

TABLE 37. Summary BRDIS and USDIA survey data for foreign activity of U.S. parent companies, by selected host country: 2010

Host country	BRDIS foreign activity		USDIA survey MOFAs				
	Matched U.S. parent companies <sup>a</sup>	R&D performed (US\$millions)	Matched U.S. parent companies <sup>b</sup>	Number of MOFAs	R&D performed (US\$millions)	Employees (thousands)	
						All	R&D
All host countries	875	50,807	1,148	3,986	38,897	7,454	NA
Canada	288	3,478	197	252	2,717	490	NA
China	324	2,676	136	233	1,523	971	NA
France	252	2,171	165	249	1,997	286	NA
Germany	314	6,477	231	359	6,665	477	NA
India	233	3,043	68	89	1,714	436	NA
Ireland	91	983	64	96	1,423	82	NA
Israel	87	2,184	40	48	1,994	42	NA
Italy	146	890	118	162	594	144	NA
Japan	194	2,541	118	147	1,807	168	NA
Russia	60	251	22	24	65	107	NA
Singapore	128	1,251	70	90	736	122	NA
South Korea	100	871	58	73	821	101	NA
Sweden	96	875	53	65	396	45	NA
United Kingdom	361	6,950	284	426	5,505	611	NA
All other	666	16,166	408	1,673	10,940	3,372	NA

NA = not available.

BRDIS = Business R&D and Innovation Survey; MOFA = majority-owned foreign affiliate; USDIA = U.S. Direct Investment Abroad.

<sup>a</sup> BRDIS companies matched to USDIA survey parent companies with a nonzero value for foreign R&D performed. Each matched parent company is counted once in the all host countries total.

<sup>b</sup> The USDIA survey matched U.S. parent companies that owned R&D-performing MOFAs; that is, the survey matched parent companies that owned at least one MOFA with a nonzero value for R&D performed. Each matched parent company is counted once in the all host countries total and also is counted once in each country in which it has a MOFA that performed R&D. Because a parent company may have R&D-performing MOFAs in more than one country, the sum across countries exceeds the all host countries total.

NOTES: Data are for matched companies obtained by linking BRDIS (cosponsored by the National Science Foundation and the U.S. Census Bureau) with the USDIA survey (conducted by the Bureau of Economic Analysis). Data are not weighted. Detail may not add to total because of rounding.
