HIGHER EDUCATION RESEARCH AND DEVELOPMENT SURVEY
FY 2009

Please submit your survey data by February 26, 2010.

This survey collects data on research and development (R&D) activities at higher education institutions. Please report R&D activities and expenditures for your institution's **2009** fiscal year.

The survey was previously known as the Survey of Research and Development Expenditures at Universities and Colleges. The next two pages summarize the changes from the FY 2008 survey and present updated instructions and definitions.

Your participation in this survey provides important information on the national level of R&D activity. NSF is authorized to collect this information under the National Science Foundation Act of 1950, as amended. Your institution's response is entirely voluntary. Your institution will be treated equally in future governmental decisions whether you provide all, some, or none of the requested survey information.

Thank you for your participation.

What's New

The Higher Education Research & Development Survey, formerly the Survey of Research and Development Expenditures at Universities and Colleges, has undergone a redesign in consultation with experts, data users, and university representatives. This page briefly describes the changes and additions.

Include all fields of R&D in all survey items

Please note that this revised questionnaire includes R&D in science and engineering (S&E) fields and in non-science and engineering (non-S&E) fields such as humanities, education, law, and the arts. R&D in both S&E and non-S&E fields is included in all survey items, beginning with Question 1 and continuing throughout the questionnaire. See question 9 for a complete listing of all fields of R&D. **Please note:** There are no changes to the fields of R&D nor to the listings of examples for each field.

Other general changes

- Two alternative listings show the discipline examples for each R&D field—1) sorted alphabetically, and 2) sorted by the CIP codes used by the U.S. Department of Education's National Center for Education Statistics (NCES). Find both lists under Survey Resources on the survey website.
- Clinical trials and research training grants are now explicitly included in the definition of R&D.

Changes to questions

- Sources of Funds (Question 1). Separate categories have been created for nonprofit organizations and for institutional cost sharing. The "Industry" category has been renamed "Business."
- Basic and Applied Research and Development (Question 6). This question now asks for expenditures associated with basic research, applied research, and development.
- Expenditures by Field and Source (Questions 9 and 12). Information on expenditures is collected by field of R&D for all sources of funds.
 - Question 9 collects R&D expenditures funded by specific federal agencies and total federal funding by field.
 - Question 12 collects information for each nonfederal source and total nonfederal funding by field.

New questions

- Question 2. R&D expenditures of funds from foreign sources
- Question 3. R&D at medical schools
- Question 4. Clinical trial R&D expenditures
- Question 5. Contracts and grants
- Question 10. Other federal agency sources for R&D expenditures
- Question 11. Federally funded R&D expenditures at interdisciplinary research centers
- Question 13. Nonfederally funded R&D expenditures at interdisciplinary research centers
- Question 14. Specific cost elements of R&D expenditures
- Questions 17 and 18. Counts of R&D personnel
- Questions 19 through 22. R&D proposal and award counts

Survey Definitions and Instructions

Fiscal year (FY)

Please report data for your institution's 2009 fiscal year.

Research and development (R&D)

R&D includes "organized research" as defined by **2 CFR 220 (OMB Circular A-21)**. Please include all R&D activities of an institution that are **separately budgeted and accounted for** (see definition below). R&D includes both "sponsored research" activities (sponsored by federal and nonfederal agencies and organizations) and "university research" (separately budgeted under an internal application of institutional funds).

Separately budgeted R&D

This includes all funds expended for activities specifically organized to produce R&D outcomes and commissioned by an organization either external to the institution or separately budgeted by an organizational unit within the institution. Such expenditures include, among others, all those funded from unrestricted gifts and restricted current funds to the extent that such funds were expended for current operating purposes.

