through collaborations) to carry out the proposed activities?

Additionally, Chapter II of the NSF Proposal and Award Policies and Procedures Guide states:

Broader impacts may be accomplished through the research itself, through the activities that are directly related to specific research projects, or through activities that are supported by, but are complementary to, the project. NSF values the advancement of scientific knowledge and activities that contribute to achievement of societally relevant outcomes. Such outcomes include, but are not limited to: full participation of women, persons with disabilities, and underrepresented minorities in science, technology, engineering, and mathematics (STEM); improved STEM education and educator development at any level; increased public scientific literacy and public engagement with science and technology; improved well-being of individuals in society; development of a diverse, globally competitive STEM workforce; increased partnerships between academia, industry, and others; improved national security; increased economic competitiveness of the US; and enhanced infrastructure for research and education.

Applying NSF’s Merit Review Criteria to GRFP

Reviewers evaluating applications submitted to the Graduate Research Fellowship Program may consider the following with respect to the Intellectual Merit Criterion: the potential of the applicant to advance knowledge based on a holistic analysis of the complete application, including the Personal, Relevant Background, and Future Goals Statement, Graduate Research Plan Statement, strength of the academic record, description of previous research experience or publication/presentations, and references. Holistic review is a flexible, individualized way of assessing an applicant's interests and competencies by which balanced consideration is given to experiences, attributes, and academic achievements and, when considered in combination, how the applicant has demonstrated potential for significant research achievements in STEM and STEM education. Reviewers may consider the following with respect to the Broader Impacts Criterion: the potential of the applicant to benefit society and contribute to the achievement of specific, desired societal outcomes based on a holistic analysis of the complete application, including by personal experiences, professional experiences, educational experiences and future plans.
B. Application Review and Selection Process

Applications submitted in response to this program solicitation will be reviewed online by Panel Review.

The application evaluation involves the review, rating, and ranking of applications by disciplinary and interdisciplinary scientists and engineers, and other professional graduate education experts.

The primary responsibility of each panel is to evaluate the merit of eligible GRFP applications by applying the National Science Board-approved Merit Review Criteria of Intellectual Merit and Broader Impacts, and to subsequently recommend applicants for NSF Graduate Research Fellowships. Reviewers are instructed to review the applications holistically in the context of applying NSF's Merit Review Criteria and the GRFP emphasis on demonstrated potential for significant research achievements in STEM or in STEM education. NSF determines the successful applicants from these recommendations, with Fellowships and Honorable Mention offered based on the GRFP portfolio within the context of NSF's mission. After NSF Fellowship offers are made, applicants are able to view verbatim reviewer comments, excluding the names of the reviewers, for a limited period of time through the NSF GRFP FastLane website.

VII. AWARD ADMINISTRATION INFORMATION

A. Notification of the Award

NSF Graduate Research Fellowship Program applicants will be notified of the outcomes of their applications by early April of the competition year. The NSF publishes lists of Fellowship and Honorable Mention recipients on the GRFP website at http://www.fastlane.nsf.gov/grfp/ in early April.

B. Award Conditions

An NSF Graduate Research Fellowship award consists of the award notification letter that includes the applicable terms and conditions and Fellowship management instructions. All Fellowships are made subject to the provisions (and any subsequent amendments) contained in the document NSF 16-104: Administrative Guide for Fellows and GRFP Coordinating Officials.

The applicant must accept or decline the Fellowship by May 1 of the competition year by logging into the Graduate Research Fellowship Program link at: http://www.fastlane.nsf.gov/grfp/ with the applicant User ID and password. Failure to comply with the deadline and acceptance of Fellowship Terms and Conditions by the deadline will result in revocation of the Fellowship offer and render applicants ineligible to re-apply.

NSF will award GRFP Fellowship Grants to the Institution providing funds for NSF Fellows who have "on tenure" status. The Institution will accept such grants, including any amendments to them and administer them in accordance with the terms of the Agreement and provisions (and any subsequent amendments) contained in the document NSF 16-104: Administrative Guide for Fellows and GRFP Coordinating Officials.

