

State Indicators

S-44 State Agency R&D Expenditures per \$1 Million of Gross Domestic Product

Description

This indicator represents the ratio of state agency R&D funding to the size of a state's economy. State R&D funding expenditures include state-administered funds from all sources, including the federal government, that support R&D performed by either a state agency or an external performer. Nationally, most R&D is performed by sources other than state agencies, which typically account for less than 1% of total R&D expenditures.

Data on state R&D funding cover R&D performed by intramural performers (state government departments, agencies, independent commissions, and other state-run entities) as well as extramural performers such as academic institutions, companies, and individuals.

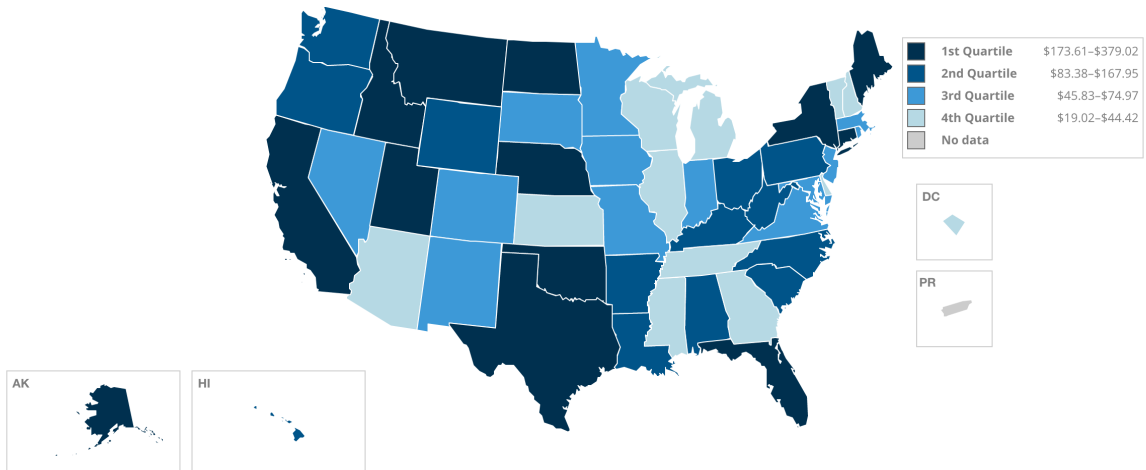

State R&D totals can display considerable volatility between survey years due to state-specific factors. Large changes are not unusual, especially for discretionary spending items such as R&D. Because of differences in the survey populations, the definition of covered R&D activities, and collection methods, the results of the National Science Foundation surveys on state government R&D prior to 2006 are not comparable.

Data sources: National Science Foundation, National Center for Science and Engineering Statistics, Survey of State Research and Development; U.S. Bureau of Economic Analysis, Gross Domestic Product data; Government of Puerto Rico, Office of the Governor, Gross Domestic Product data.

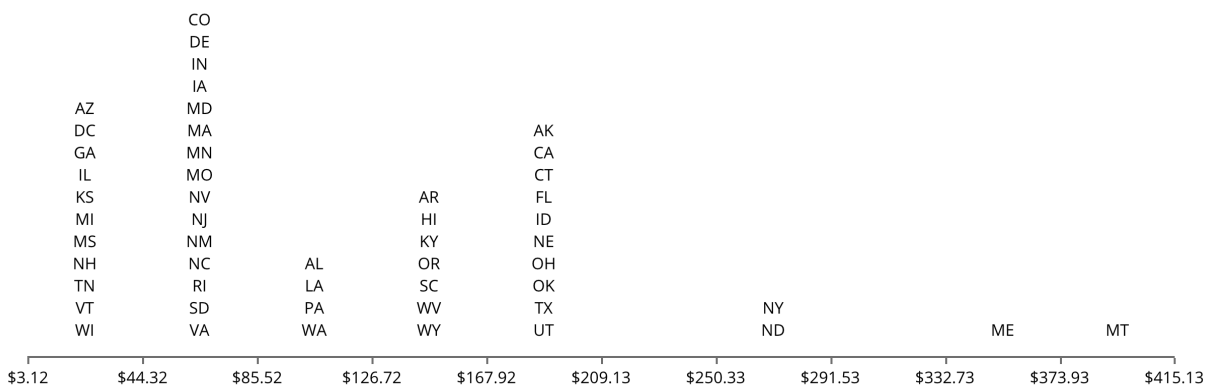

State Indicators

S-44 State Agency R&D Expenditures per \$1 Million of Gross Domestic Product

2017

Distribution of states across indicator values, 2017

Histograms do not display states with extreme values. Please consult the data tables for exact indicator values for each state. State positions on the histogram are based on unrounded values of the indicator and may not always match the rounded values displayed in the table.