R&D <i>includes</i> :	R&D does <i>not</i> include:
<ul style="list-style-type: none"> • Direct and indirect costs • Equipment purchased from R&D project accounts • R&D funds passed through to a subrecipient organization, educational or other • Clinical trial research (Phases I, II, and III) • Research training grants (such as NIH K awards and T32 grants) 	<ul style="list-style-type: none"> • Public service grants • Program evaluation • Departmental research expenditures that are not separately budgeted • R&D conducted by university faculty or staff at outside institutions that is not accounted for in your financial records • Non-research training grants • Capital projects

Please <i>include</i> these components of your institution:	Please do <i>not</i> include:
<ul style="list-style-type: none"> • All units of your institution included in or with your financial statements, such as: <ul style="list-style-type: none"> ◦ Agricultural experiment stations ◦ Branch campuses ◦ Medical schools ◦ Hospitals or clinics ◦ Research centers and facilities ◦ A university 501(c)3 foundation established to handle R&D awards. 	<ul style="list-style-type: none"> • Federally funded R&D centers (FFRDCs). This information is collected separately. See the list of FFRDCs: http://www.nsf.gov/statistics/ffrdc/ • Other organizations or institutions, such as teaching hospitals or research institutes, with which your institution has an affiliation or relationship, but which are <u>not</u> components of your institution.

Question 1. How much of your total current fund expenditures for separately budgeted research and development (R&D) came from the following sources in FY 2009? (See definition of R&D on the previous page.)

- Include both **direct** and **recovered indirect costs** in rows a, b, c, d, and f.
- Report the **original source** of funds, when possible. For example, if you received **federal** funds from another university, report that amount under “U.S. federal government.”
- Include S&E and non-S&E fields of R&D: sciences, engineering, humanities, education, law, arts, etc. See full listing in Question 9.

SOURCE OF FUNDS	R&D expenditures (Dollars in thousands) (for example, report \$25,342 as \$25)
<p>a. U.S. federal government Any agency of the United States government.</p>	\$ _____
<p>b. State and local government Any state, county, municipality, or other local government entity in the United States, including state health agencies. Include state funds that support R&D at agricultural and other experiment stations.</p>	\$ _____
<p>c. Business Domestic or foreign for-profit organizations. (Report funds from a company’s nonprofit foundation in row d.)</p>	\$ _____
<p>d. Nonprofit organizations Domestic or foreign nonprofit foundations and organizations.</p>	\$ _____
<p>e. Institutional funds</p> <p>1. Institutionally financed organized research. Include expenditures of university funds from unrestricted sources that are separately budgeted for organized research.</p> <p>2. Cost sharing Include committed cost sharing other than unrecovered indirect costs. Report unrecovered indirect costs in row e3.</p> <p>3. Unrecovered indirect costs You may calculate this amount as follows for your externally funded R&D (preferably on a project-specific basis) using the appropriate cost rate—on-campus, off-campus, etc.</p> <ul style="list-style-type: none"> • First, multiply the <u>negotiated</u> rate by the corresponding base. • Second, subtract recovered indirect costs. <p>4. <p>f. All other sources Other sources not reported above, such as funds from foreign governments.</p>	\$ _____
<p>g. Total ²</p>	\$ <u>TOTAL</u>

¹ Information from confidential items is NOT published or released for individual institutions; only aggregate totals will appear in publications. In accordance with the National Science Foundation Act of 1950, as amended, and other applicable federal laws, your responses will not be disclosed in identifiable form to anyone other than agency employees or authorized persons.

² Column totals are automatically generated on the web survey.

Question 2. How much of the total R&D expenditures reported in Question 1 came from foreign sources?

- Foreign sources include foreign governments, businesses, and nonprofit organizations located outside the U.S.
- Foreign sources do not include Puerto Rico or other territories of the United States.

b. Veterinary clinical trials	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Question 5. Of the total R&D expenditures that were externally funded (all sources other than the institutional funds reported in Question 1, row e4), how much was received under each of the following types of agreements?

	R&D expenditures (Dollars in thousands)
a. Contracts (including direct or prime contracts and subcontracts)	\$ _____
b. Grants, reimbursements, and all other agreements	\$ _____
c. Total ¹ (should match Question 1, row g minus Question 1, row e4)	\$ <u>TOTAL</u>

¹ The column total is automatically generated on the web survey.

