DO NOT USE TO REPORT**

National Science Foundation
WHERE DISCOVERIES BEGIN

Instructions

Agency Code and Name

Your USER ID and password will be used to access the online survey system. Only one USER ID is available per agency. It is possible to delegate work to sub agencies by creating program, field, and branch offices below the agency umbrella.

Contact Information

Please provide complete contact information for both the survey respondent and associated supervisor.

Before You Start

Please give special attention to the following items when completing the Survey of Federal Funds for Research and Development, Volume 64, FYs 2014–16.

1. In the interest of time, we are requesting that you submit to the survey the same data that your agency submitted to the Office of Management and Budget (OMB) in January 2015. Do not wait for later markups or revisions. **Complete your submission prior to the April 22, 2015, deadline.**
2. Report actual dollars for all amounts.
3. In the Table I narrative statements, explain any differences between outlays reported in this survey and those reported to OMB for the FY 2016 budget.
4. Verify that all research and development activities are included in your Federal Funds Survey data submission, whether they are represented by a specific R&D appropriation or as parts of other appropriations.
5. If you report any extramural funds on Tables VI, VII, and VIII, then you must also report some federal intramural funds on these tables. The rationale is that your agency must spend funds, at least for staff time, to administer the extramural R&D programs.
6. In the Table VI and Table XI narrative statements, explain **ANY** differences between FY 2014 data reported in two separate NSF surveys: Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions (Federal S&E Support Survey) and R&D obligations (Table VI) and R&D plant obligations (Table XI) to universities and colleges, and nonprofit institutions for this Federal Funds Survey. If you do not know your agency's respondent to the Federal S&E Support Survey, please e-mail us at NSFFedFunds@smdi.com.
7. In the comment boxes for the appropriate tables, provide the reasons for **ANY** changes in your obligation levels from those reported in the previous cycle's survey for character of work; basic and applied research and development; R&D plant; fields of science and engineering; or performers.
8. If your agency sponsors a Federally Funded Research and Development Center (FFRDC), data should be reported on Table IX. If no R&D funds are obligated for your FFRDC for FY 2014, please provide an explanation in the comment box.

9. If your agency is required to provide obligations by state and performer (Tables A, A1, A2, or B), you will be asked to break out obligations reported to “outlying areas” into “Puerto Rico” and “other areas.” The sum of these two items must equal the total reported for “outlying areas.”

Completing the Tables

Table I is for reporting outlays only.

- **Outlays** reported in this survey should be consistent with amounts in The Budget of the United States Government. The same definitions are used for both.

Outlays represent the amounts for checks issued and cash payments made during a given period, regardless of when the funds were appropriated.

The amounts shown for each year reflect outlays for that year regardless of when the funds were originally authorized or received and regardless of whether or not they were originally appropriated, received, or identified in the agency’s budget specifically for research, development, or R&D plant.

- Outlays cover all transactions that occurred in a given fiscal year, and those estimated for the next two fiscal years.
- Include all federal funds available to an agency that the agency received or expects to receive from direct appropriations, trust funds, and special account receipts, corporate income, funds appropriated by the President, and other federal sources.
- Include the full costs of R&D, both specific project costs and overhead costs. Include for both intramural and extramural R&D programs: costs of planning and administering of R&D, laboratory overhead, pay of military personnel, and departmental administration, and include funds your agency transferred to other agencies for R&D.
- Outlays for R&D performed for an agency in foreign countries include all funds available to the agency for this purpose, including funds separately appropriated for special foreign currency programs.
- **Do not include funds your agency received from another federal agency.** The transferring agency will report those funds. Similarly, a subdivision of an agency reports the funds it transfers to another subdivision within that agency as its own.

- **Research and Development:** Research and development (R&D) is creative work undertaken on a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture, and society, and the use of this stock of knowledge to devise new applications.

Include:

- Administrative expenses for R&D such as overseeing R&D grants and contracts.

R&D does NOT include:

- Physical assets for R&D such as R&D equipment and facilities.
- Routine product testing; quality control; mapping; collection of general purpose statistics; experimental production; routine monitoring and evaluation of a current program; training of scientific and technical personnel; market research; management studies; literary, artistic, or historical projects, such as films, music, or books and other publications; prospecting or exploration for natural resources; stand-alone software projects to improve existing systems; and new software projects using known methods and applications.