Terms and Conditions

Awardees must formally accept and agree to the terms and conditions of the Fellowship award. Acceptance of the Fellowship constitutes a commitment to pursue a graduate degree in an eligible science or engineering field. Acceptance of a Fellowship award is an explicit acceptance of this commitment and assurance that the Fellow will be duly enrolled in a graduate degree program consistent with the field of study indicated in their application by the beginning of the following academic year. Major changes in scope later in the graduate career require NSF approval. NSF 16-104: Administrative Guide for Fellows and GRFP Coordinating Officials includes the terms and conditions that apply to the Fellowship and subsequent institutional award, in addition to the eligibility requirements (U.S. citizenship, degree requirements and field of study) and Certifications in the application. Each institution, in accepting the funds, also certifies that the Fellows are eligible to receive the Fellowship under these terms and conditions. Fellows are expected to make satisfactory academic progress towards completion of their graduate degrees, as defined and certified by the Fellow's GRFP institution. In cases where Fellows have misrepresented their eligibility, or have failed to comply with the Fellowship Terms and Conditions, the Fellowship will be revoked, and the case may be referred to the Office of the Inspector General for investigation. This action may result in requiring the Fellow to repay Fellowship funds to the National Science Foundation.

An individual may not accept the Graduate Research Fellowship if the individual accepts or is supported by another federal graduate fellowship.

Responsible Conduct of Research

It is the responsibility of the Fellow, in conjunction with the GRFP institution, to ensure that all academic and research activities carried out in or outside the US comply with the laws or regulations of the US and/or of the foreign country in which the academic and/or research activities are conducted. These include appropriate human subject, animal welfare, copyright and intellectual property protection, and other regulations or laws, as appropriate. All academic and research activities should be coordinated with the appropriate US and foreign government authorities, and necessary licenses, permits, or approvals must be obtained prior to undertaking the proposed activities.

In response to the America Competes Act, all Fellows supported by NSF to conduct research are required to receive appropriate training and oversight in the Responsible and Ethical Conduct of Research.

Research Involving Human Subjects
Projects involving research with human subjects must ensure that subjects are protected from research risks in conformance with the relevant Federal policy known as the Common Rule (Federal Policy for the Protection of Human Subjects, 45 CFR 600). All projects involving human subjects must either (1) have approval from the organization’s Institutional Review Board (IRB) or (2) must affirm that the IRB or an appropriate knowledgeable authority previously designated by the organization (not the Fellow) has declared the research exempt from IRB review, in accordance with the applicable subsection, as established in section 101(b) of the Common Rule. Fellows are required to comply with this policy and adhere to the organization’s protocol for managing research involving human subjects.

Research Involving Vertebrate Animals

Any project proposing use of vertebrate animals for research or education shall comply with the Animal Welfare Act [7 U.S.C. 2131 et seq.] and the regulations promulgated thereunder by the Secretary of Agriculture [9 CFR 1.1-4.11] pertaining to the humane care, handling, and treatment of vertebrate animals held or used for research, teaching or other activities supported by Federal awards. In accordance with these requirements, proposed projects involving use of any vertebrate animal for research or education must be approved by the submitting organization’s Institutional Animal Care and Use Committee (IACUC). For this approval to be accepted by NSF, the organization must have a current Public Health Service (PHS) Approved Assurance.

Projects involving the care or use of vertebrate animals at a foreign organization or foreign field site also require approval of research protocols by the US grantee’s IACUC. If the project is to be funded through an award to a foreign organization or through an individual Fellowship award that will support activities at a foreign organization, NSF will require a statement of compliance that the activities will be conducted in accordance with all applicable laws in the foreign country and that the International Guiding Principles for Biomedical Research Involving Animals (see http://www.cioms.ch/) will be followed.

Legal Rights to Intellectual Property

The National Science Foundation claims no rights to any inventions or writings that might result from its fellowship or traineeship grants. However, fellows and trainees should be aware that the NSF, another Federal agency, or some private party may acquire such rights through other support for particular research. Also, fellows and trainees should note their obligation to include an Acknowledgment and Disclaimer in any publication.

C. Reporting Requirements

Acknowledgment of Support and Disclaimer

All publications, presentations, and creative works based on activities conducted during the Fellowship must acknowledge NSF GRFP Support and provide a disclaimer by including the following statement in the Acknowledgements or other appropriate section:

“This material is based upon work supported by the National Science Foundation Graduate Research Fellowship Program under Grant No. (NSF grant number). Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation.”

