### SECTION A: COMPANY INFORMATION

The following section collects information on the operations and structure of the business. All businesses that receive this questionnaire should answer questions in the upcoming section. The reporting unit for the survey is the U.S.-located company, including all majority-owned subsidiaries and divisions regardless of location. Report only for domestic operations.

#### A.1 Ceased Operation

Has this business ceased operations?

- [ ] Yes
- [ ] No – Skip to A.3 Business Ownership – Foreign Entity

#### A.2 Date Ceased Operations

Print the month and year this business ceased operations.

**Reporting Instructions:** If date ceased operations is before January 2018, skip to Section F: Contact Information on page 38. If date ceased operations is between 01/2018 and 12/2018, even though this business is not currently operating, you are still required to complete the survey covering the business activity for 2018.

#### A.3 Business Ownership – Foreign-Owned Entity

In 2018, was this business a majority-owned subsidiary of a foreign company?

- [ ] Yes
- [ ] No

**Reporting Instructions for Foreign-Owned Companies:** If this business is owned by a foreign parent, the reporting unit for the survey is the U.S.-located company, including all majority-owned subsidiaries and divisions located in the domestic United States (50 states and District of Columbia). For reporting purposes, the foreign parent and any foreign affiliates this company does not own should be treated the same as any business partner, customer, or supplier this business does not own.

#### A.4 Business Ownership – U.S. Entity

In 2018, did another U.S. company or other entity own more than 50 percent of this business? Examples of other entities include estates, trusts, employee stock ownership plans (ESOPs), associations, membership clubs, and cooperatives.

- [ ] Yes – Skip to A.6 Business - 10% or More Ownership.
- [ ] No

#### A.5 Business Ownership – Government or Tribal Entity

In 2018, was this business owned by a government or tribal entity?

- [ ] Yes
- [ ] No

#### A.6 Business – 10% or More Ownership

In 2018, did at least one person own 10% or more of this business? Do not count parent companies, estates, trusts or other entities.

- [ ] Yes
- [ ] No – Select “No” ONLY if no person owned 10% or more of this business.
A.7 Number of Owners
In 2018, how many people owned this business?
• Do not combine two or more owners to create one owner.
• Count spouses and partners as separate owners.

☐ 1 person
☐ 2 people
☐ 3 people
☐ 4 people
☐ 5 - 10 people
☐ 11 or more people
☐ Don’t know

A.8 Number of W-2 Paid Domestic Employees or Employee/Owners
For the pay period including March 12, 2018, how many people worked for this business, including those paid through grants? Include both full-time and part-time employees as well as yourself. Include only persons in the U.S.

Count each person only once. If none, report zero.

a. Owners who received a W-2 issued by this business for salary or wages .................................................................

b. Employees who received a W-2 issued by this business for salary or wages .................................................................

c. Total ...........................................................................................................................................................

A.9 Number of Domestic Workers Who Did Not Receive a W-2
Not including employees or employee/owners included in the previous question how many other people worked for this business, including those paid through grants? Include both full-time and part-time workers as well as yourself, if applicable. Include only persons in the U.S.

Count each person only once. If none, report zero.

a. Individuals whose work was directed by this business who received payment in other ways (for example, contractors, consultants, temporary workers who receive a 1099 from this business or payment from another business). ................................................

b. Unpaid individuals who worked for the business (for example, friends, volunteers, family members). .................................................................

A.10 Total Worldwide Sales and Operating Revenues
What was the amount of this business’s worldwide sales and operating revenues, including grants, during 2018?

Round to the nearest one thousand dollars. If none, report zero.

2018 sales, revenues, and grants .................................................................

$Bil. Mil. Thou. Dol.

Reporting Instructions: Report amount using U.S. Generally Accepted Accounting Principles (U.S. GAAP) as recognized by the Financial Accounting Standard Board (FASB). If the business follows International Financial Reporting Standards (IFRS), we request that you estimate any adjustments that would be required to conform to U.S. GAAP.
A.11 Domestic Sales and Revenues
How much of the ‘A.10 Total Worldwide Sales and Operating Revenues’ in 2018 sales, revenue, and grants was attributable to or originated from domestic operations? Include sales and operating revenues to foreign customers, including foreign subsidiaries.