- **R&D plant:** This category covers the R&D facilities and fixed equipment that are used for R&D. Examples of R&D plant include the following: reactors, wind tunnels, particle accelerators, construction, major repairs, and land used for R&D activities.

Exception: For foreign R&D plant, include only federally funded facilities used in support of foreign R&D. R&D plant does NOT include the following: expendable or movable equipment (e.g., spectrometers, microscopes), office furniture and equipment, and pre-design studies (e.g., undertaken before commitment to a specific facility).

Table II is for reporting obligations only.

- **Character of work:** The character of the R&D work has three components: basic research, applied research, and development. If you cannot assign a project's obligations precisely across the three categories, please use your best judgment to allocate the obligations. Or, assign the obligations to the category most appropriate to the type of work you are funding.

- **Basic research:** Basic research is systematic study directed toward fuller knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications towards processes or products in mind.
- **Applied research:** Applied research is systematic study to gain knowledge or understanding necessary to determine the means by which a recognized and specific need may be met.
- **Development:** Development is systematic application of knowledge or understanding, directed toward the production of useful materials, devices, and systems or methods, including design, development, and improvement of prototypes and new processes to meet specific requirements.

For DOD Agencies, development is divided into two categories: advanced technology development and major systems development.

Advanced technology development: The category advanced technology development is used for activities in DOD's Major Force Program 6.3A. For more information, see Budget Activity 3 on page 5-4 off the DOD Financial Management Regulation (FMR), Volume 2B, Chapter 5, at –

http://comptroller.defense.gov/Portals/45/documents/fmr/Volume_02b.pdf.

Major systems development: The category major systems development is used for activities in DOD's Major Force Programs 6.3B through 6.6. For more information, see Budget Activities 4 through 7 on pages 5-5 to 5-6 of the DOD Financial Management Regulation (FMR), Volume 2B, Chapter 5 at –

http://comptroller.defense.gov/Portals/45/documents/fmr/Volume_02b.pdf.

- **Obligations** reported in this survey should be consistent with amounts in The Budget of the United States Government. The same definitions are used for both.

Obligations represent the amounts for orders placed, contracts awarded, services received, and similar transactions during a given period, regardless of when the funds were appropriated and when future payment of money is required.

- Include direct appropriations, trust funds, special account receipts, corporate income, funds appropriated by the President, and other federal sources.
- Report the year of the obligation regardless of when the funds were originally authorized, received, appropriated, or identified as R&D or R&D plant.
- Include the full costs of R&D, both specific project costs and overhead costs. Include for both intramural and extramural R&D programs: costs of planning and

administering R&D, laboratory overhead, pay of military personnel, departmental administration, and include funds your agency transferred to other agencies for R&D.

- **Do not include funds your agency received from another federal agency.** The transferring agency will report those funds. Similarly, a subdivision of an agency reports the funds it transfers to another subdivision within that agency as its own.

- See other definitions under Table 1.

Tables III, IV, and V are for reporting obligations for research by fields of science and engineering.

Every effort should be made to allocate obligations to a specific discipline for actual year's data rather than to the "other" category. If specific allocation is not feasible, however, obligations reported under the other category should be identified in an explanatory note. In reporting obligations for activities concerned with interdisciplinary studies, funds must not be double-counted.

Fields of Science and Engineering in this survey consist of eight broad field categories, each consisting of a number of detailed fields. The broad fields are computer sciences and mathematics, engineering, environmental sciences, life sciences, physical sciences, psychology, social sciences, and other sciences not elsewhere classified. The following list presents the detailed fields grouped under each of the broad fields, together with illustrative disciplines of detailed fields.

"Other" includes

- projects within a broad field
- single-discipline projects for which a separate field has not been assigned

The illustrative disciplines are intended to be guidelines, not sharp definitions. Research in biochemistry, for example, might be reported as biological, agricultural, or medical, depending on the focus of the project. Human biochemistry would be classified under biological, but animal biochemistry or plant biochemistry would fall under agricultural.

In no case is the research reported under more than one field. No double counting is intended or allowed.

