This solicitation has been archived and replaced by NSF 21-580.

CyberCorps(R) Scholarship for Service (SFS)
Defending America’s Cyberspace

PROGRAM SOLICITATION
NSF 19-521

REPLACES DOCUMENT(S):
NSF 17-556

National Science Foundation
Directorate for Education & Human Resources
Division of Graduate Education

Full Proposal Deadline(s) (due by 5 p.m. submitter's local time):

- February 04, 2019
- July 31, 2019
- July 31, 2020

IMPORTANT INFORMATION AND REVISION NOTES

- The Capacity Track has been removed. Proposals addressing cybersecurity education capacity may be submitted via the Education Designation in the NSF-wide Secure and Trustworthy Cyberspace (SaTC-EDU) program.
- Scholarship terms have been updated to comply with the recent amendments to 15 U.S. Code § 7442.
- The undergraduate stipend was increased by $2,500.

Any proposal submitted in response to this solicitation should be submitted in accordance with the revised NSF Proposal & Award Policies & Procedures Guide (PAPPG) (NSF 19-1), which is effective for proposals submitted, or due, on or after January 28, 2019.

SUMMARY OF PROGRAM REQUIREMENTS

General Information

Program Title:
CyberCorps(R) Scholarship for Service (SFS)

Synopsis of Program:
Cyberspace has transformed the daily lives of people. Society’s overwhelming reliance on cyberspace, however, has exposed its fragility and vulnerabilities: corporations, agencies, national infrastructure and individuals continue to suffer cyber-attacks. Achieving a truly secure cyberspace requires addressing both challenging scientific and engineering problems involving many components of a system, and vulnerabilities that stem from human behaviors and choices. Examining the fundamentals of security and privacy as a multidisciplinary subject can lead to fundamentally new ways to design, build and operate cyber systems, protect existing infrastructure, and motivate and educate individuals about cybersecurity. The Cybersecurity Enhancement Act of 2014, as amended by the National Defense Authorization Act for FY 2018, authorizes the National Science Foundation, in coordination with the Office of Personnel Management and the Department of Homeland Security, to offer a scholarship program to recruit and train the next generation of information technology professionals, industry control system security professionals and security managers to meet the needs of the cybersecurity mission for federal, state, local, and tribal governments.

The goals of the CyberCorps(R): Scholarship for Service (SFS) program are aligned with the U.S. National Cyber Strategy to develop a superior cybersecurity workforce. The SFS program welcomes proposals to establish or to continue scholarship programs in cybersecurity. All scholarship recipients must work after graduation for a federal, state, local, or tribal Government organization in a position related to cybersecurity for a period equal to the length of the scholarship. A proposing institution must provide clearly documented evidence of a strong existing academic program in cybersecurity. Such evidence can include designation by the National Security Agency and the Department of Homeland Security as a Center of Academic Excellence in Cyber Defense (CAE-CD), in Cyber Operations (CAE-CO) or in Research (CAE-R); or equivalent evidence documenting a strong program in cybersecurity.

The SFS program also supports efforts leading to an increase in the ability of the United States higher education enterprise to produce
cybersecurity professionals. Funding opportunities in this area are provided via the Secure and Trustworthy Cyberspace - Education Designation (SaTC-EDU) and other programs (see the section “Increasing National Capacity in Cybersecurity Education” for more details.)

Cognizant Program Officer(s):

Please note that the following information is current at the time of publishing. See program website for any updates to the points of contact.

- Victor P. Piotrowski, Lead Program Director, telephone: (703) 292-5141, email: vpiotrow@nsf.gov
- Li Yang, Program Officer, telephone: (703) 292-2677, email: liyang@nsf.gov
- Nigamanth Sridhar, Program Officer, telephone: (703) 292-2677, email: nsridhar@nsf.gov

Applicable Catalog of Federal Domestic Assistance (CFDA) Number(s):

- 47.076 — Education and Human Resources

Award Information

Anticipated Type of Award: Standard Grant or Continuing Grant

Estimated Number of Awards: 8 to 12

Anticipated Funding Amount: $15,000,000

The estimated number of awards and the anticipated funding amount listed above are for new awards in FY 2019. The number of awards and funding level in FY 2020 and FY 2021 are anticipated to be similar to FY 2019. Funding amounts depend on availability of funds.

Eligibility Information

Who May Submit Proposals:

Proposals may only be submitted by the following:

- Institutions of Higher Education (IHEs) accredited in, and having a campus located in the US, acting on behalf of their faculty members. Community colleges are eligible only as either non-lead collaborating institutions or sub-awardees of the partnering four-year SFS institutions as described in the Program Description section.

Who May Serve as PI:

As of the submission deadline, PIs, co-PIs, or other senior project personnel must hold primary, full-time, paid appointments in research or teaching positions at US-based campuses of institutions eligible to submit to this solicitation (see above), with exceptions granted for family or medical leave, as determined by the submitting institution.

Limit on Number of Proposals per Organization:

There are no restrictions or limits.

Limit on Number of Proposals per PI or Co-PI: 1

An individual may participate as PI, Co-PI, or Senior Personnel in at most one proposal per annual SFS competition.

Proposal Preparation and Submission Instructions

A. Proposal Preparation Instructions

- Letters of Intent: Not required
- Preliminary Proposal Submission: Not required
- Full Proposals:

B. Budgetary Information
Cost Sharing Requirements:
Inclusion of voluntary committed cost sharing is prohibited.

- Indirect Cost (F&A) Limitations:
  Not Applicable
- Other Budgetary Limitations:
  Other budgetary limitations apply. Please see the full text of this solicitation for further information.