SECTION C: PRODUCTS AND PROCESSES

The following section collects information on the business’s introduction of a new or improved product (goods or services) or business process that differed significantly from the business’s previous products or processes.

The products (goods or services) or business processes must have characteristics or intended uses that are new or which provide a significant improvement over what was previously used or sold by the business. However, they can fail or take time to prove themselves.

The products or business processes need only be new or improved for the business. They could have been originally developed or used by other businesses or organizations.

The following section asks about the three previous years including the calendar year 2018 instead of one year as in other sections of this questionnaire.

C.1 New or Improved Goods or Services

During the three years 2016 to 2018, did this business introduce to the market any new or improved goods or services that differed significantly from the business’s previous goods or services?

Select one for each row.

a. Goods. *(Exclude the simple resale of new goods and changes of a solely aesthetic nature.)* A good is usually a tangible object such as a smartphone, furniture, or packaged software, but also include digital goods such as downloadable software, music and film. 

b. Services. *(Exclude the simple resale of new services.)* A service is usually intangible, such as retailing, insurance, educational courses, air travel, consulting, etc., and also includes digital services.

If ‘No’ is selected for a. and b., skip to ‘C.5 - Process Innovation’ on page 16.

C.2 Novelty of New or Improved Goods or Services

During the three years 2016 to 2018, did this business introduce any new or improved goods or services that were:

Select one for each row.

a. New to the market? This business introduced a new or improved product (good or service) that was not previously offered by any of your competitors (it may have already been available in other markets).

b. New only to this business? This business introduced a new or improved product (good or service) that was identical or very similar to products already offered by your competitors.

C.3 New or Improved Goods or Services as a Percent of Total Sales

Using the definitions in the previous question, what percentage of this business’s ‘A.11 Domestic Sales and Revenues’ in 2018 sales and revenues were attributable to or originated from domestic operations:

a. New or improved goods and services introduced during 2016 to 2018 that were new to your market.

b. New or improved goods and services introduced during 2016 to 2018 that were new only to this business.

c. Goods and services that were unchanged or only marginally modified during 2016 to 2018 (include the resale of new goods or services purchased from other companies).

Total Sales in 2018 100%
C.4 Sources of New or Improved Goods or Services
Who developed these new or improved products (goods and services)? For other businesses, include independent businesses. Organizations include universities, research institutes, nonprofits, etc. **Select all that apply.**
- This business by itself
- This business together with other businesses or organizations
- This business by adapting or modifying products originally developed by other businesses or organizations
- Other businesses or organizations

C.5 New or Improved Business Processes
During the three years 2016 to 2018, did this business introduce any of the following types of new or improved business processes that differ significantly from your previous business processes?

SECTION D: RESEARCH AND DEVELOPMENT

The following section collects information on research and development activity from businesses with W-2 employment between 1 and 9. If Total Number of W-2 Paid Employees/Owners (Question A.8) is 10 or more, Skip to Section E on page 23.

What is Research and Development (R&D)?

Research and development (R&D) comprise creative and systematic work undertaken in order to increase the stock of knowledge and to devise new applications of available knowledge.

The term R&D does NOT include expenditures for:

- Costs for routine product testing, quality control, and technical services unless they are an integral part of an R&D project
- Market research
- Efficiency surveys or management studies
- Literary, artistic, or historical projects, such as films, music, or books and other publications
- Prospecting or exploration for natural resources

R&D activity in software INCLUDES:

- Software development or improvement activities that expand scientific or technological knowledge
- Construction of new theories and algorithms in the field of computer science

R&D activity in software EXCLUDES:

- Software development that does not depend on a scientific or technological advance, such as
  - supporting or adapting existing systems
  - adding functionality to existing application programs, and
  - routine debugging of existing systems and software
- Creation of new software based on known methods and applications
- Conversion or translation of existing software and software languages
- Adaptation of a product to a specific client, unless knowledge that significantly improved the base program was added in that process

Reporting unit

The reporting unit is this business, including all subsidiaries and divisions. Include subsidiary companies where there is more than 50 percent ownership.