■ **Computer sciences and mathematics**

- **Computer sciences:** Computer sciences, data manipulation, data storage, design or development of computer capabilities, information sciences, information systems, programming languages, systems analysis
- **Mathematics:** Algebra, analysis, applied mathematics, foundations, geometry, logic, numerical analysis, statistics, topology
- **Other computer sciences and mathematics**

■ **Engineering**

- **Aeronautical engineering:** Aerodynamics
- **Astronautical engineering:** Aerospace, space technology
- **Chemical engineering:** Petroleum, petroleum refining process
- **Civil engineering:** Architectural engineering, environmental engineering, hydraulic engineering, hydrologic engineering, marine engineering, sanitary engineering, structural engineering, transportation

- **Electrical engineering:** Communications engineering, electronic engineering, power engineering
- **Mechanical engineering:** Engineering mechanics
- **Metallurgy and materials engineering:** Ceramic engineering, mining, textile engineering, welding
- **Other engineering:** Agricultural engineering, bioengineering, biomedical engineering, industrial engineering, management engineering, nuclear engineering, ocean engineering, systems engineering

■ Environmental sciences

- **Atmospheric sciences:** Aeronomy, extraterrestrial atmospheres, meteorology, solar science, terrestrial atmospheres, weather modification
- **Geological sciences:** Cartography, engineering geophysics, general geology, geodesy, geomagnetism, gravity, hydrology, inorganic geochemistry, isotopic geochemistry, laboratory geophysics, organic geochemistry, paleomagnetism, paleontology, physical geography, seismology
- **Oceanography:** Biological oceanography, chemical oceanography, marine geophysics, physical oceanography
- **Other environmental sciences**

■ Life sciences

Report under oceanography if study is about life in the sea or other bodies of water.

- **Agricultural sciences:** Agronomy, animal sciences, fish and wildlife, food science and technology, forestry, general agriculture, horticulture, phytopathology, phytoproduction, plant sciences, soils and soil science
- **Biological sciences (excluding environmental):** Anatomy, biochemistry, biology, biometry, biophysics, biostatistics, botany, cell biology, entomology, genetics, microbiology, neuroscience (biological), nutrition, parasitology, physiology, zoology
- **Environmental biology:** Biotic community, ecosystem sciences, evolutionary biology, limnology, physiological ecology, population biology, population ecology, systematic biology
- **Medical sciences:** Dentistry, internal medicine, neurology, obstetrics and gynecology, ophthalmology, otolaryngology, pathology, pediatrics, pharmacology, pharmacy, preventive medicine, psychiatry, radiology, surgery, veterinary medicine
- **Other life sciences**

■ Physical sciences

- **Astronomy:** Gamma-ray astronomy, laboratory astrophysics, neutrino astronomy, optical astronomy, radio astronomy, theoretical astrophysics, X-ray astronomy
- **Chemistry:** Inorganic chemistry, organic chemistry, organometallic chemistry, physical chemistry
- **Physics:** Acoustics, atomic physics, condensed-matter physics, elementary particle physics, molecular physics, nuclear structure, optics, plasma physics
- **Other physical sciences**

- **Psychology** deals with behavior, mental processes, and individual and group characteristics and abilities. Psychology in this survey is divided into three categories: biological aspects, social aspects, and other psychological sciences. Examples of the disciplines under each of these fields are as follows:

- **Biological aspects:** Animal behavior, clinical psychology, comparative psychology, ethology, experimental psychology
- **Social aspects:** Development, educational, engineering psychology, industrial psychology, personality, personnel, social psychology, testing, vocational psychology
- **Other psychological sciences**
- **Social sciences:**
 - **Anthropology:** Applied anthropology, archaeology, cultural anthropology, ethnology, personality, social anthropology
 - **Economics:** Agricultural economics, econometrics, economic statistics, economic systems and development, economic theory, history of economic thought, industrial economics, international economics, labor economics, macroeconomics; microeconomics; public finance and fiscal policy
 - **Political science:** Area studies, regional studies, comparative government, history of political ideas, international law, international relations, national political and legal systems, political theory, public administration
 - **Sociology:** Comparative sociology, complex organizations, culture and social structure, demography, group interactions, historical sociology, social problems, social welfare, sociological theory
 - **Other social sciences:** Linguistics, research in education, research in history, research in law (e.g., how legal systems and practices impact society), socioeconomic geography
- **Other sciences not elsewhere classified:** Interdisciplinary studies, multidisciplinary studies, studies that cannot be classified in one of the fields of science above

Tables VI, VII, and VIII cover reporting obligations by performer and character of work. Personnel costs are for identification of obligations for intramural personnel services and related allowances. Such obligations cover salaries for scientists, engineers, and other intramural support personnel, including planning and administrative personnel.