C. Due Dates
- Full Proposal Deadline(s) (due by 5 p.m. submitter's local time):
  February 04, 2019
  July 31, 2019
  July 31, 2020

Proposal Review Information Criteria

Merit Review Criteria:
National Science Board approved criteria. Additional merit review criteria apply. Please see the full text of this solicitation for further information.

Award Administration Information

Award Conditions:
Standard NSF award conditions apply.

Reporting Requirements:
Standard NSF reporting requirements apply.

I. INTRODUCTION
Cyberspace has transformed the daily lives of people and became critical to national priorities in commerce, education, energy, financial services, healthcare, manufacturing, and defense. Society’s overwhelming reliance on cyberspace, however, has exposed its fragility and vulnerabilities. The risks of hyper-connectedness are becoming more apparent. The privacy of personally identifiable information is often violated on a massive scale by persons unknown. The United States’ competitive advantage is eroded by the exfiltration of significant intellectual property. Law enforcement is hobbled by the difficulty of attribution, national boundaries, and uncertain legal and ethical frameworks. All of these concerns now affect the public’s trust of cyberspace
and the ability of institutions to fulfill their missions.

The National Science and Technology Council, with the cooperation of NSF, released the Federal Cybersecurity Research and Development Strategic Plan. This plan is a broad, coordinated Federal strategic plan for cybersecurity research and development, produced in order to preserve the growing social and economic benefits of cyberspace by thwarting adversaries and strengthening public trust of cyber systems. The plan calls for socio-technical approaches that consider human, social, organizational, economic, and technical factors, and the complex interaction among them in the creation, maintenance, and operation of secure systems and infrastructure. The plan underscores the need for research in cybersecurity education to satisfy the present and future workforce demands for qualified cybersecurity professionals. In addition, NSF contributes to multi-agency efforts for the National Initiative for Cybersecurity Education (NICE). NSF recognizes that cybersecurity education and workforce development form critical elements for a successful implementation and transition to practice of any advances in cybersecurity research and development.

II. PROGRAM DESCRIPTION

Cybersecurity is arguably one of the most important challenges confronting society in the information age. Neither governments nor individuals are exempt from the ravages of malicious cyber acts upon imperfect technologies. Posing cyber conflict solely in terms of classic attackers and defenders understates the diversity and subtlety of the motivations, incentives, ethics, asymmetries, and strategies of the constituent actors in cyberspace. The intelligent adversary, whether a nation-state actor, an activist group or a criminal, learns and evolves to exploit, disrupt, and overpower. Addressing this challenge requires a coordinated multi-disciplinary approach, contributing to the body of knowledge on cybersecurity in multiple disciplines, and leading to practical, deployable technologies. These efforts require an innovative and efficient cybersecurity education system that will create an unrivaled cybersecurity workforce critical to US national security, continued economic growth and future technological innovation in secure cyberspace.

The goals of the CyberCorps(R): Scholarship for Service (SFS) program are aligned with the U.S. National Cyber Strategy to develop a superior cybersecurity workforce. The SFS program welcomes proposals to establish or to continue scholarship programs in cybersecurity. All scholarship recipients must work after graduation for a federal, state, local, or tribal government organization in a position related to cybersecurity for a period equal to the duration of the scholarship. A proposing institution must provide clearly documented evidence of a strong existing academic program in cybersecurity. Such evidence can include designation by the National Security Agency and the Department of Homeland Security as a Center of Academic Excellence in Cyber Defense (CAE-CD), in Cyber Operations (CAE-CO) or in Research (CAE-R); or equivalent evidence documenting a strong program in cybersecurity. The SFS program also supports efforts leading to an increase in the ability of the United States higher education enterprise to produce cybersecurity professionals.

SFS Scholarships

The SFS program provides funds to institutions of higher education for student scholarships in support of education in areas relevant to cybersecurity. Each scholarship recipient, as a condition of receiving a scholarship under the SFS program, enters into an agreement under which the recipient, upon receipt of academic degree, agrees to work for a period equal to the duration of the scholarship in the cybersecurity mission of an executive agency (as defined in 5 U.S. Code § 105) or, subject to a prior approval, in the cybersecurity mission of:

1. Congress, including any agency, entity, office, or commission established in the legislative branch;
2. an interstate agency;
3. a state, local, or tribal government; or
4. a state, local, or tribal government-affiliated non-profit organization that is considered to be critical infrastructure (as defined in 42 U.S. Code § 5195c(e)).

The U.S. Office of Personnel Management (OPM) partners with NSF in this program by providing assistance to SFS scholarship students, by coordinating students' transition into government employment, by monitoring students' compliance with program requirements, and by assessing whether the program helps meet the personnel needs of the federal government for information infrastructure protection. Grantee institutions provide scholarship support to students who compete successfully in a selection process developed by the institution, who meet the SFS eligibility criteria, and who are confirmed by OPM as qualified for employment in a cybersecurity related position.

The program's goal is a full student placement in government cybersecurity positions with at least 80 percent of scholarship recipients securing placement in an executive agency. While SFS scholarship recipients are responsible for their own job searches, the OPM/SFS program office provides several tools to aid in the job search, including annual job fairs. PIs and SFS scholarship students are expected to participate actively with OPM to secure both a summer internship and permanent placement in a federal, state, local or tribal government organization. With permission of the OPM/SFS program office, a limited number of students may be placed in National Laboratories and Federally Funded Research and Development Centers (FFRDCs). (See http://www.firstgov.gov/Agencies.shtml for a list of federal, state, local and tribal government agencies; see https://science.energy.gov/sbir/applicant-resources/national-labs-profiles-and-contacts/ for a list of National Laboratories; see https://www.nsf.gov/statistics/ffrdclist/ for a list of FFRDCs.) Materials to assist PIs and scholarship recipients with the placement process are available through the SFS support website: http://www.sfs.opm.gov.