Reporting period

Report data for the calendar year 2018, if possible, or for this business’s fiscal year ending between April 2018 and March 2019.

Estimates are acceptable

Report all items to the best of your ability.

D.1 R&D Activities

During 2018, did this business do any of the following R&D activities? Include activities that:

- This business performed
- Others paid this business to do
- This business paid others to do

a. Conducted activities aimed at acquiring new knowledge or understanding without specific immediate commercial applications or uses

b. Conducted activities aimed at acquiring new knowledge for solving a specific problem or meeting a specific commercial objective

c. Conducted systematic work, drawing on research and practical experience and resulting in additional knowledge, which is directed to producing new products or processes or to improving existing products or processes

d. Developed and tested goods, services, or processes that were derived from scientific research or technical findings

e. Developed software that advanced scientific or technological knowledge

f. Produced findings that could be published in academic journals or presented at scientific conferences

g. Applied scientific or technical knowledge in a way that has never been done before

h. Created new scientific or technical solutions that can be generalized to other situations

i. Conducted work to discover previously unknown technological facts, structures, or relationships

j. Conducted work to extend the understanding of scientific facts, relationships, or principles in ways that could be useful to others

If "No" is selected for rows a. – j., skip to Section E: Technology and Intellectual Property on page 23.
D.2 R&D Costs
What was the total cost (both direct and indirect) in 2018 for all the R&D activities reported as “Yes” in the ‘R&D Activities’ question? Your best estimate is acceptable. Report dollar amount in thousands. If none, report zero.

Include the following costs:
- Salaries, wages, fringe benefits
- Plant, machinery, and equipment, except that which was capitalized because it had an alternative future use
- Materials, supplies, software
- Rent, utilities
- Consultants, contractors
- Depreciation expense from plant, machinery, and equipment that was capitalized because it had an alternative future use

Do not include:
- Costs for routine product testing, quality control, and technical services unless they are an integral part of an R&D project
- Market research
- Efficiency surveys or management studies
- Literary, artistic, or historical projects, such as films, music, or books and other publications
- Prospecting or exploration for natural resources

Total costs for ‘R&D Activities’ reported in the R&D Activities question for 2018.

D.3 Foreign R&D Costs
During 2018, what amount, if any, of the ‘D.2 R&D Costs’ was performed by businesses outside the U.S.?

D.4 Domestic R&D Costs
Calculate this business’s domestic R&D costs by subtracting the amount entered for R&D costs outside the U.S. (question ‘D.3 - Foreign R&D Costs’) from all R&D costs (question ‘D.2 - R&D Costs’). This value will be used in other questions in this questionnaire.

This business’s domestic R&D cost in 2018.

D.5 Types of R&D Costs
During 2018, how much of the ‘D.4 Domestic R&D Costs’ in domestic R&D costs was for each of the following types of costs?

- a. Salaries, wages, and fringe benefits.
- b. Expensed machinery and equipment (not capitalized).
- c. Materials and supplies.
- d. Payments to others for R&D, including purchased R&D services.
- e. Depreciation on R&D property and equipment.
- f. All other costs (for example, consultants, contractors, travel, rent).

Total should equal the amount entered in D.4 Domestic R&D Costs.
D.6 Domestic Performance Costs
Calculate this business’s domestic R&D performance cost by subtracting the payments for R&D services (item d. in question ‘D.5 - Types of R&D Costs’) from domestic R&D costs (question ‘D.4 Domestic R&D Costs’). Use this value in the next question.

☐ To automate tasks performed by labor
☐ To upgrade outdated processes or methods
☐ To improve quality or reliability of processes or methods
☐ To expand the range of goods or services
☐ To adopt standards and accreditation
☐ Some other reason

E.5 Impact of Artificial Intelligence Technology on Workforce – Processes and Methods

During the three years 2016 to 2018, what were the effects of adopting or using Artificial Intelligence on the following?