Annual Activities Report and Annual Fellowship Status Declaration

Fellows are required to submit an Annual Activities Report and to complete Fellowship Status Declaration by May 1 each year, using NSF’s FastLane GRFP electronic fellowship management and reporting system. The system permits electronic submission and updating of activity reports, including information on research accomplishments and activities related to broader impacts, presentations, publications, teaching and research assistantships, awards and recognitions, and other scholarly and service accomplishments. These reports are reviewed and satisfactory progress verified by the faculty advisor or designated graduate program administrator prior to submission to NSF.

Fellows must declare their intent to utilize the Fellowship for the following year using the NSF GRFP FastLane Fellowship management and reporting system. Failure to declare Fellowship status by the established deadline violates the terms and conditions for NSF Fellowship awards, and results in termination of the Fellowship.

Program Evaluation

The Division of Graduate Education (DGE) conducts evaluations to provide evidence on the impact of the GRFP on individuals’ educational decisions, career preparations, aspirations and progress, as well as professional productivity; and provide an understanding of the program policies in achieving the program goals. Additionally, it is highly desirable to have a structured means of tracking Fellows beyond graduation to gauge the extent to which they choose a career path consistent with the intent of the program and to assess the impact the NSF Graduate Research Fellowship has had on their graduate education experience. Accordingly, Fellows and Honorable Mention recipients may be contacted for updates on various aspects of their employment history, professional activities and accomplishments, participation in international research collaborations, and other information helpful in evaluating the impact of the program. Fellows and their institutions agree to cooperate in program-level evaluations conducted by the NSF and/or contracted evaluators. The 2014 GRFP evaluation is posted on the “Evaluation Reports” Web page for NSF’s Education and Human Resources Directorate: https://www.nsf.gov/ehr/Evaluation_Resources.jsp.

GRFP institutions are required to submit the GRFP Completion Report annually. The Completion Report allows GRFP institutions to certify the current status of all GRFP Fellows at the institution. The current status will identify a Fellow as: In Progress, Graduated, Transferred, or Withdrawn. For Fellows who have graduated, the graduation date is a required reporting element.

VIII. AGENCY CONTACTS

Please note that the program contact information is current at the time of publishing. See program website (https://www.nsf.gov/funding/pgm_summ.jsp?pims_id=6201) for any updates to the points of contact.
General inquiries regarding this program should be made to:

- Susan Brennan, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Jong-on Hahm, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Christopher Hill, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Tyrone Mitchell, telephone: (866) 673-4737, email: info@nsfgrfp.org
- Applications, contact: GRF Operations Center, telephone: (866) 673-4737, email: info@nsfgrfp.org

For questions related to the use of FastLane, contact:

- FastLane Help Desk, telephone: 1-800-673-6188; e-mail: fastlane@nsf.gov.

The Graduate Research Fellowship Operations Center is responsible for processing applications and responding to requests for information. General inquiries regarding the Graduate Research Fellowship Program should be made to:

Graduate Research Fellowship Operations Center, telephone: 866-NSF-GRFP, 866-673-4737 (toll-free from the US and Canada) or 202-331-3542 (international). email: info@nsfgrfp.org

IX. OTHER INFORMATION

The NSF website provides the most comprehensive source of information on NSF Directorates (including contact information), programs and funding opportunities. Use of this website by potential proposers is strongly encouraged. In addition, *NSF Update* is an information-delivery system designed to keep potential proposers and other interested parties apprised of new NSF funding opportunities and publications, important changes in proposal and award policies and procedures, and upcoming NSF Grants Conferences. Subscribers are informed through e-mail or the user's Web browser each time new publications are issued that match their identified interests. "NSF Update" also is available on NSF's website.

Grants.gov provides an additional electronic capability to search for Federal government-wide grant opportunities. NSF funding opportunities may be accessed via this mechanism. Further information on Grants.gov may be obtained at http://www.grants.gov.

Students are encouraged to gain professional experience in other countries through their university graduate programs, and to participate in international research opportunities offered by NSF at: https://www.nsf.gov/od/oise/stud-early-career.jsp. Other funding opportunities for students are available at http://www.nsfgrfp.org/.

ABOUT THE NATIONAL SCIENCE FOUNDATION

The National Science Foundation (NSF) is an independent Federal agency created by the National Science Foundation Act of 1950, as amended (42 USC 1861-75). The Act states the purpose of the NSF is "to promote the progress of science; [and] to advance the national health, prosperity, and welfare by supporting research and education in all fields of science and engineering."