During the scholarship period, students must participate in meaningful summer internships. Doctoral students may be allowed to replace their summer internship with a research activity following a recommendation from their academic advisor and approval of the NSF/SFS program office. Students must also participate in other SFS activities such as conferences, workshops, and seminars. These activities are aimed at developing a community of practice that will enhance students' individual and collective skills in an area increasingly important to the security of the United States.

To be eligible for consideration for an SFS scholarship, a student must:

1. be a citizen or lawful permanent resident of the United States;
2. demonstrate a commitment to a career in improving the security of information technology;
3. have demonstrated a high level of competency in relevant knowledge, skills, and abilities, as defined by the NICE Cybersecurity Workforce Framework;
4. be a full-time student within three years of graduation with a bachelor's or master's degree in a coherent formal program that is focused on cybersecurity at an awardee institution; or be a research-based doctoral student.

Sophomores at community colleges are eligible for one year of support if there is a formal agreement between their community college and a four-year institution to transfer the student for two years of additional support to complete a bachelor's degree. A community college is eligible only as either a non-lead collaborating institution or a sub-awardee of the partnering four-year SFS institution. A supported student who is enrolled in a community college is
allowed to pursue a degree on a less than full-time basis, but not less than half-time basis.

Each proposing institution must provide a description of its selection criteria and process, and, if selected for an award, must submit their lists of candidates for SFS scholarships to OPM for final eligibility confirmation. Internship placements and final job placements in government organizations typically require high-level security clearances, and scholarship recipients are required to undergo the background investigation necessary to obtain such clearances as part of the job and/or internship application process.

Applications from institutions that have not previously participated in the SFS program will be considered separately from proposals from renewing institutions. Institutions with existing SFS scholarship programs must clearly indicate that they are applying for a renewal in the title and project summary and must provide:

- specific evidence of their current SFS program achievements. Indicators of program success include, but are not limited to, placement statistics, faculty development activities, integration of research and education, mentoring of non-SFS institutions, partnerships with government and relevant employment sectors, and curricular innovations.
- specific plans and/or evidence of program sustainability and/or institutionalization efforts including information on students without SFS scholarships who were placed in government jobs and the retention of SFS scholarship recipients in the federal workforce beyond their initial obligation.

Proposing institutions, regardless of whether they submit new or renewal proposals, must have clearly articulated management and administrative plans for the following program elements:

- Verification of scholarship candidates' eligibility, including the recipients' academic merit, appropriate professional skills, and enrollment in a cybersecurity program.
- Budgeting for scholarships consisting of stipends, tuition, education-related fees, and other allowances described below. Scholarships are not based on student financial need.
- Provision of academic-year stipends of $25,000 per year for undergraduate students and $34,000 per year for graduate students. These charges shall be included in the budget under Participant Support costs.
- Provision of scholarship amounts to be used for expenses normally incurred by full-time students at the institution, including tuition and education related fees (does not include items such as meal plans, housing, or parking); and a professional allowance of $6,000 per academic year for SFS Job Fair and other travel, books, professional certifications, etc. These shall be included in the budget under Participant Support costs.
- Provision for coordination with OPM for summer internships and permanent job placements for each student. Students are required to take government internship positions in the summer between their first and second year of scholarship study and are encouraged to take an additional internship in the following year. Summer internships typically are paid by the hiring agency. Funding for summer internships should not be included in the proposed SFS budget. Doctoral students may be allowed to substitute research activity for their summer internship following the recommendation of their academic advisor and approval of the NSF program office.
- Provisions for tracking the academic progress of students to determine their continued eligibility throughout the academic part of the program. Post-graduation tracking of students to verify that they meet the service obligation will be the joint responsibility of OPM and the academic institution.
- Clearly stated goals and an evaluation plan explaining how the goals will be measured. Evaluation plans should include both a strategy for monitoring the project as it evolves to provide feedback to guide these efforts (formative evaluation) and a strategy for evaluating the effectiveness of the project in achieving its goals and for identifying positive and constructive findings when the project is completed (summative evaluation). The awardees are expected to cooperate with the SFS program-level monitoring and evaluation system.

The above items must be clearly detailed in the Budget Justification section, or other appropriate sections of the proposal.

Scholarship funds awarded to students for stipends, tuition and education related fees, and student support allowances must be listed as Participant Support Costs in the NSF proposal budget (Line F on the FastLane budget and Field E on the Grants.gov Budget). Additional funds up to 20% of the total Participant Support Costs listed in the proposal budget may be requested for activities in other cost categories (e.g., faculty and staff salaries, travel, materials, supplies etc.) that contribute to the effectiveness of the Scholarship program and to the SFS goal of creating and maintaining a robust cybersecurity workforce. Any such costs must be listed under the appropriate NSF budget categories and must be explained in the Budget Justification.

The Principal Investigator will have overall responsibility for the administration of the institution's award, the management of the project, and interactions with NSF and OPM. The PI and the grantee institution are expected to have or to develop an administrative structure that enables faculty, academic administrators, scholarship recipients, and others involved in the project to interact productively during the award period. The PI is expected to be an integral participant in the educational activities of the SFS project and is required to participate in boot camps, annual job fairs, symposia and other SFS-sponsored activities.

A proposing institution must provide clearly documented evidence of a strong existing academic program in cybersecurity. Such evidence can include designation by the National Security Agency and the Department of Homeland Security as a Center of Academic Excellence in Cyber Defense (CAE-CD), in Cyber Operations (CAE-CO) or in Research (CAE-R); or equivalent evidence documenting a strong program in cybersecurity.

