Please submit your survey data by January 31, 2017.

This survey collects data on research and development (R&D) activities at higher education institutions. Please report R&D activities and expenditures for your institution's 2016 fiscal year.

Your participation in this survey provides important information on the national level of R&D activity. The National Science Foundation (NSF) is authorized to collect this information under the National Science Foundation Act of 1950, as amended. Your institution's response is entirely voluntary.

Response to this survey is estimated to require 54 hours. If you wish to comment on the time required to complete this survey, please contact Suzanne H. Plimpton of NSF at (703) 292-7556, or e-mail splimpto@nsf.gov.

The Web address for submitting your data:
http://www.herdsurvey.org/

Or mail this form to:

What’s New for FY 2016

Changes to Survey Definitions

• The definition of research and development (R&D) and the definitions of basic research, applied research, and development have been updated, but are still consistent with the definitions used in the previous surveys. The updates were made to achieve standardized definitions across all NSF R&D surveys. These definitions mirror the definitions provided in the Frascati Manual 2015, an international document published by the Organisation for Economic Co-operation and Development that provides guidelines for collecting and reporting data on R&D.

Changes to Questions

• Postdocs: The question regarding the number of postdocs paid from R&D expenditures (formerly Question 16) has been removed from the survey.

• Question 2: This question has been expanded to ask for sources of foreign-funded R&D. The question now asks for R&D expenditures funded by foreign governments, businesses, nonprofit organizations, and higher education. If you cannot break out expenditures for these new categories this year, check the box at the top of Question 2 and enter total expenditures from foreign sources on row e.

• Question 6: In addition to the updated definitions of basic research, applied research, and experimental development (also see Survey Definitions and Instructions on the following page), the third example provided in this question has been revised to facilitate better understanding of the differences between each type of R&D.

• Questions 9, 11, and 14: There have been several revisions to the fields of R&D for which you are asked to report expenditures. These changes better reflect the types of R&D currently being conducted at universities and colleges and also make the survey fields more consistent with the taxonomy used by the Department of Education’s Classification of Instructional Programs (CIP).

Changes to the fields of R&D include the following:

• Fields are listed in alphabetical order.
• The names of some fields have been revised to better reflect the disciplines included in those fields.
• New disciplines have been added as examples under many fields.
• Some disciplines have been reclassified under different fields.
• Four new fields have been added: (1) Industrial and Manufacturing Engineering under Engineering, (2) Natural Resources and Conservation under Life Sciences, (3) Materials Science under Physical Sciences, and (4) Anthropology under Social Sciences.

Please see “Reference Materials” on the survey website for additional information about which disciplines have been reclassified under different fields.
Survey Definitions and Instructions

Fiscal Year (FY)
Please report data for your institution’s 2016 fiscal year.

Research and Development (R&D)
R&D is creative and systematic work undertaken in order to increase the stock of knowledge — including knowledge of humankind, culture, and society — and to devise new applications of available knowledge. R&D covers three activities defined below — basic research, applied research, and experimental development.

- **Basic research** is experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view.
- **Applied research** is original investigation undertaken in order to acquire new knowledge. It is directed primarily towards a specific, practical aim or objective.
- **Experimental development** is systematic work, drawing on knowledge gained from research and practical experience and producing additional knowledge, which is directed to producing new products or processes or to improving existing products or processes.

R&D Expenditures
Include all R&D expenditures from your institution’s current operating funds that are separately accounted for. For purposes of this survey, R&D includes expenditures for organized research as defined by 2 CFR Part 200 Appendix III and expenditures from funds designated for research.

R&D includes:
- Sponsored research (federal and nonfederal)
- University research (institutional funds that are separately budgeted for individual R&D projects)
- Startup, bridge, or seed funding provided to researchers within your institution
- Other departmental funds designated for research
- Recovered and unrecovered indirect costs (see definitions in Question 1)
- Equipment purchased from R&D project accounts
- R&D funds passed through to a subrecipient organization, educational or other
- Clinical trials, Phases I, II, or III (see definition in Question 5)
- Research training grants funding work on organized research projects
- Tuition remission provided to students working on research

R&D does not include:
- Public service grants or outreach programs
- Curriculum development (unless included as part of an overall research project)
- R&D conducted by university faculty or staff at outside institutions that is not accounted for in your financial records
- Estimates of the proportion of time budgeted for instruction that is spent on research
- Capital projects (i.e., construction or renovation of research facilities)
- Non-research training grants
- Unrecovered indirect costs that exceed your institution’s federally negotiated Facilities and Administrative (F&A) rate