NSF funds research and education in most fields of science and engineering. It does this through grants and cooperative agreements to more than 2,000 colleges, universities, K-12 school systems, businesses, informal science organizations and other research organizations throughout the US. The Foundation accounts for about one-fourth of Federal support to academic institutions for basic research.

NSF receives approximately 55,000 proposals each year for research, education and training projects, of which approximately 11,000 are funded. In addition, the Foundation receives several thousand applications for graduate and postdoctoral fellowships. The agency operates no laboratories itself but does support National Research Centers, user facilities, certain oceanographic vessels and Arctic and Antarctic research stations. The Foundation also supports cooperative research between universities and industry, US participation in international scientific and engineering efforts, and educational activities at every academic level.

Facilitation Awards for Scientists and Engineers with Disabilities (FASED) provide funding for special assistance or equipment to enable persons with disabilities to work on NSF-supported projects. See the NSF Proposal & Award Policies & Procedures Guide Chapter I.E.6 for instructions regarding preparation of these types of proposals.

The National Science Foundation has Telephonic Device for the Deaf (TDD) and Federal Information Relay Service (FIRS) capabilities that enable individuals with hearing impairments to communicate with the Foundation about NSF programs, employment or general information. TDD may be accessed at (703) 292-5090 and (800) 281-8749, FIRS at (866) 877-8339.

The National Science Foundation Information Center may be reached at (703) 292-5111.

The National Science Foundation promotes and advances scientific progress in the United States by competitively awarding grants and cooperative agreements for research and education in the sciences, mathematics, and engineering.

To get the latest information about program deadlines, to download copies of NSF publications, and to access abstracts of awards,
PRIVACY ACT AND PUBLIC BURDEN STATEMENTS

The information requested on the application materials is solicited under the authority of the National Science Foundation Act of 1950, as amended. It will be used in connection with the selection of qualified applicants and may be disclosed to qualified reviewers as part of the review process; to the institution the nominee, applicant or fellow is attending or is planning to attend or is employed by for the purpose of facilitating review or award decisions, or administering fellowships or awards; to government contractors, experts, volunteers and other individuals who perform a service to or work under a contract, grant, cooperative agreement, advisory committee, committee of visitors, or other arrangement with the Federal government as necessary to complete assigned work; to other government agencies needing data regarding applicants or nominees as part of the review process, in order to coordinate programs; and to another Federal agency, court or party in a court or Federal administrative proceeding if the government is a party. Information from this system may be merged with other computer files to carry out statistical studies the results of which do not identify individuals. Notice of the agency’s decision may be given to nominators, and disclosure may be made of awardees’ names, home institutions, and fields of study for public information purposes. For fellows or awardees receiving stipends directly from the government, information is transmitted to the Department of the Treasury to make payments. See System of Records, NSF-12, “Fellowships and Other Awards,” 63 Federal Register 265 (January 5, 1998). Submission of the information is voluntary; however, failure to provide full and complete information may reduce the possibility of your receiving an award.

An agency may not conduct or sponsor, and a person is not required to respond to, an information collection unless it displays a valid Office of Management and Budget (OMB) control number. The OMB control number for this collection is 3145-0023. Public reporting burden for this collection of information is estimated to average 12 hours per response, including the time for reviewing instructions. Send comments regarding this burden estimate and any other aspect of this collection of information, including suggestions for reducing this burden, to:

Suzanne H. Plimpton
Reports Clearance Officer
Office of the General Counsel
National Science Foundation
Arlington, VA 22230

X. APPENDIX

NATIONAL SCIENCE FOUNDATION GRADUATE RESEARCH FELLOWSHIPS

Fields of Study

Note: Applications are reviewed in panels based on the selection of a primary Field of Study. Selection of a primary Field of Study determines the application deadline, the panel that will review the application, and the designated Field of Study for awardees. Applicants may select “other” if their Field of Study is not represented in the list under each Primary Field of Study. The “other” field of study category should be selected by applicants only if the proposed field of study is not covered by one of the following fields, and should not be used to designate a field of study that is more specific than the fields listed.

CHEMISTRY

Chemical Catalysis
Chemical Measurement and Imaging
Chemical Structure, Dynamics, and Mechanism
Chemical Synthesis
Chemical Theory, Models and Computational Methods
Chemistry of Life Processes