A focus on recruiting and retaining underrepresented minorities, women, first-generation/low-income students, persons with disabilities, or veterans is strongly encouraged. Application by and partnerships with minority institutions, as recognized by the U.S. Department of Education's list, is encouraged (see http://www.ed.gov/about/offices/list/ocr/edlite-minorityinst.html for a list of qualifying institutions). SFS especially welcomes proposals that will support the efforts of NSF INCLUDES to develop STEM talent from all sectors and groups of society (https://www.nsf.gov/news/special_reports/nsfincludes/index.jsp).

Institutional Responsibilities

The institution receiving the award ("Awardee") shall require that each recipient of a scholarship accepts the terms of the scholarship and agrees to provide the institution and OPM with annual certification of employment and up-to-date contact information for the period defined in the OPM service agreement. The recipients must also agree to participate in surveys conducted by the project and/or program evaluators as part of project-level and program evaluation efforts. Monitoring the compliance of scholarship recipients with respect to completing their service requirements will be the joint responsibility of OPM and the Awardee. As required by the 15 U.S. Code § 7442, a SFS scholarship recipient shall be financially liable to the United States if the individual:

1. fails to maintain an acceptable level of academic standing;
2. is dismissed from the applicable institution of higher education for disciplinary reasons;
3. withdraws from the eligible degree program before completing the program;
4. declares that the individual does not intend to fulfill the post-award employment obligation; or
5. fails to fulfill the post-award employment obligation.

Failure to satisfy the academic requirements of the program or to complete the service requirement will result in forfeiture of the scholarship award, which must be repaid or revert by the institution to a student loan with repayments pro-rated accordingly to reflect partial service completed.

The Awardee is responsible for collecting the repayment amounts, including interest, consistent with the provisions of a Federal Direct Unsubsidized Stafford Loan under part D of Title IV of the Higher Education Act of 1965. All forfeited scholarship funds, less reasonable, allocable, and allowable Awardee costs associated with collection of the repayment not to exceed 5% of the forfeited amount, will be returned to the United States Treasury and may not be re-used by the Awardee. Scholarship recipients in coordination with the Awardee and the PI may petition the SFS program office for the partial or total waiver or suspension of any service or payment obligation whenever compliance by the individual with the obligation is impossible or would involve extreme hardship to the individual, or if enforcement of such obligation with respect to the individual would be unconscionable. The institutions shall consider using Forgivable Loan Promissory Notes or similar agreements between the institution and the student. Additional guidelines will be provided to institutions that receive Scholarship awards.

Increasing National Capacity in Cybersecurity Education

The SFS program supports efforts that are likely to lead to an increase in the ability of the United States higher education enterprise to produce cybersecurity professionals. The proposals may be submitted via the Education Designation in the NSF-wide Secure and Trustworthy Cyberspace (SaTC-EDU) program. More information can be found at https://www.nsf.gov/publications/pub_summ.jsp?ods_key=nsf18572. Also, as authorized by 15 U.S. Code § 7442, the SFS program in partnership with the National Security Agency (NSA) provides funding to improve cybersecurity education at the kindergarten through 12th grade to:

1. increase interest in cybersecurity careers;
2. help students practice correct and safe online behavior and understand the foundational principles of cybersecurity;
3. improve teaching methods for delivering cybersecurity content for kindergarten through grade 12 computer science curricula; and
4. promote teacher recruitment in the field of cybersecurity.

The proposals addressing these efforts can be submitted to the GenCyber program at https://www.gen-cyber.com/host. Dear Colleague Letters (DCLs) may also be issued to inform the community about upcoming opportunities or special competitions for proposals addressing emerging areas of cybersecurity education and workforce development.

Program Evaluation

NSF conducts on-going program monitoring and evaluation to determine how effectively the SFS program is achieving its goals. These goals are to increase the quantity of new entrants to the government cyber workforce, to increase the national capacity for the education of cybersecurity professionals, to increase national research and development capabilities in critical information infrastructure protection, and to strengthen partnerships between institutions of higher education and relevant employment sectors. In addition to project-specific evaluations, all project participants are expected to cooperate with this third-party program evaluation and respond to all inquiries, including requests to participate in surveys, interviews and other approaches for collecting evaluation data. Additional guidelines will be provided to institutions that receive Scholarship awards. Project-specific evaluations should provide indicators of program achievement including, but not limited to, the areas of placement, student achievement, faculty development, curriculum and institutional partnerships.

Special Projects

The program is also interested in ideas for forward-looking or unconventional activities that show real promise to have a broad national impact on cybersecurity education and workforce development, but which fall outside the SFS and SaTC-EDU program boundaries. Principal investigators who have such ideas must first discuss them with a SFS program officer. If the program officer agrees that the activities would be appropriate for consideration by the program, the program officer may encourage the submission of an unsolicited proposal.

III. AWARD INFORMATION

The SFS Scholarship award supports up to three years of stipends, tuition and allowances for students in the general area of cybersecurity. The scholarships provide academic year stipends of $25,000 per year for undergraduate students and $34,000 per year for graduate students. In addition, SFS scholarships cover expenses normally incurred by full-time students in the institution, including tuition and education related fees (does not include items such as meal plans, housing, or parking); and a professional allowance of $6,000 per academic year for the SFS Job Fair and other travel, books, professional certifications etc. These shall be included in the budget under Participant Support costs.

The tuition amount in the proposal budget should reflect an average tuition that would be applied to a similar student without an SFS scholarship. The U.S. Department of Education College Affordability and Transparency Center provides information about average tuition and net prices at postsecondary institutions that will be used to assess the proposal’s budget. After accepting a negotiated net cost, the institution is required to exempt SFS scholars from paying any tuition and fees unless such charges are optional or are refundable.