Reporting Units
Please include these components of your institution:
- All units of your institution included in or with your financial statements, such as:
  - Agricultural experiment stations
  - Branch campuses
  - Medical schools
  - Hospitals or clinics
  - Research centers and facilities
  - A university 501(c)3 foundation

Please do not include:
- Federally Funded R&D Centers (FFRDCs). This information is collected separately. See the list of FFRDCs: http://www.nsf.gov/statistics/ffrdc/.
- Other organizations or institutions, such as teaching hospitals or research institutes, with which your institution has an affiliation or relationship, but which are not components of your institution.
- Other campuses headed by their own president, chancellor, or equivalent within your university system. Each campus is asked to respond separately.
**Question 1.** How much of your total expenditures for research and development (R&D) came from the following sources in FY 2016? (See definition of R&D on the previous page.)

- In rows a, b, c, d, and f: Include both direct and recovered indirect costs (reimbursement of F&A costs from external sponsors).
- Report the original source of funds, when possible.
- Include all fields of R&D (e.g., sciences, engineering, humanities, education, law, arts).
  See full listing in Question 9.

### Question 3

**Of the total R&D expenditures that were externally funded (all sources other than the institutional funds reported in Question 1, row e4), how much was received under each of the following types of agreements?**

<table>
<thead>
<tr>
<th>Type of agreement</th>
<th>R&amp;D expenditures (Dollars in thousands)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>a. Contracts</strong> (including direct or prime contracts and subcontracts)</td>
<td>$__________</td>
</tr>
<tr>
<td>Contracts are legal commitments in which a good or service is provided by your institution that benefits the sponsor. The sponsor specifies the deliverables and gains the rights to results.</td>
<td></td>
</tr>
<tr>
<td><strong>b. Grants, reimbursements, and all other agreements</strong></td>
<td>$__________</td>
</tr>
<tr>
<td>Include all other agreements in which payments are received but no good or service other than periodic reporting is required in exchange.</td>
<td></td>
</tr>
<tr>
<td><strong>c. Total¹</strong></td>
<td>$TOTAL</td>
</tr>
<tr>
<td>(Total should match Question 1, row g minus Question 1, row e4)</td>
<td></td>
</tr>
</tbody>
</table>

¹ The column total is automatically generated on the Web survey.
Question 4. Of the total R&D expenditures reported in Question 1, row g, how much was expended for R&D projects in your medical school? Include projects that are assigned to the medical school or to research centers that are organizationally part of the medical school.

If your institution does not have a medical school (that is, a school that awards the MD or DO degree), check here and go to Question 5.

R&D expenditures (Dollars in thousands)

Total R&D expenditures in the university’s medical school

$________

Question 5. Of the total R&D expenditures reported in Question 1, row g, how much was expended for Phase I, Phase II, and Phase III clinical trials with human patients?

Clinical trials are research studies designed to answer specific questions about the effects of drugs, vaccines, medical devices, tests, treatments, and other therapies for patients. Clinical trials are used to determine safety and effectiveness.

For reference, the National Institutes of Health (NIH) categorizes human clinical trials into the following four phases.

Please include:
- Phase I uses a small group of human patients (20–80) to evaluate safety and identify side effects.
- Phase II uses a larger group (100–300) to test effectiveness and further evaluate safety.
- Phase III uses a large group (1,000–3,000) to confirm effectiveness, monitor side effects, compare to commonly used treatments, and collect safety information.

Please exclude:
- Phase IV is a post-market study that collects more information on risks, benefits, and optimal use.

If your institution did not conduct any clinical trials in FY 2016, check here:

R&D expenditures (Dollars in thousands)

$ TOTAL

1 The row total is automatically generated on the Web survey.
Question 6. What amounts of your FY 2016 R&D expenditures were for basic research, applied research, and experimental development?

If possible, these categories defining the type of R&D should be coded at the individual project level by the principal investigator. Estimates are acceptable if necessary.

See the table below this question for examples.