Question 6. What amounts of your FY 2009 R&D expenditures were for basic research, applied research, and development? Estimates are acceptable.

See the box below this question for examples.

Basic research	Applied research	Development
A researcher is studying the properties of human blood to determine what affects coagulation.	A researcher is conducting research on how a new chicken pox vaccine affects blood coagulation.	A researcher is conducting clinical trials to test a newly developed chicken pox vaccine for young children.
A researcher is studying the properties of molecules under various heat and cold conditions.	A researcher is investigating the properties of particular substances under various heat and cold conditions with the objective of finding longer lasting components for highway pavement.	A researcher is working with state transportation officials to conduct tests of a newly developed highway pavement under various types of heat and cold conditions.
A researcher is studying the heart chambers of various fish species.	A researcher is examining various levels of a toxic substance to determine the maximum safe level for fish in a stream.	A researcher has a contract with the U.S. government to design a new stream monitoring system that will incorporate the latest research findings on toxicity levels for fish.

Question 7. How much of your R&D expenditures reported in Question 1 did your institution receive as a subrecipient?

The **subrecipient** for an award carries out the work but receives the funds from a pass-through entity rather than directly from the original funding source. See OMB Circular A-133, Section 105 for the federal definition. Subrecipients tend to be the co-authors of publications, writers of technical reports discussing findings, inventors, etc. Do **not** include vendor relationships. A vendor supplies goods and services. See OMB Circular A-133, Section 210.

Question 9A. What were your FY 2009 R&D expenditures in engineering funded by the federal agency sources below? (R&D expenditures from nonfederal sources will be reported in Question 12.)

- The total for the last row (row K, page 14) should match total federal sources reported in Question 1, row a.
- Examples of the disciplines included in each field are listed below.
- If an individual project involves more than one of the 36 fields of R&D, please prorate expenditures when possible and report the amount for each field involved.

¹ The row total is automatically generated on the web survey.

Question 18. Of the headcount reported in Question 17, column 3, how many are postdocs, that is, Ph.D. researchers working in temporary positions primarily for training in research?

Postdoc positions are designated as temporary positions for a defined period of time. Titles for postdocs can include postdoctoral researchers, postdoctoral fellows, research associates, etc.

Number of people (headcount)

Question 19. How many R&D proposals (S&E and non-S&E) were submitted by your institution to government agencies, foundations, or other funding sources outside of your institution in FY 2009? Include proposals for grants and contracts and any other documents or actions that were used to apply for R&D funding.

Number of proposals submitted

Question 20. How many R&D projects in both science and engineering (S&E) and non-S&E fields were AWARDED to your institution in FY 2009 from the sources below and what were their dollar amounts?

- Include only awards for research. Do not include awards for instruction, outreach, public service, or other sponsored activities.
- Include the total amount awarded in FY 2009, even if the funds will be spent over multiple years. For example, if your institution receives an award of \$5,000,000 that will be spent over five years, report \$5,000,000.
- The total amount of the award should be reported by the prime award recipient. Exclude subawards your institution received as a subrecipient.

Question 21. How many of the R&D project awards reported in Question 20 involved interdisciplinary R&D and what was their dollar amount?

Interdisciplinary R&D is a mode of R&D by teams or individuals that integrates information, data, techniques, tools, perspectives, concepts, and/or theories from two or more disciplines or bodies of specialized knowledge to advance fundamental understanding or to solve problems whose solutions are beyond the scope of a single discipline or area of R&D practice.

Question 22. Of the total R&D awards reported in Question 20, how many were collaborative awards with other academic institutions and what was their dollar amount?

- **Collaborative awards with other academic institutions** involve two or more higher education institutions, where each institution receives funding directly from the prime source.
- **Exclude** subrecipient awards—for example, awards for which your institution was a subrecipient of funds or passed funds through to another institution.

	(1) Number	(2) Dollars in thousands