NSF anticipates that approximately $15 million will be available for new awards in FY 2019, pending the availability of funds. Scholarship awards are usually funded as continuing grants over a five-year period. A typical award might be approximately $2-4 million for five years supporting four cohort classes of five students each. Depending on the quality of proposals received, the program expects to make 8-12 scholarship awards. The estimated program budget, number of awards and average award size/duration are subject to the availability of funds.
IV. ELIGIBILITY INFORMATION

Who May Submit Proposals:

Proposals may only be submitted by the following:

- Institutions of Higher Education (IHEs) accredited in, and having a campus located in the US, acting on behalf of their faculty members. Community colleges are eligible only as either non-lead collaborating institutions or sub-awardees of the partnering four-year SFS institutions as described in the Program Description section.

Who May Serve as PI:

As of the submission deadline, PIs, co-PIs, or other senior project personnel must hold primary, full-time, paid appointments in research or teaching positions at US-based campuses of institutions eligible to submit to this solicitation (see above), with exceptions granted for family or medical leave, as determined by the submitting institution.

Limit on Number of Proposals per PI or Co-PI:

- An individual may participate as PI, Co-PI, or Senior Personnel in at most one proposal per annual SFS competition.

Limit on Number of Proposals per Organization:

- There are no restrictions or limits.

Additional Eligibility Info:

A proposing institution must provide clearly documented evidence of a strong existing program in cybersecurity. Such evidence may include designation by the National Security Agency and the Department of Homeland Security as a Center of Academic Excellence in Cyber Defense (CAE-CD), in Cyber Operations (CAE-CO), or in Research (CAE-R); or equivalent evidence documenting a strong program in cybersecurity.

V. PROPOSAL PREPARATION AND SUBMISSION INSTRUCTIONS

A. Proposal Preparation Instructions

Full Proposal Preparation Instructions: Proposers may opt to submit proposals in response to this Program Solicitation via FastLane, Research.gov, or Grants.gov.

- Full proposals submitted via FastLane: Proposals submitted in response to this program solicitation should be prepared and submitted in accordance with the general guidelines contained in the NSF Proposal & Award Policies & Procedures Guide (PAPPG). The complete text of the PAPPG is available electronically on the NSF website at: https://www.nsf.gov/publications/pub_summ.jsp?ods_key=pappg. Paper copies of the PAPPG may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-8134 or by e-mail from nsfpubs@nsf.gov. Proposers are reminded to identify this program solicitation number in the program solicitation block on the NSF Cover Sheet For Proposal to the National Science Foundation. Compliance with this requirement is critical to determining the relevant proposal processing guidelines. Failure to submit this information may delay processing.

- Full Proposals submitted via Research.gov: Proposals submitted in response to this program solicitation should be prepared and submitted in accordance with the general guidelines contained in the NSF Proposal and Award Policies and Procedures Guide (PAPPG). The complete text of the PAPPG is available electronically on the NSF website at: https://www.nsf.gov/publications/pub_summ.jsp?ods_key=pappg. Paper copies of the PAPPG may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-8134 or by e-mail from nsfpubs@nsf.gov. The Prepare New Proposal setup will prompt you for the program solicitation number.

- Full proposals submitted via Grants.gov: Proposals submitted in response to this program solicitation via Grants.gov should be prepared and submitted in accordance with the NSF Grants.gov Application Guide: A Guide for the Preparation and Submission of NSF Applications via Grants.gov. The complete text of the NSF Grants.gov Application Guide is available on the Grants.gov website and on the NSF website at: (https://www.nsf.gov/publications/pub_summ.jsp?ods_key=grantsgovguide). To obtain copies of the Application Guide and Application Forms Package, click on the Apply tab on the Grants.gov site, then click on the Apply Step 1: Download a Grant Application Package and Application Instructions link and enter the funding opportunity number, (the program solicitation number without the NSF prefix) and press the Download Package button. Paper copies of the Grants.gov Application Guide also may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-8134 or by e-mail from nsfpubs@nsf.gov.

In determining which method to utilize in the electronic preparation and submission of the proposal, please note the following:

Collaborative Proposals. All collaborative proposals submitted as separate submissions from multiple organizations must be submitted via FastLane or Research.gov. PAPPG Chapter II.D.3 provides additional information on collaborative proposals.

See PAPPG Chapter II.C.2 for guidance on the required sections of a full research proposal submitted to NSF. Please note that the proposal preparation instructions provided in this program solicitation may deviate from the PAPPG instructions.

As stated in the NSF PAPPG, the entire project description must be included in the 15-page Project Description section (or part of the budget justification, bio sketch etc.). There are only a small number of exceptions allowed in the supplementary section of the proposal, such as: Postdoctoral Researcher Mentoring Plan; Plans for Data Management; Letters of Collaboration; documents asserting compliance with the National Environmental Policy Act or the Endangered Species Act; etc. See Chapter II.C.2) of the NSF PAPPG for more information. This solicitation does allow only the following additional exception: a copy of a certificate designating an institution as a Center of Academic Excellence in Information Assurance/Cyber Defense (CAE-AE/CD), Cyber Operations, or Research (CAE-R).
B. Budgetary Information

Cost Sharing:
Inclusion of voluntary committed cost sharing is prohibited.