<table>
<thead>
<tr>
<th>R&amp;D expenditures (Dollars in thousands)</th>
</tr>
</thead>
<tbody>
<tr>
<td>(1) Federal</td>
</tr>
<tr>
<td>(2) Nonfederal</td>
</tr>
<tr>
<td>(3) Total</td>
</tr>
</tbody>
</table>

a. Basic research
Experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view.

b. Applied research
Original investigation undertaken in order to acquire new knowledge. It is directed primarily towards a specific, practical aim or objective.

c. Experimental development
Systematic work, drawing on knowledge gained from research and practical experience and producing additional knowledge, which is directed to producing new products or processes or to improving existing products or processes.

d. Total
Column 1 total should match Question 1, row a. Column 3 total should match Question 1, row g.

1 Row and column totals are automatically generated on the Web survey.

### Examples

<table>
<thead>
<tr>
<th>Basic research</th>
<th>Applied research</th>
<th>Experimental development</th>
</tr>
</thead>
<tbody>
<tr>
<td>A researcher is studying the properties of human blood to determine what affects coagulation.</td>
<td>A researcher is conducting research on how a new chicken pox vaccine affects blood coagulation.</td>
<td>A researcher is conducting clinical trials to test a newly developed chicken pox vaccine for young children.</td>
</tr>
<tr>
<td>A researcher is studying the properties of molecules under various heat and cold conditions.</td>
<td>A researcher is investigating the properties of particular substances under various heat and cold conditions with the objective of finding longer-lasting components for highway pavement.</td>
<td>A researcher is working with state transportation officials to conduct tests of a newly developed highway pavement under various types of heat and cold conditions.</td>
</tr>
<tr>
<td>A researcher is investigating the effect of different types of manipulatives on the way first graders learn mathematical strategy by changing manipulatives and then measuring what students have learned through standardized instruments.</td>
<td>A researcher is studying the implementation of a specific math curriculum to determine what teachers needed to know to implement the curriculum successfully.</td>
<td>A researcher is developing and testing software and support tools, based on fieldwork, to improve mathematics cognition for student special education.</td>
</tr>
</tbody>
</table>
**Question 7.** How much of your R&D expenditures reported in Question 1 did your institution receive as a subrecipient?

Please report the original source of funds in columns (1) and (2) and the pass-through source in rows a–d.

The **subrecipient** for an award carries out the work but receives the funds from a pass-through entity rather than directly from the original funding source. Subrecipients tend to be the co-authors of publications, writers of technical reports discussing findings, inventors, etc. **Do not** include contractor or vendor relationships. A contractor or vendor receives payment for goods and services provided. See 2 CFR Part 200 Subpart D Section 330.

**Examples:**
- A university receives federal funds from another university as a subaward (Row a, column 1).
- A university receives federal funds from a company as a subaward (Row b, column 1).

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

$ Row and column totals are automatically generated on the Web survey.
Question 8. How much of the R&D expenditures reported in Question 1 did your institution pass through to subrecipients?

Please report the original source of funds in columns (1) and (2) and the entity receiving the funds in rows a–d.

Do **not** include contractor or vendor relationships. A contractor or vendor receives payment for goods and services provided. See 2 CFR Part 200 Subpart D Section 330.

Examples:
- Your institution passed through federal funds to another university (Row a, column 1).
- Your institution passed through funds from a company to another university (Row a, column 2).

**Question 9A–B.** What were your FY 2016 R&D expenditures in the computer and information sciences and engineering funded by the federal agency sources below? (R&D expenditures from nonfederal sources will be reported in Question 11.)

- Question 9 total (page 17, row K, column h) should match Question 1, row a.
- Please see “Reference Materials” on the survey website for a list of the subagencies belonging to each agency shown below.
- If an individual project involves more than one of the 40 fields of R&D, please prorate expenditures when possible and report the amount for each field involved.
- For subrecipient funding, report the agency that sponsored the original award.