A. The number of workers employed by this business
   - Increased
   - Decreased
   - Did not change

B. The skill level of workers employed by this business
   - Increased overall
   - Decreased overall
   - Did not change overall

C. The scientific, technological, engineering, and mathematical skills of workers employed by this business
   - Increased overall
   - Decreased overall
   - Did not change overall
   - Not applicable, we did not employ workers with scientific, technological, engineering and mathematical skills

E.6 Impact of Artificial Intelligence Technology on Worker Types – Processes and Methods

Indicate what effect Artificial Intelligence had on the following types of workers employed by this business during the three years 2016 to 2018.

A. The number of production workers
   - Increased
   - Decreased
   - Did not change
   - Not applicable, we did not employ production workers

B. The number of nonproduction workers
   - Increased
   - Decreased
   - Did not change
   - Not applicable, we did not employ nonproduction workers

C. The number of supervisory workers
   - Increased
   - Decreased
   - Did not change
   - Not applicable, we did not employ supervisory workers

D. The number of nonsupervisory workers
   - Increased
   - Decreased
   - Did not change
   - Not applicable, we did not employ nonsupervisory workers
E.7 Motivation for Cloud-Based Computing Systems and Applications Technology Adoption and Utilization – Processes and Methods

During the three years 2016 to 2018, why did this business adopt or use Cloud-Based Computing Systems and Applications?

Select all that apply.

☐ To automate tasks performed by labor
☐ To upgrade outdated processes or methods
☐ To improve quality or reliability of processes or methods
☐ To expand the range of goods or services
☐ To adopt standards and accreditation
☐ Some other reason

E.8 Impact of Cloud-Based Computing Systems and Applications Technology on Workforce – Processes and Methods

During the three years 2016 to 2018, what were the effects of adopting or using Cloud-Based Computing Systems and Applications on the following?

A. The number of workers employed by this business
   ☐ Increased
   ☐ Decreased
   ☐ Did not change

B. The skill level of workers employed by this business
   ☐ Increased overall
   ☐ Decreased overall
   ☐ Did not change overall

C. The scientific, technological, engineering, and mathematical skills of workers employed by this business
   ☐ Increased overall
   ☐ Decreased overall
   ☐ Did not change overall
   ☐ Not applicable, we did not employ workers with scientific, technological, engineering and mathematical skills

E.9 Impact of Cloud-Based Computing Systems and Applications Technology on Worker Types – Processes and Methods

Indicate what effect Cloud-Based Computing Systems and Applications had on the following types of workers employed by this business during the three years 2016 to 2018.

A. The number of production workers
   ☐ Increased
   ☐ Decreased
   ☐ Did not change
   ☐ Not applicable, we did not employ production workers

B. The number of nonproduction workers
   ☐ Increased
   ☐ Decreased
   ☐ Did not change
   ☐ Not applicable, we did not employ nonproduction workers

C. The number of supervisory workers
   ☐ Increased
   ☐ Decreased
   ☐ Did not change
   ☐ Not applicable, we did not employ supervisory workers

D. The number of nonsupervisory workers
   ☐ Increased
   ☐ Decreased
   ☐ Did not change
   ☐ Not applicable, we did not employ nonsupervisory workers
E.10 Motivation for Specialized Software Technology Adoption and Utilization – Processes and Methods
During the three years 2016 to 2018, why did this business adopt or use Specialized Software? Select all that apply.

- [ ] To automate tasks performed by labor
- [ ] To upgrade outdated processes or methods
- [ ] To improve quality or reliability of processes or methods
- [ ] To expand the range of goods or services
- [ ] To adopt standards and accreditation
- [ ] Some other reason

E.11 Impact of Specialized Software Technology on Workforce – Processes and Methods
During the three years 2016 to 2018, what were the effects of adopting or using Specialized Software on the following?

A. The number of workers employed by this business
- [ ] Increased
- [ ] Decreased
- [ ] Did not change

B. The skill level of workers employed by this business
- [ ] Increased overall
- [ ] Decreased overall
- [ ] Did not change overall

C. The scientific, technological, engineering, and mathematical skills of workers employed by this business
- [ ] Increased overall
- [ ] Decreased overall
- [ ] Did not change overall
- [ ] Not applicable, we did not employ workers with scientific, technological, engineering and mathematical skills

E.12 Impact of Specialized Software Technology on Worker Types – Processes and Methods
Indicate what effect Specialized Software had on the following types of workers employed by this business during the three years 2016 to 2018.