Other Budgetary Limitations:
The SFS Scholarship award supports up to three years of stipends, tuition and allowances for students in the general area of cybersecurity. The scholarships provide academic year stipends of $25,000 per year for undergraduate students and $34,000 per year for graduate students. In addition, SFS scholarships cover expenses normally incurred by full-time students in the institution, including tuition and education related fees (does not include items such as meal plans, housing, or parking); and a professional allowance of $6,000 per academic year for SFS Job Fair and other travel, books, professional certifications etc. The funds awarded to students for stipends, tuition and education related fees, and student support allowances must be listed as Participant Support Costs in the NSF proposal budget (Line F on the FastLane budget and Field E on the Grants.gov Budget). Additional funds up to 20% of the total Participant Support Costs listed in the proposal budget may be requested for activities in other cost categories (e.g., salaries, travel, materials, supplies etc.) that contribute to the effectiveness of the Scholarship program; any such costs must be listed under the appropriate NSF budget categories and must be explained in the Budget Justification.

C. Due Dates

- Full Proposal Deadline(s) (due by 5 p.m. submitter's local time):
  - February 04, 2019
  - July 31, 2019
  - July 31, 2020

D. FastLane/Research.gov/Grants.gov Requirements

For Proposals Submitted Via FastLane or Research.gov:

To prepare and submit a proposal via FastLane, see detailed technical instructions available at: https://www.fastlane.nsf.gov/a1/newstan.htm. To prepare and submit a proposal via Research.gov, see detailed technical instructions available at: https://www.research.gov/research-portal/appmanager/base/desktop?_npfb=true&_pageLabel=research_node_display&_nodePath=/researchGov/Service/Desktop/ProposalPreparationandSubmission.html. For FastLane or Research.gov user support, call the FastLane and Research.gov Help Desk at 1-800-673-6188 or e-mail fastlane@nsf.gov or rgov@nsf.gov. The FastLane and Research.gov Help Desk answers general technical questions related to the use of the FastLane and Research.gov systems. Specific questions related to this program solicitation should be referred to the NSF program staff contact(s) listed in Section VIII of this funding opportunity.

For Proposals Submitted Via Grants.gov:

Before using Grants.gov for the first time, each organization must register to create an institutional profile. Once registered, the applicant's organization can then apply for any federal grant on the Grants.gov website. Comprehensive information about using Grants.gov is available on the Grants.gov Applicant Resources webpage: https://www.grants.gov/web/grants/applicants.html. In addition, the NSF Grants.gov Application Guide (see link in Section V.A) provides instructions regarding the technical preparation of proposals via Grants.gov. For Grants.gov user support, contact the Grants.gov Contact Center at 1-800-518-4726 or by email: support@grants.gov. The Grants.gov Contact Center answers general technical questions related to the use of Grants.gov. Specific questions related to this program solicitation should be referred to the NSF program staff contact(s) listed in Section VIII of this solicitation.

Submitting the Proposal: Once all documents have been completed, the Authorized Organizational Representative (AOR) must submit the application to Grants.gov and verify the desired funding opportunity and agency to which the application is submitted. The AOR must then sign and submit the application to Grants.gov. The completed application will be transferred to the NSF FastLane system for further processing.

Proposers that submitted via FastLane or Research.gov may use Research.gov to verify the status of their submission to NSF. For proposers that submitted via Grants.gov, until an application has been received and validated by NSF, the Authorized Organizational Representative may check the status of an application on Grants.gov. After proposers have received an e-mail notification from NSF, Research.gov should be used to check the status of an application.

VI. NSF PROPOSAL PROCESSING AND REVIEW PROCEDURES

Proposals received by NSF are assigned to the appropriate NSF program for acknowledgement and, if they meet NSF requirements, for review. All proposals are carefully reviewed by a scientist, engineer, or educator serving as an NSF Program Officer, and usually by three to ten other persons outside NSF either as ad hoc reviewers, panelists, or both, who are experts in the particular fields represented by the proposal. These reviewers are selected by Program Officers charged with oversight of the review process. Proposers are invited to suggest names of persons they believe are especially well qualified to review the proposal and/or persons they would prefer not review the proposal. These suggestions may serve as one source in the reviewer selection process at the Program Officer's discretion. Submission of such names, however, is optional. Care is taken to ensure that
The following elements should be considered in the review for both criteria:

- Additional criterion is necessary but neither, by itself, is sufficient. Therefore, proposers must fully address both criteria. (PAPPG Chapter II.C.2.d(i), contains additional information for use by proposers in development of the Project Description section of the proposal). Reviewers are strongly encouraged to review the criteria, including PAPPG Chapter II.C.2.d(i), prior to the review of a proposal.

When evaluating NSF proposals, reviewers will be asked to consider what the proposers want to do, why they want to do it, how they plan to do it, how they will know if they succeed, and what benefits could accrue if the project is successful. These issues apply both to the technical aspects of the proposal and the way in which the project may make broader contributions. To that end, reviewers will be asked to evaluate all proposals against two criteria:

- **Intellectual Merit:** The Intellectual Merit criterion encompasses the potential to advance knowledge; and
- **Broader Impacts:** The Broader Impacts criterion encompasses the potential to benefit society and contribute to the achievement of specific, desired societal outcomes.

The following elements should be considered in the review for both criteria:

1. **What is the potential for the proposed activity to**
   a. Advance knowledge and understanding within its own field or across different fields (Intellectual Merit); and
   b. Benefit society or advance desired societal outcomes (Broader Impacts)?
2. To what extent do the proposed activities suggest and explore creative, original, or potentially transformative concepts?
3. Is the plan for carrying out the proposed activities well-reasoned, well-organized, and based on a sound rationale? Does the plan incorporate a mechanism to assess success?
4. How well qualified is the individual, team, or organization to conduct the proposed activities?
5. Are there adequate resources available to the PI (either at the home organization or through collaborations) to carry out the proposed activities?