## Examples of Disciplines: Computer and Information Sciences and Engineering Fields of R&D

### A. Computer and Information Sciences
- Artificial intelligence
- Computer software and media applications
- Computer systems analysis
- Computer systems networking and telecommunications
- Data processing
- Information sciences, studies
- Information technology

### B. Engineering

#### 1. Aerospace, Aeronautical, and Astronautical Engineering
- Aerodynamics
- Aerospace engineering
- Space technology

#### 2. Bioengineering and Biomedical Engineering
- Biological and biosystems engineering
- Biomaterials engineering
- Biomedical technology
- Medical engineering

#### 3. Chemical Engineering
- Biochemical engineering
- Chemical and biomolecular engineering
- Engineering chemistry
- Paper science
- Petroleum refining process
- Polymer, plastics engineering

#### 4. Civil Engineering
- Architectural engineering
- Construction engineering
- Engineering management, administration
- Environmental, environmental health engineering
- Geotechnical and geoenvironmental engineering
- Sanitary engineering
- Structural engineering
- Surveying engineering
- Transportation and highway engineering
- Water resources engineering

#### 5. Electrical, Electronic, and Communications Engineering
- Communications engineering
- Computer engineering
- Computer hardware engineering
- Computer software engineering
- Electrical and electronics engineering
- Laser and optical engineering
- Power
- Telecommunications engineering

#### 6. Industrial and Manufacturing Engineering
- Industrial engineering
- Manufacturing engineering
- Operations research
- Systems engineering

#### 7. Mechanical Engineering
- Electromechanical engineering
- Mechatronics, robotics, and automation engineering

#### 8. Metallurgical and Materials Engineering
- Ceramic sciences and engineering
- Geophysical, geological engineering
- Materials engineering
- Metallurgical engineering
- Mining and mineral engineering
- Textile sciences and engineering
- Welding

#### 9. Other Engineering
- Agricultural engineering
- Engineering design
- Engineering mechanics, physics, and science
- Engineering physics
- Engineering science
- Forest engineering
- Nanotechnology
- Naval architecture and marine engineering
- Nuclear engineering
- Ocean engineering
- Petroleum engineering
- Other engineering fields that cannot be classified using the fields listed above

---

**Question 9 continues on next page.**
Question 9C. What were your FY 2016 R&D expenditures in the geosciences, atmospheric sciences, and ocean sciences funded by the federal agency sources below? (R&D expenditures from nonfederal sources will be reported in Question 11.)

1 Key: USDA, Department of Agriculture; DoD, Department of Defense; Energy, Department of Energy; HHS, Department of Health and Human Services; NASA, National Aeronautics and Space Administration; NIH, National Institutes of Health; NSF, National Science Foundation. “Other” includes all other federal agencies.

2 Row and column totals are automatically generated on the Web survey.

Examples of Disciplines: Geosciences, Atmospheric Sciences, and Ocean Sciences Fields of R&D

C. Geosciences, Atmospheric Sciences, and Ocean Sciences

1. Atmospheric Science and Meteorology
   - Aeronomy
   - Atmospheric chemistry and climatology
   - Atmospheric physics and dynamics
   - Extraterrestrial atmospheres
   - Meteorology
   - Solar
   - Weather modification

2. Geological and Earth Sciences
   - Earth and planetary sciences
   - Geochemistry
   - Geodesy and gravity
   - Geology
   - Geomagnetism
   - Geophysics and seismology
   - Hydrology and water resources
   - Mineralogy and petrology
   - Paleomagnetism
   - Paleontology
   - Physical geography
   - Stratigraphy and sedimentation
   - Surveying

3. Ocean Sciences and Marine Sciences
   - Biological oceanography
   - Geological oceanography
   - Marine biology
   - Marine oceanography
   - Marine sciences
   - Oceanography, chemical and physical

4. Other Geosciences, Atmospheric Sciences, and Ocean Sciences
   - Other fields that cannot be classified using the fields listed above

Question 9 continues on next page.
**Question 9D.** What were your FY 2016 R&D expenditures in the life sciences funded by the federal agency sources below? (R&D expenditures from nonfederal sources will be reported in Question 11.)

Examples of Disciplines: Life Sciences Fields of R&D

**D. Life Sciences**

1. **Agricultural Sciences**
   - Agricultural business and management
   - Agricultural chemistry
   - Agricultural economics
   - Agricultural engineering—report in Engineering
   - Agricultural production operations
   - Animal sciences
   - Applied horticulture and horticultural business services
   - Aquaculture
   - Food science and technology
   - International agriculture
   - Plant sciences
   - Soil sciences
   - Wood science