- Under Federal Intramural, report obligations for R&D that are provided to support R&D performed intramurally.
- Under Businesses Excluding FFRDCs, report obligations for R&D that are provided to support R&D by businesses or industrial firms excluding FFRDCs.
- Under FFRDCs Administered by Industrial Firms, report the amount obligated for R&D that is provided to support R&D performed by FFRDCs administered by businesses or industrial firms.
- Under Universities and Colleges Excluding FFRDCs, report obligations for R&D that are provided to support R&D by universities and colleges excluding FFRDCs.
- Under FFRDCs Administered by Universities and Colleges, report the amount obligated for R&D that is provided to support R&D performed by university-administered FFRDCs.
- Under Nonprofit Institutions Excluding FFRDCs, report obligations for R&D that are provided to support R&D by nonprofit institutions excluding FFRDCs.
- Under FFRDCs Administered by Nonprofit Institutions, report obligations for R&D that are provided to support R&D by FFRDCs administered by nonprofit institutions.
- Under State and Local Governments, report obligations for R&D that are provided to support R&D performed by state and local governments.
- Under Foreign, report obligations for R&D located abroad that are provided to support foreign R&D.

Definitions for these tables include:

- **Federally Funded Research and Development Centers (FFRDCs)** are R&D-performing organizations that are exclusively or substantially financed by the federal government. Your department/agency may sponsor or otherwise support an FFRDC in support of R&D that furthers your mission. The survey requests that you report FFRDC obligations separately for the type of organization that administers the FFRDC—industrial firm, university or college, or nonprofit institution. To view the list of current FFRDCs, please see the Master list of FFRDCs at <http://www.nsf.gov/statistics/ffrdclist/>. For more information on FFRDCs, please see <http://www.nsf.gov/statistics/ffrdclist/#gennotes>. (Additional information concerning FFRDCs is found in the reporting guidelines for Table IX.)
- **Foreign performers:** This category includes citizens, organizations, universities and colleges, and governments of other nations. Also, include international organizations located outside the United States who are performing R&D. This category does NOT include R&D performed by U.S. organizations or citizens in other nations. In most cases, foreigners performing R&D in the United States are not reported here. Exception: Include U.S. citizens performing R&D abroad under "special foreign currency funds." (See Public Law 480, sections 104 (a), (k), and (n), the Agricultural Trade Development and Assistance Act of 1954 as amended in 1959.) Examples of foreign performers include: North Atlantic Treatment Organization (NATO), United Nations Educational, Scientific, and Cultural Organization (UNESCO), World Health Organization (WHO).

Care should be taken to report foreign performance only once. For example, if a foreign performer is an educational institution, obligations to that institution should be reported only under foreign performance and not also under universities and colleges.
- **Businesses or industrial firms:** This category of R&D performer includes business (for-profit) as well as private individuals.
- **Intramural performers:** This category includes obligations for R&D performed by federal employees either in your federal department or agency or elsewhere. This category also includes costs associated with your department's or agency's planning and administration of R&D for your intramural programs and extramural programs (i.e., programs conducted by nonfederal R&D performers). For the R&D funds transferred to another federal agency, try to report the funds where they will ultimately be performed—inside or outside the federal government. Use this category if the other federal agency's employees are expected to perform the R&D. If the R&D will eventually be conducted at university and colleges, nonprofit institutions, or businesses, use the appropriate category for these extramural R&D performers. This category also includes the costs of supplies and equipment for the intramural R&D.
- **Nonprofit institution performers:** This category includes private organizations, other than educational institutions, whose net earnings do not benefit either private stockholders or individuals. Examples of nonprofit institutions include foundations, trade associations, charities, and research organizations. Federally funded research and development centers (FFRDCs) administered by nonprofit institutions should be reported under the separate category for R&D performers, "FFRDCs administered by nonprofit institutions."
- **Performer:** A performer is the group, organization, or individual who conducts the R&D activities.
- **Personnel costs:** The survey items on performers ask you to break out the portion of federal intramural obligations for personnel costs. Personnel costs include salaries of both federal employees who perform R&D as well as federal employees who monitor or oversee R&D projects, both intramural and extramural.