A. The number of production workers
- [ ] Increased
- [ ] Decreased
- [ ] Did not change
- [ ] Not applicable, we did not employ production workers

B. The number of nonproduction workers
- [ ] Increased
- [ ] Decreased
- [ ] Did not change
- [ ] Not applicable, we did not employ nonproduction workers

C. The number of supervisory workers
- [ ] Increased

D. The number of nonsupervisory workers
- [ ] Increased
- [ ] Decreased
- [ ] Did not change
- [ ] Not applicable, we did not employ nonsupervisory workers
E.13 Motivation for Robotics Technology Adoption and Utilization – Processes and Methods

During the three years 2016 to 2018, why did this business adopt or use Robotics?

Select all that apply.

- [ ] To automate tasks performed by labor
- [ ] To upgrade outdated processes or methods
- [ ] To improve quality or reliability of processes or methods
- [ ] To expand the range of goods or services
- [ ] To adopt standards and accreditation
- [ ] Some other reason

E.14 Impact of Robotics Technology on Workforce – Processes and Methods

During the three years 2016 to 2018, what were the effects of adopting or using Robotics on the following?

A. The number of workers employed by this business
   - [ ] Increased
   - [ ] Decreased
   - [ ] Did not change

B. The skill level of workers employed by this business
   - [ ] Increased overall
   - [ ] Decreased overall
   - [ ] Did not change overall

C. The scientific, technological, engineering, and mathematical skills of workers employed by this business
   - [ ] Increased overall
   - [ ] Decreased overall
   - [ ] Did not change overall
   - [ ] Not applicable, we did not employ workers with scientific, technological, engineering and mathematical skills

E.15 Impact of Robotics Technology on Worker Types – Processes and Methods

Indicate what effect Robotics had on the following types of workers employed by this business during the three years 2016 to 2018.

A. The number of production workers
   - [ ] Increased
   - [ ] Decreased
   - [ ] Did not change
   - [ ] Not applicable, we did not employ production workers

B. The number of nonproduction workers
   - [ ] Increased
   - [ ] Decreased
   - [ ] Did not change
   - [ ] Not applicable, we did not employ nonproduction workers

C. The number of supervisory workers

### E.19 Factors Adversely Affecting Technology Adoption and Utilization

During the three years 2016 to 2018, indicate which factors adversely affected the adoption or utilization of the following technologies to produce goods or services. Select all that apply for each technology.

#### Artificial Intelligence
- [ ] This technology was too expensive
- [ ] The technology was not mature
- [ ] Lacked access to required data
- [ ] Required data not reliable
- [ ] Lacked access to required human capital and talent
- [ ] Laws and regulations
- [ ] Concerns regarding safety and security (physical security and/or cyber security)
- [ ] Lacked access to capital
- [ ] Technology not applicable to this business
- [ ] No factors adversely affected the adoption of this technology

#### Cloud-Based Computing Systems and Applications
- [ ] This technology was too expensive
- [ ] The technology was not mature
- [ ] Lacked access to required data
- [ ] Required data not reliable
- [ ] Lacked access to required human capital and talent
- [ ] Laws and regulations
- [ ] Concerns regarding safety and security (physical security and/or cyber security)
- [ ] Lacked access to capital
- [ ] Technology not applicable to this business
- [ ] No factors adversely affected the adoption of this technology

#### Specialized Software
- [ ] This technology was too expensive
- [ ] The technology was not mature
- [ ] Lacked access to required data
- [ ] Required data not reliable
- [ ] Lacked access to required human capital and talent
- [ ] Laws and regulations
- [ ] Concerns regarding safety and security (physical security and/or cyber security)
- [ ] Lacked access to capital
- [ ] Technology not applicable to this business
- [ ] No factors adversely affected the adoption of this technology

#### Robotics

E.20 Technology Based Goods and Services
During the three years 2016 to 2018, did this business sell the following technologies or goods or services that included the following technologies?

**Artificial Intelligence**
- [ ] Yes
- [ ] No
- [ ] Don’t know

**Cloud-Based Computing Systems and Applications**
- [ ] Yes
- [ ] No
- [ ] Don’t know

**Specialized Software**
- [ ] Yes
- [ ] No
- [ ] Don’t know

**Robotics**
- [ ] Yes
- [ ] No
- [ ] Don’t know

**Specialized Equipment**
- [ ] Yes
- [ ] No
- [ ] Don’t know

If all answers to E.20 are “No” or “Don’t know” then proceed to E.36 Factors Adversely Affecting Technology Production on page 37.

If answer for Artificial Intelligence is “Yes” then answer questions E.21 – E.23 on page 32.

If answer for Cloud-based Computing Systems and Applications is “Yes” then answer questions E.24 – E.26 on page 33.

If answer for Specialized Software is “Yes” then answer questions E.27 – E.29 on page 34.

If answer for Robotics is “Yes” then answer questions E.30 – E.32 on page 35.

If answer for Specialized Equipment is “Yes” then answer questions E.33 – E.35 on page 36.
### E.21 Motivation for Artificial Intelligence Technology Adoption and Utilization – Goods and Services

During the three years 2016 to 2018, why did this business produce Artificial Intelligence, or produce goods or services that included Artificial Intelligence? Select all that apply.

- [ ] To upgrade goods or services
- [ ] To expand the range of goods or services
- [ ] To enter new markets or adapt existing products to new markets
- [ ] To increase or maintain market share
- [ ] To adopt standards and accreditation
- [ ] Some other reason

### E.22 Impact of Artificial Intelligence Technology on Workforce – Goods and Services

During the three years 2016 to 2018, what were the effects producing Artificial Intelligence or producing goods or services that included Artificial Intelligence on the following?

**A. The number of workers** employed by this business
- [ ] Increased
- [ ] Decreased
- [ ] Did not change

**B. The skill level of workers** employed by this business
- [ ] Increased overall
- [ ] Decreased overall
- [ ] Did not change overall

**C. The scientific, technological, engineering, and mathematical skills of workers** employed by this business
- [ ] Increased overall
- [ ] Decreased overall
- [ ] Did not change overall
- [ ] Not applicable, we did not employ workers with scientific, technological, engineering and mathematical skills

### E.23 Impact of Artificial Intelligence Technology on Worker Types – Goods and Services

Indicate what effect producing Artificial Intelligence or producing goods or services that included Artificial Intelligence had on the following types of workers employed by this business during the three years 2016 to 2018.

**A. The number of production workers**
- [ ] Increased
- [ ] Decreased
- [ ] Did not change
- [ ] Not applicable, we did not employ production workers

**B. The number of nonproduction workers**
- [ ] Increased
- [ ] Decreased

E.24 Motivation for Cloud-Based Computing Systems and Applications Technology Adoption and Utilization – Goods and Services

During the three years 2016 to 2018, why did this business produce Cloud-Based Computing Systems and Applications, or produce goods or services that included Cloud-Based Computing Systems and Applications? Select all that apply.

- To upgrade goods or services
- To expand the range of goods or services
- To enter new markets or adapt existing products to new markets
- To increase or maintain market share
- To adopt standards and accreditation
- Some other reason

E.25 Impact of Cloud-Based Computing Systems and Applications Technology on Workforce – Goods and Services

During the three years 2016 to 2018, what were the effects of producing Cloud-Based Computing Systems and Applications or producing goods or services that included Cloud-Based Computing Systems and Applications on the following?

A. The number of workers employed by this business

- Increased
- Decreased
- Did not change

B. The skill level of workers employed by this business

- Increased overall
- Decreased overall
- Did not change overall

C. The scientific, technological, engineering, and mathematical skills of workers employed by this business

- Increased overall
- Decreased overall
- Did not change overall
- Not applicable, we did not employ workers with scientific, technological, engineering and mathematical skills

E.26 Impact of Cloud-Based Computing Systems and Applications Technology on Worker Types – Goods and Services

Indicate what effect producing Cloud-Based Computing Systems and Applications or producing goods or services that included Cloud-Based Computing Systems and Applications had on the following types of workers employed by this business during the three years 2016 to 2018.