2. **Biological and Biomedical Sciences**
   - Allergies and immunology
   - Biochemistry, biophysics, and molecular biology
   - Biogeography
   - Biology and biomedical sciences, general
   - Biomatics, bioinformatics, and computational biology
   - Biototechnology
   - Botany and plant biology
   - Cell, cellular biology, and anatomical sciences
   - Epidemiology, ecology and population biology
   - Genetics
   - Microbiological sciences and immunology
   - Molecular medicine
   - Neurobiology and neuroscience
   - Pharmacology and toxicology
   - Physiology, pathology and related sciences
   - Zoology, animal biology

3. **Health Sciences**
   - Advanced, graduate dentistry and oral sciences
   - Allied health and medical assisting services
   - Bioethics, medical ethics
   - Clinical medicine research
   - Clinical/medical laboratory science/research and allied professions
   - Communication disorders sciences and services
   - Dentistry
   - Dietetics and clinical nutrition services
   - Health and medical administrative services
   - Health, medical preparatory programs
   - Gerontology, health sciences
   - Kinesiology and exercise science
   - Medical clinical science, graduate medical studies
   - Medical illustration and informatics
   - Medicine
   - Mental health
   - Optometry
   - Osteopathic medicine, osteopathy
   - Pharmacy, pharmaceutical sciences, and administration
   - Podiatric medicine, podiatry
   - Public health
   - Radiological science
   - Registered nursing, nursing administration, nursing research and clinical nursing
   - Rehabilitation and therapeutic professions
   - Veterinary biomedical and clinical sciences
   - Veterinary medicine
   - Zoology

4. **Natural Resources and Conservation**
   - Fishing and fisheries sciences and management
   - Forestry
   - Natural resources conservation and research
   - Natural resources economics
   - Natural resources management and policy
   - Renewable natural resources
   - Wildlife and wildlands science and management

5. **Other Life Sciences**
   - Other life sciences that cannot be classified using the fields listed above

[Question 9 continues on next page.]
**Question 9E–G.** What were your FY 2016 R&D expenditures in mathematics and statistics, the physical sciences, and psychology funded by the federal agency sources below? (R&D expenditures from nonfederal sources will be reported in Question 11.)

### H. Social Sciences

1. **Anthropology**
   - Cultural anthropology
   - Medical anthropology
   - Physical and biological anthropology

2. **Economics**
   - Applied economics
   - Business development
   - Development economics and international development
   - Econometrics and quantitative economics
   - Industrial economics
   - International economics
   - Labor economics
   - Managerial economics
   - Public finance and fiscal policy

3. **Political Science and Government**
   - Comparative government
   - Government
   - Legal systems
   - Political economy
   - Political science
   - Political theory

4. **Sociology, Demography, and Population Studies**
   - Comparative and historical sociology
   - Complex organizations
   - Cultural and social structure
   - Demography and population studies
   - Group interactions
   - Rural sociology
   - Social problems and welfare theory
   - Sociology

5. **Other Social Sciences**
   - Archaeology
   - Area, ethnic, cultural, gender, and group studies
   - Cartography
   - Criminal science and corrections
   - Criminology
   - Geography
   - Gerontology, social sciences
   - International relations and national security studies
   - Linguistics
   - Public policy analysis
   - Regional studies
   - Urban studies, affairs

### I. Other Sciences

Use this category for R&D that involves at least one S&E field (rows A–H) if it is impossible to report multidisciplinary or interdisciplinary R&D expenditures in specific fields.

---

1. **Key:** USDA, Department of Agriculture; DoD, Department of Defense; Energy, Department of Energy; HHS, Department of Health and Human Services; NASA, National Aeronautics and Space Administration; NIH, National Institutes of Health; NSF, National Science Foundation. “Other” includes all other federal agencies.

2. Row and column totals are automatically generated on the Web survey.

J. Non-S&E Fields

1. Business Management and Business Administration

2. Communication and Communications Technologies

3. Education

4. Humanities

5. Law

6. Social Work

7. Visual and Performing Arts

8. Other Non-S&E Fields

9. Total

K. Total for All Fields of R&D

Total for row K, column h should equal Total for Question 1, row a.

1 Key: USDA, Department of Agriculture; DoD, Department of Defense; Energy, Department of Energy; HHS, Department of Health and Human Services; NASA, National Aeronautics and Space Administration; NIH, National Institutes of Health; NSF, National Science Foundation. “Other” includes all other federal agencies.