If your budget does not include personnel costs as a line item, please estimate these R&D personnel costs and include them in your federal intramural R&D obligations. Even if all of your agency's R&D is performed extramurally, there will be at least some personnel costs associated with monitoring or transferring the R&D program.

Examples of R&D personnel include the following: scientists, engineers, lab technicians, computer programmers, and planning and administrative personnel.

- **State and local government:** This category of R&D performer includes R&D obligations to state and local government agencies regardless of who actually performs the R&D. That is, use this category to report both R&D performed by state and local agencies and R&D subcontracted by a state or local agency to another organization. Exceptions:
 - Report state and local universities and colleges under Universities and colleges.
 - Report agricultural experiment stations under Universities and colleges.
- **Universities and colleges:** This category of R&D performer includes institutions that are engaged primarily in providing resident and/or accredited instruction for at least a 2-year program above the secondary school level. Examples of universities and colleges include the following: community colleges, four-year colleges, universities, free standing professional schools (medical schools, law schools, etc.), hospitals and research institutes associated with universities, and agricultural experiment stations.

Table IX provides for reporting additional information on FY 2014 R&D and R&D plant obligations to FFRDCs. This table requires the breakdown of obligations for R&D (Table VI) and R&D Plant (Table XI) reported to individual FFRDCs administered by industrial firms or businesses, FFRDCs administered by universities and colleges, and FFRDCs administered by nonprofit institutions, by each FFRDC listed. Each agency should report obligations to each FFRDC it supports, even if the FFRDC is sponsored by another agency. Agencies may not unilaterally delete organizations classified as FFRDCs from the list or add organizations to it.

Table X provides for reporting obligations for basic research and total R&D to foreign performers by geographic area and country.

Table XI provides for reporting obligations for R&D plant by the performer of R&D that the R&D plant supports, regardless of the plant's ownership or location.

- Under Federal Intramural, report obligations for R&D plant that are provided to support R&D performed intramurally.
- Under Businesses Excluding FFRDCs, report obligations for R&D plant that are provided to support R&D by businesses or industrial firms excluding FFRDCs.
- Under FFRDCs Administered by Industrial Firms, report the amount obligated for R&D plant that is provided to support R&D performed by FFRDCs administered by businesses or industrial firms.
- Under Universities and Colleges Excluding FFRDCs, report obligations for R&D plant that are provided to support R&D performed by universities and colleges excluding FFRDCs.
- Under FFRDCs Administered by Universities and Colleges, report the amount obligated for R&D plant that is provided to support R&D performed by university-administered FFRDCs.
- Under Nonprofit Institutions Excluding FFRDCs, report obligations for R&D plant that are provided to support R&D performed by nonprofit institutions excluding FFRDCs.
- Under FFRDCs Administered by Nonprofit Institutions, report obligations for R&D plant that are provided to support R&D performed by FFRDCs administered by nonprofit institutions.

- Under State and Local Governments, report obligations for R&D plant that are provided to support R&D performed by state and local governments.
- Under Foreign, report obligations for R&D plant located abroad that are provided to support foreign R&D.

NOTE: The performer of R&D determines the classification of R&D plant obligations.

Tables A, A1, A2, and B: Definitions that were provided earlier in these instructions for R&D, R&D plant, and performers apply to these tables.

General instructions include:

- State locations are requested only for the 11 largest R&D departments/agencies: the Departments of Agriculture, Commerce, Defense, Energy, Health and Human Services, Homeland Security, the Interior, and Transportation; the Environmental Protection Agency; the National Aeronautics and Space Administration; and the National Science Foundation. Report the principal location where the work is performed by the primary contractor, grantee, or intramural organization. If location information is not available, assign the obligations to the state, other area, or office abroad where the headquarters of the U.S. primary contractor, grantee, or intramural organization is located. If location information cannot be reported, assign the R&D obligations to undistributed.
- Both intramural and extramural obligations are required. The extramural obligations are to be reported in terms of prime contracts or grants.
- The amounts reported in these tables for each performer should add to the totals reported for Tables VI and XI.
- R&D obligations to foreign performers or R&D plant obligations in support of foreign performers should not be reported here. See Table X.