A. The number of production workers

- Increased
- Decreased
- Did not change
- Not applicable, we did not employ production workers

B. The number of nonproduction workers

- Increased
- Decreased
- Did not change
- Not applicable, we did not employ nonproduction workers

C. The number of supervisory workers

- Did not change
- Not applicable, we did not employ nonsupervisory workers
### E.27 Motivation for Specialized Software Technology Adoption and Utilization – Goods and Services

During the three years 2016 to 2018, why did this business produce Specialized Software, or produce goods or services that included Specialized Software? Select all that apply.

- [ ] To upgrade goods or services
- [ ] To expand the range of goods or services
- [ ] To enter new markets or adapt existing products to new markets
- [ ] To increase or maintain market share
- [ ] To adopt standards and accreditation
- [ ] Some other reason

### E.28 Impact of Specialized Software Technology on Workforce – Goods and Services

During the three years 2016 to 2018, what were the effects of producing Specialized Software or producing goods or services that included Specialized Software on the following?

**A. The number of workers** employed by this business

- [ ] Increased
- [ ] Decreased
- [ ] Did not change

**B. The skill level of workers** employed by this business

- [ ] Increased overall
- [ ] Decreased overall
- [ ] Did not change overall

**C. The scientific, technological, engineering, and mathematical skills of workers** employed by this business

- [ ] Increased overall
- [ ] Decreased overall
- [ ] Did not change overall
- [ ] Not applicable, we did not employ workers with scientific, technological, engineering and mathematical skills

### E.29 Impact of Specialized Software Technology on Worker Types – Goods and Services

Indicate what effect producing Specialized Software or producing goods or services that included Specialized Software had on the following types of workers employed by this business during the three years 2016 to 2018.

**A. The number of production workers**

- [ ] Increased
- [ ] Decreased
- [ ] Did not change
- [ ] Not applicable, we did not employ production workers

**B. The number of nonproduction workers**

- [ ] Increased
- [ ] Decreased
- [ ] Did not change
- [ ] Not applicable, we did not employ nonproduction workers

**C. The number of supervisory workers**

- [ ] Increased
- [ ] Decreased
- [ ] Did not change

Definitions

Products:
Products are goods and services (including knowledge-capturing products) that result from a process of production.

Goods:
Goods are physical, produced objects for which a demand exists, over which ownership rights can be established and whose ownership can be transferred from one institutional unit to another by engaging in transactions on markets.

Services:
Services are the result of a production activity that changes the conditions of the consuming units or facilitates the exchange of products or financial assets. They cannot be traded separately from their production. Services can also include some knowledge-capturing products.

Business process functions:
Business process includes the following: (1) methods for producing goods or providing services; (2) distribution and logistics; (3) marketing and sales; (4) information and communication systems; (5) administration and management activities; and (6) product and business process development (including activities to identify, develop or adapt products or a firm’s processes).

Production Processes:
Production processes (or production activities) are defined as all activities, under the control of a business, that use inputs of labor, capital, goods and services to produce outputs of goods and services.

Research and Development (R&D):
Research and development (R&D) comprise creative and systematic work undertaken in order to increase the stock of knowledge and to devise new applications of available knowledge.

The term R&D does NOT include expenditures for:
- Costs for routine product testing, quality control, and technical services unless they are an integral part of an R&D project
- Market research
- Efficiency surveys or management studies
- Literary, artistic, or historical projects, such as films, music, or books and other publications
- Prospecting or exploration for natural resources

R&D activity in software INCLUDES:
- Software development or improvement activities that expand scientific or technological knowledge
- Construction of new theories and algorithms in the field of computer science

R&D activity in software EXCLUDES:
- Software development that does not depend on a scientific or technological advance, such as
  - supporting or adapting existing systems
  - adding functionality to existing application programs, and
  - routine debugging of existing systems and software
- Creation of new software based on known methods and applications
- Conversion or translation of existing software and software languages
- Adaptation of a product to a specific client, unless knowledge that significantly improved the base program was added in that process