Broader impacts may be accomplished through the research itself, through the activities that are directly related to specific research projects, or through activities that are supported by, but are complementary to, the project. NSF values the advancement of scientific knowledge and activities that contribute to achievement of societally relevant outcomes. Such outcomes include, but are not limited to: full participation of women, persons with disabilities, and underrepresented minorities in science, technology, engineering, and mathematics (STEM); improved STEM education and educator development at any level; increased public scientific literacy and public engagement with science and technology; improved well-being of individuals in society; development of a diverse, globally competitive STEM workforce; increased partnerships between academia, industry, and others; improved national security; increased economic competitiveness of the United States; and enhanced infrastructure for research and education.

Proposers are reminded that reviewers will also be asked to review the Data Management Plan and the Postdoctoral Researcher Mentoring Plan, as appropriate.

Additional Solicitation Specific Review Criteria

Proposals submitted to the SFS program will be evaluated with careful attention to the following:

- A project plan and objective metrics described to evaluate the success of the proposed project.
- The extent to which the project fulfills cybersecurity education and workforce needs with broad impact across the cyber education community.
- The quality of education and research in cybersecurity at the institution and the extent to which they are integrated.
- The quality of applied experiences to increase students understanding of cybersecurity.
- The extent to which cybersecurity faculty members are integrally involved with the scholarship students and working with the students as a cohort.
- The degree to which investigators interact with the cybersecurity community to share knowledge and experience in developing and evaluating innovations.
- The opportunity for students to obtain professional certifications in cybersecurity.
- Opportunities for undergraduate research experience.

B. Review and Selection Process

Proposals submitted in response to this program solicitation will be reviewed by Panel Review.

Reviewers will be asked to evaluate proposals using two National Science Board approved merit review criteria and, if applicable, additional program specific criteria. A summary rating and accompanying narrative will generally be completed and submitted by each reviewer and/or panel. The Program Officer assigned to manage the proposal's review will consider the advice of reviewers and will formulate a recommendation.

After scientific, technical and programmatic review and consideration of appropriate factors, the NSF Program Officer recommends to the cognizant Division Director whether the proposal should be declined or recommended for award. NSF strives to be able to tell applicants whether their proposals have been declined or recommended for funding within six months. Large or particularly complex proposals or proposals from new awardees may require additional review and processing time. The time interval begins on the deadline or target date, or receipt date, whichever is later. The interval ends when the Division Director acts upon the Program Officer's recommendation.

After programmatic approval has been obtained, the proposals recommended for funding will be forwarded to the Division of Grants and Agreements for review of business, financial, and policy implications. After an administrative review has occurred, Grants and Agreements Officers perform the processing and issuance of a grant or other agreement. Proposers are cautioned that only a Grants and Agreements Officer may make commitments, obligations or awards on behalf of NSF or authorize the expenditure of funds. No commitment on the part of NSF should be inferred from technical or budgetary discussions with a NSF Program Officer. A Principal Investigator or organization that makes financial or personnel commitments in the absence of a grant or cooperative agreement signed by the NSF Grants and Agreements Officer does so at their own risk.

Once an award or declination decision has been made, Principal Investigators are provided feedback about their proposals. In all cases, reviews are treated as confidential documents. Verbatim copies of reviews, excluding the names of the reviewers or any reviewer-identifying information, are sent to the Principal Investigator/Project Director by the Program Officer. In addition, the proposer will receive an explanation of the decision to award or decline funding.

VII. AWARD ADMINISTRATION INFORMATION

A. Notification of the Award

Notification of the award is made to the submitting organization by a Grants Officer in the Division of Grants and Agreements. Organizations whose proposals are declined will be advised as promptly as possible by the cognizant NSF Program administering the program. Verbatim copies of reviews, not including the identity of the reviewer, will be provided automatically to the Principal Investigator. (See Section VI.B for additional information on the review process.)

B. Award Conditions

An NSF award consists of: (1) the award notice, which includes any special provisions applicable to the award and any numbered amendments thereto;
(2) the budget, which indicates the amounts, by categories of expense, on which NSF has based its support (or otherwise communicates any specific approvals or disapprovals of proposed expenditures); (3) the proposal referenced in the award notice; (4) the applicable award conditions, such as Grant General Conditions (GC-1); or Research Terms and Conditions* and (5) any announcement or other NSF issuance that may be incorporated by reference in the award notice. Cooperative agreements also are administered in accordance with NSF Cooperative Agreement Financial and Administrative Terms and Conditions (CA-FATC) and the applicable Programmatic Terms and Conditions. NSF awards are electronically signed by an NSF Grants and Agreements Officer and transmitted electronically to the organization via e-mail.

*These documents may be accessed electronically on NSF’s Website at https://www.nsf.gov/awards/managing/award_conditions.jsp?org=NSF. Paper copies may be obtained from the NSF Publications Clearinghouse, telephone (703) 292-8134 or by e-mail from nsfpubs@nsf.gov.

C. Reporting Requirements

For all multi-year grants (including both standard and continuing grants), the Principal Investigator must submit an annual project report to the cognizant Program Officer no later than 90 days prior to the end of the current budget period. (Some programs or awards require submission of more frequent project reports). No later than 120 days following expiration of a grant, the PI also is required to submit a final project report, and a project outcomes report for the general public.

Failure to provide the required annual or final project reports, or the project outcomes report, will delay NSF review and processing of any future funding increments as well as any pending proposals for all identified PIs and co-PIs on a given award. PIs should examine the formats of the required reports in advance to assure availability of required data.