Specific instructions include:

- **Table A** presents the combined obligations for R&D that are reported in Tables A1 and A2. The online Table A is read-only.
- **Tables A1 and A2:** Definitions for research, development, performers, basic research, applied research, total research, universities and colleges, and fields of science and engineering that were provided earlier in these instructions apply to these tables also.
 - Table A1 is to be used to report the geographic distribution of FY 2014 obligations for basic and applied research by state and performer. The performer categories are provided in the table.
 - Table A2 is to be used to report the geographic distribution of FY 2014 obligations for development by state and performer. The performer categories are provided in the table.
- **Table B** is to be used to report the geographic distribution of FY 2014 obligations for R&D plant by state or other area and performer.

Tables C, D, and E: Definitions for basic research, applied research, total research, universities and colleges, and fields of science and engineering that were provided for Tables III, IV, and V in these instructions apply to these tables also.

- Obligations for basic, applied, and total research performed at universities and colleges (excluding FFRDCs) by field of science and engineering are requested only for 7 departments/agencies: the Departments of Agriculture, Defense, Energy, Health and Human Services, Homeland Security; the National Aeronautics and Space Administration; and the National Science Foundation.

- The total obligations reported in Tables C, D, and E must equal obligations for basic research, applied research, and the combined obligations for basic and applied research reported for universities and colleges, excluding FFRDCs, of Tables VI, VII, and VIII.

Relationship to the Office of Management and Budget—Table I Narratives for OMB Reconciliation of R&D Outlays and R&D Plant Outlays

Office of Management and Budget (OMB) Circular No. A-11, also called MAX Schedule C, is a mandatory report that collects data from federal agencies for the Budget of the U.S. Government. In this report, federal agencies provide OMB with data on their outlays for R&D by character of work (basic research, applied research, and development) and R&D plant. However, the information provided does not provide as much detail on character of work or performers as the Federal Funds Survey, and it provides no information on fields of science and engineering or geographic distribution. Because the Federal Funds Survey and the OMB report use the same general definitions and guidelines, certain items should be the same. These include:

- Total Outlays for R&D
- Total Outlays for R&D plant

If there are differences between the R&D data submitted for the Federal Funds Survey and for the OMB report, each reporting agency or subdivision should provide an explanation for differences in total R&D and total R&D plant outlays.

Relationship to the NSF Survey of Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions (Federal S&E Support Survey)—Table VI and XI Narratives

- Table VI Narratives—Univ and Col excl FFRDCs R&D Obligations
- Table VI Narratives—Nonprofit Insts excl FFRDCs R&D Obligations
- Table XI Narratives—Univ and Col excl FFRDCs R&D Plant Obligations
- Table XI Narratives—Nonprofit Insts excl FFRDCs R&D Plant Obligations

The following agencies have been requested to provide data to the Federal S&E Support Survey (formerly known as the CASE survey): the Departments of Agriculture, Commerce, Defense, Education, Energy, Health and Human Services, Homeland Security, Housing and Urban Development, the Interior, Labor, and Transportation; the Agency for International Development; the Appalachian Regional Commission; the Environmental Protection Agency; the General Services Administration; the National Aeronautics and Space Administration; the National Science Foundation; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

These agencies have been requested to provide specific obligations data to NSF in response to the reporting system established in 1965 by the Committee on Academic Science and Engineering (CASE) of the Federal Council for Science and Technology; this survey is referred to in these instructions as the Federal S&E Support Survey. The requested data cover obligations for R&D and R&D plant to universities, colleges, and nonprofit institutions, as well as data on other activities. In general the concepts and definitions used in the Federal S&E Support Survey conform to the general guidelines in the Federal Funds Survey. Thus, for agencies participating in both surveys, overall totals for R&D and R&D plant to universities, colleges, and nonprofit

institutions should be essentially the same. Where differences appear in data reported for the two surveys, each reporting agency or subdivision should provide an explanation.