Artificial Intelligence:
Artificial intelligence is a branch of computer science and engineering devoted to making machines intelligent. Intelligence is that quality that enables an entity to perceive, analyze, determine response and act appropriately in its environment. Systems with artificial intelligence perform functions including, but not limited to, speech recognition, machine vision, or machine learning:

- Speech recognition transforms human speech into a format useful for computer applications (for example, a digital assistant)
- Machine vision uses sensors and software that allow images to be used as an input for computer applications (for example, systems that sort or inspect objects or support navigation in mobile equipment)
- Machine learning uses statistical software and data to “learn” and make better predictions without reprogramming (for example, recommender systems for websites, or sales and demand forecasting)

Artificial Intelligence technologies also include virtual agents, deep learning platforms, decision management systems, biometrics, text analytics, and natural language generation and processing.

Cloud-Based Computing Systems and Applications:
Cloud systems and applications are computing resources available on-demand via the internet. Cloud computing enables ubiquitous, convenient, on-demand internet access to a shared pool of configurable computing resources (e.g., networks, servers, storage, applications, and services) that can be rapidly provisioned and released with minimal management effort or service provider interaction.

Specialized Software (excluding Artificial Intelligence):
Specialized software is custom or packaged software dedicated to performing a particular business function. Specialized software includes, but is not limited to, software applications for accounting, sales, marketing, customer service and billing, logistics, health care delivery, telemedicine, computer-aided design (CAD), computer-aided engineering (CAE), or inventory management. Specialized software excludes general purpose software such as word processing or spreadsheets. Exclude Artificial Intelligence software reported above.

Robotics:
Robotic equipment (or robots) are automatically controlled, reprogrammable, and multipurpose machines used in automated operations in industrial and service environments. Robots may be mobile, incorporated into stand-alone stations, or integrated into a production line. A robot may be part of a manufacturing cell or incorporated into another piece of equipment.

Industrial robots may perform operations such as: palletizing, pick and place, machine tending, material handling, dispensing, welding, packing/repacking, and cleanroom.

Service robots are commonly used in businesses for such operations as cleaning, delivery, construction, inspection, and medical services such as dispensing or surgery.

Specialized Equipment (excluding Robotics):
Specialized equipment refers to equipment capable of automatically carrying out pre-specified task(s). Specialized equipment includes, but is not limited to, computer numerically controlled (CNC) machinery, computer-aided manufacturing (CAM) systems, manufacturing cells, materials working lasers, automated guided vehicles systems, automated storage and retrieval systems, and automated materials handling systems. Exclude robotics equipment reported above.

Production worker:

A worker (up through the line supervisor level) engaged in activities or processes that result in the creation of products, goods or services. This includes those directly engaged in fabricating, processing, assembling, inspecting, receiving, storing, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial and guard services, product development, auxiliary production for the own use of business (e.g. a power plant), recordkeeping, and other services closely associated with these production operations in the business covered by the report. Employees above the working-supervisor level are excluded.

This group includes the following employees in the construction sector: working supervisors, qualified craft employees, mechanics, apprentices, helpers, laborers, and so forth, engaged in new work, alterations, demolition, repair, maintenance, and the like, whether working at the site of construction or in shops or yards at jobs (such as precutting and preassembling) ordinarily performed by members of the construction trades.

Nonproduction worker:

A worker engaged in the following activities: supervision above the working foreman level, sales (including driver-salesman), sales delivery (highway truck drivers and their helpers), advertising, credit collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, professional, and technical. Also included are employees on the payroll of the business engaged in the construction of major additions or alterations to the plant who are utilized as a separate work force.

Supervisory worker:

A worker whose major responsibility is to supervise, plan, or direct the work of others, such as top executive and managerial positions, officers of corporations, department heads, and superintendents.

Nonsupervisory worker:

A worker who does not supervise, plan, or direct the work of others. This group includes employees (not above the working-supervisor level) such as office and clerical employees, repairers, salespersons, operators, drivers, physicians, lawyers, accountants, nurses, social employees, research aides, teachers, drafters, photographers, beauticians, musicians, restaurant employees, custodial employees, attendants, line installers and repairers, laborers, janitors, guards, and other employees at similar occupational levels whose services are closely associated with those of the employees listed.