PIs are required to use NSF’s electronic project-reporting system, available through Research.gov, for preparation and submission of annual and final project reports. Such reports provide information on accomplishments, project participants (individual and organizational), publications, and other specific products and impacts of the project. Submission of the report via Research.gov constitutes certification by the PI that the contents of the report are accurate and complete. The project outcomes report also must be prepared and submitted using Research.gov. This report serves as a brief summary, prepared specifically for the public, of the nature and outcomes of the project. This report will be posted on the NSF website exactly as it is submitted by the PI.

VIII. AGENCY CONTACTS

Please note that the program contact information is current at the time of publishing. See program website for any updates to the points of contact.

General inquiries regarding this program should be made to:

- Victor P. Piotrowski, Lead Program Director, telephone: (703) 292-5141, email: vpiotrow@nsf.gov
- Li Yang, Program Officer, telephone: (703) 292-2677, email: liyang@nsf.gov
- Nigamanth Sridhar, Program Officer, telephone: (703) 292-2677, email: nsridhar@nsf.gov

For questions related to the use of FastLane or Research.gov, contact:

- FastLane and Research.gov Help Desk: 1-800-673-6188
  FastLane Help Desk e-mail: fastlane@nsf.gov.
  Research.gov Help Desk e-mail: rgov@nsf.gov

For questions relating to Grants.gov contact:

- Grants.gov Contact Center: If the Authorized Organizational Representatives (AOR) has not received a confirmation message from Grants.gov within 48 hours of submission of application, please contact via telephone: 1-800-518-4726; e-mail: support@grants.gov.

IX. OTHER INFORMATION

The NSF website provides the most comprehensive source of information on NSF Directorates (including contact information), programs and funding opportunities. Use of this website by potential proposers is strongly encouraged. In addition, “NSF Update” is an information-delivery system designed to keep potential proposers and other interested parties apprised of new NSF funding opportunities and publications, important changes in proposal and award policies and procedures, and upcoming NSF Grants Conferences. Subscribers are informed through e-mail or the user’s Web browser each time new publications are issued that match their identified interests. “NSF Update” also is available on NSF’s website.

Grants.gov provides an additional electronic capability to search for Federal government-wide grant opportunities. NSF funding opportunities may be
ABOUT THE NATIONAL SCIENCE FOUNDATION

The National Science Foundation (NSF) is an independent Federal agency created by the National Science Foundation Act of 1950, as amended (42 USC 1861-75). The Act states the purpose of the NSF is "to promote the progress of science; [and] to advance the national health, prosperity, and welfare by supporting research and education in all fields of science and engineering."

NSF funds research and education in most fields of science and engineering. It does this through grants and cooperative agreements to more than 2,000 colleges, universities, K-12 school systems, businesses, informal science organizations and other research organizations throughout the US. The Foundation accounts for about one-fourth of Federal support to academic institutions for basic research.

NSF receives approximately 55,000 proposals each year for research, education and training projects, of which approximately 11,000 are funded. In addition, the Foundation receives several thousand applications for graduate and postdoctoral fellowships. The agency operates no laboratories itself but does support National Research Centers, user facilities, certain oceanographic vessels and Arctic and Antarctic research stations. The Foundation also supports cooperative research between universities and industry, US participation in international scientific and engineering efforts, and educational activities at every academic level.

Facilitation Awards for Scientists and Engineers with Disabilities (FASED) provide funding for special assistance or equipment to enable persons with disabilities to work on NSF-supported projects. See the NSF Proposal & Award Policies & Procedures Guide Chapter II.E.6 for instructions regarding preparation of these types of proposals.

The National Science Foundation has Telephonic Device for the Deaf (TDD) and Federal Information Relay Service (FIRS) capabilities that enable individuals with hearing impairments to communicate with the Foundation about NSF programs, employment or general information. TDD may be accessed at (703) 292-5090 and (800) 281-8749, FIRS at (800) 877-8339.

The National Science Foundation Information Center may be reached at (703) 292-5111.

The National Science Foundation promotes and advances scientific progress in the United States by competitively awarding grants and cooperative agreements for research and education in the sciences, mathematics, and engineering.

To get the latest information about program deadlines, to download copies of NSF publications, and to access abstracts of awards, visit the NSF Website at https://www.nsf.gov

PRIVACY ACT AND PUBLIC BURDEN STATEMENTS

The information requested on proposal forms and project reports is solicited under the authority of the National Science Foundation Act of 1950, as amended. The information on proposal forms will be used in connection with the selection of qualified proposals; and project reports submitted by awardees will be used for program evaluation and reporting within the Executive Branch and to Congress. The information requested may be disclosed to qualified reviewers and staff assistants as part of the proposal review process; to proposer institutions/grantees to provide or obtain data regarding the proposal review process, award decisions, or the administration of awards; to government contractors, experts, volunteers and researchers and educators as necessary to complete assigned work; to other government agencies or other entities needing information regarding applicants or nominees as part of a joint application review process, or in order to coordinate programs or policy; and to another Federal agency, court, or party in a court or Federal administrative proceeding if the government is a party. Information about Principal Investigators may be added to the Reviewer file and used to select potential candidates to serve as peer reviewers or advisory committee members. See System of Record Notices, NSF-50, "Principal Investigator/Proposal File and Associated Records." and NSF-51, "Reviewer/Proposal File and Associated Records." Submission of the information is voluntary. Failure to provide full and complete information, however, may reduce the possibility of receiving an award.

An agency may not conduct or sponsor, and a person is not required to respond to, an information collection unless it displays a valid Office of Management and Budget (OMB) control number. The OMB control number for this collection is 3145-0058. Public reporting burden for this collection of information is estimated to average 120 hours per response, including the time for reviewing instructions. Send comments regarding the burden estimate and any other aspect of this collection of information, including suggestions for reducing this burden, to:
