

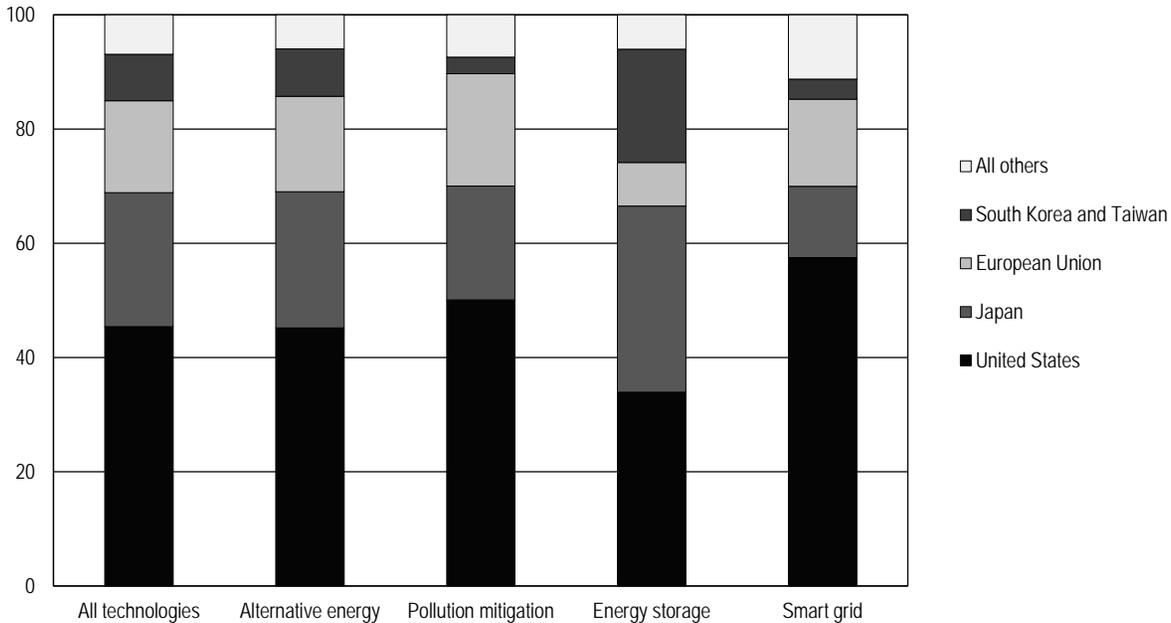

FIGURE 7. USPTO patents granted in clean energy and pollution control technologies, by technology area and location of inventor: 2010

Percent

USPTO = U.S. Patent and Trademark Office.

NOTES: Number of patents for each technology area shown above the relevant column. Clean energy and pollution control consist of alternative energy, pollution mitigation, energy storage, and smart grid. The sum of the technology areas exceeds the total because some patents are classified in multiple technology areas.
