* = < 0.5% responded; NA = not available, country/economy not asked or not part of the survey population.

^a Mean score is based on a 5-point scale, where 1 = not dangerous at all for the environment and 5 = extremely dangerous for the environment. It does not include respondents who said "can't choose" or did not answer the question.

^b In 1993 and 2000, Great Britain (England, Scotland, Wales) reported separately from Northern Ireland. In 2010, the four countries reported together as the United Kingdom.

NOTES: Responses to *Do you think that a rise in the world's temperature caused by climate change is not dangerous at all for the environment, not very dangerous, somewhat dangerous, very dangerous, or extremely dangerous for the environment?* Percentages may not add to 100% because of rounding.