2 Row and column totals are automatically generated on the Web survey.
Examples of Disciplines: Non-S&E Fields of R&D

J. Non-S&E Fields

1. Business
   Management and Business Administration
   Business administration
   Business management
   Business, managerial economics
   Management information systems and services
   Marketing management and research

2. Communication and Communications Technologies
   Communication and media studies
   Communications technologies
   Journalism
   Radio, television, and digital communication

3. Education
   Education administration and supervision
   Education research
   Teacher education, specific levels and methods
   Teaching fields

4. Humanities
   English language and literature, letters
   Foreign languages and literatures
   History, including history and philosophy of science and technology
   Humanities, general
   Liberal arts and sciences
   Philosophy and religious studies
   Theology and religious vocations

5. Law
   Law
   Legal studies

6. Social Work
   (no specific examples)

7. Visual and Performing Arts
   Drama, theatre arts and stagecraft
   Film, video, and photographic arts
   Fine and studio arts
   Music

8. Other Non-S&E Fields
   Architecture
   City, urban, community and regional planning
   Family, consumer sciences and human sciences
   Foods, nutrition, and wellness studies
   Landscape architecture
   Library science
   Military technology and applied science
   Parks, sports, recreation, leisure and fitness
   Public administration and public affairs
   Other non-S&E fields that cannot be classified using the fields listed above
   Also, use this category for R&D that involves multiple non-S&E fields if it is impossible to report multidisciplinary or interdisciplinary R&D expenditures in specific fields.
Question 10. Of the amount reported for Other federal sources in Question 9 (row K, column g), which agencies funded this R&D and how much of the reported amount was from each agency?

If your institution reported $0 in Question 9, row K, column g, check here and go to Question 11.

- Use rows a–j to list up to 10 agencies that funded the largest R&D expenditures.
- Use row k to report any remaining amount.
- For subrecipient funding in this question, list the sponsor of the original award.
- Please see “Reference Materials” on the survey website for a list of federal agencies and their subagencies.

<table>
<thead>
<tr>

K. Total for All Fields of R&D | $ TOTAL | $ TOTAL | $ TOTAL | $ TOTAL | $ TOTAL | $ TOTAL |

Totals in row K, columns a–e should match corresponding sources in Question 1, rows b–f.

1 Row and column totals are automatically generated on the Web survey.

Examples of disciplines for non-S&E fields of R&D are listed on page 18.
Question 12. Of the total amount of R&D expenditures reported in Question 1, row g, what were the amounts for the following types of costs?

- Please report only direct costs (including cost sharing) in rows a–e.
- Recovered and unrecovered indirect costs should be reported in rows f1 and f2.

<table>
<thead>
<tr>
<th>R&amp;D expenditures (Dollars in thousands)</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Salaries, wages, and fringe benefits</strong></td>
<td>$</td>
</tr>
<tr>
<td>Include compensation for all R&amp;D personnel whether full-time or part-time, temporary or permanent. Include salaries, wages, and fringe benefits paid from your institution’s funds and from external support.</td>
<td></td>
</tr>
<tr>
<td><strong>Software purchases</strong></td>
<td>$</td>
</tr>
<tr>
<td>All payments for software. Include both purchases of software packages and license fees for systems.</td>
<td></td>

K. Total for All Fields of R&D¹

$ TOTAL $ TOTAL $ TOTAL

Total for row K, column c, should match Question 12, row c (Capitalized equipment).

¹ Row and column totals are automatically generated on the Web survey.

Examples of disciplines for non-S&E fields of R&D are listed on page 18.

Question 15. How many principal investigators and other personnel (headcount) were paid from the R&D salaries, wages, and fringe benefits you reported in Question 12, row a?

- A principal investigator (PI) is designated by your institution to direct the R&D project or program and be responsible for the scientific and technical direction of the project. Co-investigators (co-PIs) may be designated for this role and should also be included in column 1.
- Count each person only once.
- If a person serves as a PI or co-PI on one project and other personnel on another project, count that person as a PI.
- Include all personnel and students paid from R&D accounts regardless of how much they received.

<table>
<thead>
<tr>
<th>(1) Principal investigators</th>
<th>(2) All other personnel</th>
<th>(3) Total¹</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of people (headcount)</td>
<td>$_________</td>
<td>$_________</td>
</tr>
</tbody>
</table>

¹ The row total is automatically generated on the Web survey.
Question 16.

**a. Contact information:** Please complete the contact information for the person responsible for the survey and an alternate contact.

<table>
<thead>