Different totals can sometimes result from the fact that reporting for the Federal Funds Survey and for the Federal S&E Support Survey is accomplished in different ways. For the Federal Funds Survey, each agency includes in its reporting the amounts transferred to other agencies for furtherance of its own purposes; the receiving agencies do not report funds transferred to them. In the Federal S&E Support Survey, however, the data are reported by the agencies in terms of individual performing institutions, and because of this requirement, only the agency that makes the final distribution of the funds can readily determine where the transferred or reimbursable funds are obligated. For this reason agencies reporting to the Federal S&E Support Survey include funds received from other agencies and exclude funds transferred to other agencies, the reverse of the procedure for the Federal Funds Survey.

| 6 | Column total should equal Nonprofit Institutions Excluding FFRDCs total for FY 2014, as reported in Table XI. |
| 7 | Column total should equal FFRDCs Admin by Nonprofit Institutions total for FY 2014, as reported in Table XI. |
| 8 | Column total should equal State and Local Governments total for FY 2014, as reported in Table XI. |

Table C – Obligations for Basic, Applied, and Total Research Performed at Universities and Colleges (excl. FFRDCs), by Field of Science and Engineering: FY 2014

Agency Code:

Agency Name:

NOTE: Please report actual dollars for all amounts.

Field of Science and Engineering	Basic Research	Applied Research	Total Research ¹ (Read Only)
	FY 2014	FY 2014	FY 2014
Computer Sciences and Mathematics			
Computer Sciences			
Mathematics			
Other Computer Sciences and Mathematics			
Total Computer Sciences and Mathematics (Read Only)			
Engineering			
Aeronautical Engineering			
Astronautical Engineering			
Chemical Engineering			
Civil Engineering			
Electrical Engineering			
Mechanical Engineering			
Metallurgy and Materials Engineering			
Other Engineering			
Total Engineering (Read Only)			
Environmental Sciences			
Atmospheric Sciences			
Geological Sciences			
Oceanography			
Other Environmental Sciences			
Total Environmental Sciences (Read Only)			
Life Sciences			
Agricultural Sciences			
Biological Sciences (excluding Environmental)			
Environmental Biology			
Medical Sciences			
Other Life Sciences			
Total Life Sciences (Read Only)			

Field of Science and Engineering	Basic Research	Applied Research	Total Research ¹ (Read Only)
	FY 2014	FY 2014	FY 2014
Physical Sciences			
Astronomy			
Chemistry			
Physics			
Other Physical Sciences			
Total Physical Sciences (Read Only)			
Psychology			
Biological Aspects			
Social Aspects			
Other Psychological Sciences			
Total Psychology (Read Only)			
Social Sciences			
Anthropology			
Economics			
Political Science			
Sociology			
Other Social Sciences			
Total Social Sciences (Read Only)			
Other Sciences not elsewhere classified			
TOTAL All Fields ² (Read Only)			

Please use the space below to add explanations for data reported in this table.

Footnotes:

- 1 Basic Research + Applied Research = Total Research.
- 2 Totals should equal totals for basic and applied research in Univ. and Colleges Excl FFRDCs in Table VI.

Table D - Obligations for Basic, Applied, and Total Research Performed at Universities and Colleges (excl. FFRDCs), by Field of Science and Engineering: FY 2015

Agency Code:

Agency Name:

NOTE: Please report actual dollars for all amounts.

Field of Science and Engineering	Basic Research	Applied Research	Total Research ¹ (Read Only)
	FY 2015	FY 2015	FY 2015
Computer Sciences and Mathematics			
Engineering			
Environmental Sciences			
Life Sciences			
Physical Sciences			
Psychology			
Social Sciences			
Other Sciences not elsewhere classified			
TOTAL All Fields² (Read Only)			

Please use the space below to add explanations for data reported in this table.

Footnotes:

- 1 Basic Research + Applied Research = Total Research.
- 2 Totals should equal totals for basic research and applied research in Univ. and Colleges Excl FFRDCs in Table VII.

Table E - Obligations for Basic, Applied, and Total Research Performed at Universities and Colleges (excl. FFRDCs), by Field of Science and Engineering: FY 2016

Agency Code:

Agency Name:

NOTE: Please report actual dollars for all amounts.

Field of Science and Engineering	Basic Research	Applied Research	Total Research ¹ (Read Only)
	FY 2016	FY 2016	FY 2016
Computer Sciences and Mathematics			
Engineering			
Environmental Sciences			
Life Sciences			
Physical Sciences			
Psychology			
Social Sciences			
Other Sciences not elsewhere classified			
TOTAL All Fields ² (Read Only)			

Please use the space below to add explanations for data reported in this table.

Footnotes:

- 1 Basic Research + Applied Research = Total Research.
- 2 Totals should equal totals for basic and applied research in Univ. and Colleges Excl FFRDCs in Table VIII.
